DANGERS TO HUMANS AND DOMESTIC ANIMALS

DANGER

CORROSIVE

CAUSES SEVERE EYE DAMAGE AND SKIN BURNS

MAY CAUSE ALLERGIC SKIN REACTION

HARMFUL IF INHALED

HARMFUL IF SWALLOWED

Do not get in eyes, on skin, or on clothing. Wear goggles and rubber gloves. Avoid breathing vapor or mist. Keep container closed. Use with adequate ventilation. Do not take internally. Wash thoroughly after handling.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and wildlife. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of waste. Apply this pesticide only as specified on this label.

STORAGE AND DISPOSAL

PROHIBITIONS

This product is corrosive to mild steel. Do not store or transport in animal metal containers. Do not contaminate with strong oxidizing or reducing agents. Do not contaminate water, food, or feed by storage or disposal of cleaning of equipment.

PESTICIDE DISPOSAL

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide or rinse may be a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL

METAL CONTAINERS

Triple rinse (or equivalent). Then offer for recycling or reconditioning, or punctuate and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

PLASTIC CONTAINERS

Triple rinse (or equivalent). Then offer for recycling or reconditioning, or punctuate and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

GENERAL

CONSULT FEDERAL, STATE, OR LOCAL DISPOSAL AUTHORITIES FOR APPROVED ALTERNATIVE PROCEDURES.

CONDITION OF SALE AND WARRANTY

Rohm and Haas warrants that this product conforms to its chemical description and is reasonably fit for the use specified on this label. Rohm and Haas makes no other express or implied warranties, either of merchantability or arising from a course of dealing or usage of trade.

NOTE TO PHYSICIAN:

Proper medical damage may result from the use of this product in a manner inconsistent with its labeling. Rohm and Haas reserves the right to discontinue the manufacture of, or to alter the formula or labeling of, this product. Therefore, before using this product, the user should contact Rohm and Haas to determine whether this product is available and remains in compliance with Federal, State, and local regulations. This product may not be suitable for use by the general public. If a physician or other authorized competent authority has not been trained in the use of this product, they should not be allowed to use this product. This product may be supplied to the Buyer, on the condition that any alteration, change, or revision of the product, will be made only with the consent of Rohm and Haas and only in accordance with the written instructions of the latter. Any substitute products supplied to the Buyer or the final dilution or use of this product may only be performed in accordance with the written instructions of the Buyer and Rohm and Haas.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Skane M-8 mildewcide is for use as an industrial mildewcide in coatings, paints, building materials, wallpaper pastes and adhesives, arosus adhesives and tackifiers.

COATINGS

For use as a mildewcide in coatings such as latex and solvent-based paints, semi-transparent stains and solid stains. Use 1.0 to 3.0 pounds of Skane M-8 per 100 gallons of coating formulation. If necessary, a higher dosage up to 4.0 pounds of Skane M-8 per 100 gallons may be used depending upon level of control required.

In latex coatings, Skane M-8 should be added during the letdown phase of paint manufacture. To insure uniform distribution throughout the coating, it is recommended that Skane M-8 be premixed with propylene glycol and coalescent. The premix should be added slowly, with good agitation, just prior to the addition of the coalescent. Skane M-8 mildewcide weighs 8.5 pounds per gallon.

CONCENTRATES Skane M-8 should be added to the polymer latex concentrate at a level to ensure that the final use-dilution will contain 1.0 to 3.0 pounds of Skane M-8 mildewcide per 100 gallons of coating formulation. Dosage levels of Skane M-8 mildewcide will depend upon the type of formulation, the presence and level of zinc oxide in the system, and the climate in which the material will be exposed.
Industrial Mildewcide - For Use as an Industrial Mildewcide in Coatings, Paints, Building Materials, Wallpaper Pastes and Adhesives, Aqueous Adhesives and Tackifiers.

MADE IN ENGLAND

Lot Number: (BC1)

Precautionary Statements:

Danger:

Hazard to Humans and Domestic Animals

AVERSE INGREDIENT:

Adhesives and Tackifiers. Store Between 32-100°F

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Skane M-8 mildewcide is for use as an industrial mildewcide in coatings, paints, building materials, wallpaper pastes and adhesives, aqueous adhesives and tackifiers.

Coatings

For use as a mildewcide in coatings such as latex and solvent-based paints, semi-transparent stains and solid stains. Use 1.0 to 3.0 pounds of Skane M-8 per 100 pounds of coating formulation. If necessary, a higher dosage up to 4.0 pounds of Skane M-8 per 100 gallons may be used depending upon level of control required.

In late coatings, Skane M-8 should be added during the latex phase of paint manufacture. To insure uniform distribution throughout the coating, it is recommended that Skane M-8 be premixed with propylene glycol and coalescent. The premix should be added slowly, with good agitation, just prior to the addition of the thickener. In solvent-based coatings, a coupling solvent such as butyl Cellosolve® may be used to assist in mixing Skane M-8.

Concentrates Skane M-8 should be added to the polymer latex concentrate at a level to ensure that the final use-dilution will contain 1.0 to 3.0 pounds of Skane M-8 per 100 gallons of coating formulation.

Dosage levels of Skane M-8 mildewcide will depend upon the type of formulation, the presence and level of zinc oxide in the system, and the climate in which the material will be exposed.

Building Materials

For use as a mildewcide in building materials such as elastomeric roof and wall coatings and mastics, candles, sealants, joint cements, spackling, stucco, and grouting. Use 1.0 to 3.0 pounds of Skane M-8 mildewcide per 100 gallons of formulation.

Wallpaper Pastes and Adhesives

For use as a mildewcide preservative to protect materials such as polyvinyl acetate, starch and dextrin-based pastes from fungal attack after they are applied. Use 0.1 to 0.15 pounds of Skane M-8 mildewcide in 100 pounds of formulation.

Aqueous Adhesive and Tackifier Preservation

For use as a mildewcide preservative in water soluble and water dispersed adhesives such as animal glues, vegetable glues, natural rubber latexes, polyvinyl acetate, styrene-butadiene, polyurethane, spony, acrylic lattices, and tackifiers derived from rosin and hydrocarbon resins. Use 0.10 to 0.20 pounds of Skane M-8 mildewcide per 100 pounds of formulation.

Skane M-8 mildewcide weighs 8.5 pounds per gallon.
