Badly fouled systems should be cleaned before treatment is begun.

Initiate dosing as follows:

**INITIAL DOSE:** When the system is noticeably fouled, apply 148-883 ppm product (2.2-13.2 ppm active ingredient) depending upon the severity of contamination to control microbial biofilms, bacteria, algae, and fungi. Recirculate water cooling towers at some point in the system to insure uniform mixing. Apply 0.44 to 1.5 lb (7-23 fluid ounce) of this product per ton (dry basis) of pulp or paper to be treated per day or 35-219 ppm product (0.5 to 3.3 ppm active ingredient) weekly or as needed to maintain control.

For the control of microbial biofilms, bacteria and fungi in ultrafIltration and reverse osmosis systems, add 10-333 ppm of product (0.15-5 ppm active ingredient) to the cleaning solution. It is a violation of Federal law to use this product in a manner inconsistent with its labeling. It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This product weighs 8.4 pounds per gallon. This product weighs 8.4 pounds per gallon. This product weighs 8.4 pounds per gallon. This product weighs 8.4 pounds per gallon. This product weighs 8.4 pounds per gallon. This product weighs 8.4 pounds per gallon. This product weighs 8.4 pounds per gallon. This product weighs 8.4 pounds per gallon.
For the control of microbial biofilms, bacteria, algae, and fungi, add this product to air conditioner/refrigeration condensate water systems at some point in the system to insure uniform mixing.

**INITIAL DOSE:** When the system is noticeably fouled, apply 148-883 ppm product (2.2-13.2 ppm active ingredient). Repeat until control is achieved. Badly fouled systems should be cleaned before treatment is begun.

**SUBSEQUENT DOSE:** When microbial control is evident, add 35-219 ppm product (0.5 to 3.3 ppm active ingredient) weekly or as needed to maintain control.

**HYDROSTATIC STERILIZER WATER SYSTEMS**

For the control of microbial biofilms, bacteria, algae, and fungi, add this product to hydrostatic sterilizer water systems at some point in the system to insure uniform mixing.

**INITIAL DOSE:** When the system is noticeably fouled, apply 148-883 ppm product (2.2-13.2 ppm active ingredient). Repeat until control is achieved. Badly fouled systems should be cleaned before treatment is begun.

**SUBSEQUENT DOSE:** When microbial control is evident, add 35-219 ppm product (0.5 to 3.3 ppm active ingredient) weekly or as needed to maintain control.

**INDUSTRIAL WASTEWATER TREATMENT SYSTEMS AND SEWAGE SYSTEMS**

This product is recommended for the control of microbial biofilms, bacteria, fungi, and algae in industrial wastewater treatment and sewage systems. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority.

**INITIAL DOSE:** When the system is noticeably fouled, apply 148-883 ppm product (2.2-13.2 ppm active ingredient). Repeat until control is achieved. Badly fouled systems should be cleaned before treatment is begun.

**SUBSEQUENT DOSE:** When microbial control is evident, add 35-219 ppm product (0.5 to 3.3 ppm active ingredient) weekly or as needed to maintain control.

**INFLUENT WATER FILTRATION SYSTEMS**

For the control of microbial biofilms, bacteria, algae, and fungi, add this product to influent water filtration systems at some point in the system to insure uniform mixing.

**INITIAL DOSE:** When the system is noticeably fouled, apply 148-883 ppm product (2.2-13.2 ppm active ingredient). Repeat until control is achieved. Badly fouled systems should be cleaned before treatment is begun.

**SUBSEQUENT DOSE:** When microbial control is evident, add 35-219 ppm product (0.5 to 3.3 ppm active ingredient) weekly or as needed to maintain control.

**CAN WARMERS**

For the control of microbial biofilms, bacteria, algae, and fungi, add this product to can warmers at some point in the system to insure uniform mixing.

**INITIAL DOSE:** When the system is noticeably fouled, apply 148-883 ppm product (2.2-13.2 ppm active ingredient). Repeat until control is achieved. Badly fouled systems should be cleaned before treatment is begun.

**SUBSEQUENT DOSE:** When microbial control is evident, add 35-219 ppm product (0.5 to 3.3 ppm active ingredient) weekly or as needed to maintain control.

**RETORT WATER SYSTEMS**

For the control of microbial biofilms, bacteria, algae, and fungi, add this product to retort water systems at some point in the system to insure uniform mixing.

**INITIAL DOSE:** When the system is noticeably fouled, apply 148-883 ppm product (2.2-13.2 ppm active ingredient). Repeat until control is achieved. Badly fouled systems should be cleaned before treatment is begun.

**SUBSEQUENT DOSE:** When microbial control is evident, add 35-219 ppm product (0.5 to 3.3 ppm active ingredient) weekly or as needed to maintain control.

**INDUSTRIAL SCRUBBING SYSTEMS**

For the control of microbial biofilms, bacteria, algae, and fungi, add this product to industrial scrubbing systems at some point in the system to insure uniform mixing.

**INITIAL DOSE:** When the system is noticeably fouled, apply 148-883 ppm product (2.2-13.2 ppm active ingredient). Repeat until control is achieved. Badly fouled systems should be cleaned before treatment is begun.

**SUBSEQUENT DOSE:** When microbial control is evident, add 35-219 ppm product (0.5 to 3.3 ppm active ingredient) weekly or as needed to maintain control.

**EVAPORATIVE CONDENSER WATER SYSTEMS**

For the control of microbial biofilms, bacteria, algae, and fungi, add this product to evaporative condenser water systems at some point in the system to insure uniform mixing.

**INITIAL DOSE:** When the system is noticeably fouled, apply 148-883 ppm product (2.2-13.2 ppm active ingredient). Repeat until control is achieved. Badly fouled systems should be cleaned before treatment is begun.

**SUBSEQUENT DOSE:** When microbial control is evident, add 35-219 ppm product (0.5 to 3.3 ppm active ingredient) weekly or as needed to maintain control.
