ETHYLENE OXIDE
STERILANT/FUMIGANT
ACTIVE INGREDIENT: ETHYLENE OXIDE...100%
(CAS NO: 75-21-8)

Keep Out of Reach of Children

DANGER PELIGRO
PRECAUCION AL USUARIO: SI usted no lee Inglés, no use este producto hasta que le etiqueta le haya sido explicada ampliamente.

If inhaled - Move person to fresh air. Keep warm. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. If breathing is difficult, give oxygen. Call a poison control center or doctor for further treatment advice, even if there are no symptoms. Keep under medical observation - symptoms may be delayed. Do not give anything by mouth to an unconscious person.

On skin or clothing - Take off contaminated clothing and wash skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

In case of exposure - Remove any contaminated clothing and wash skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED - Do not induce vomiting. Call a poison control center or doctor for treatment advice. Have person sip two glasses of water if able to swallow. Do not induce vomiting. Do not give anything by mouth to an unconscious person.

If in eyes - Hold eye open and rinse slowly and gently with water for 15 minutes. Cover eye with a sterile,松软, moistened cloth and call a poison control center or doctor for treatment advice.

NOTICE TO PHYSICIAN - Skin exposure to Ethylene Oxide will cause bles sing and blistering. At high concentrations, severe conjunc tivitis can occur. Irritation of the respiratory tract may occur, but without acute lung edema. Symptoms of systemic intoxication are headache, nausea, vomiting, incoordination, and cardiac irregularities. Treatment is symptomatic and supportive.

Keto to ARC Specialty Products Ethylene Oxide MSDS, if unable to locate MSDS for this product, please call ARC Specialty Products at the telephone number below and request that one be sent immediately.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. It is the employer's responsibility to follow the requirements of the Ethylene Oxide Standard (29 CFR 1910.1047) and all other applicable standards in facilities in which this product is used for the disposal of medical waste.

The product may be used only by non-portable (commercial) ethylene oxide gas sterilizers designed for use with 100% ethylene oxide. This product may be used only by personnel trained in accordance with the Ethylene Oxide Standard (29 CFR 1910.1047). When used to sterilize non-portable equipment, this product must be used in non-portable (commercial) ethylene oxide gas sterilizers that have FDA clearance.

A. AS A STERILANT AND FUMIGANT GAS

B. Sterilization/fumigation with Ethylene Oxide must be performed only in vacuum or gas tight chambers designed for use with 100% ethylene oxide. The concentration of Ethylene Oxide must not exceed 25% maximum.

C. Ethylene Oxide cycle parameters depend on several sterilization/fumigation variables: gas loading, concentration, exposure time, chamber air pressure, gas concentration, times and quantities of items to be sterilized/fumigated; packaging; load configuration, and chamber microbial challenge at desired degree of disinfection; and the desired performance of the sterilization/fumigation cycle parameters should be those pre-determined by the manufacturer of the equipment. Other parameters are used, the safety and efficacy of the alternate cycle parameters must be validated and are the responsibility of the user.

NEVER USE PARAMETERS WHICH ALLOW FLAMMABLE CONCENTRATIONS OF ETHYLENE OXIDE AND AIR INTO THE CHAMBER.

2. INSTALLATION AND OPERATION OF THE CONTAINER - Follow the directions on the valve tag attached to this container.

STORAGE AND DISPOSAL
Do not contaminate food, feed, or water by storage or disposal. This product is not a driftless gas, and use with a tag attached to the valve. Store in cool, well-ventilated area. Avoid exposure to heat or direct sunlight and do not store near an outside gas leak. Store in cool, dry area. Avoid exposure to heat or direct sunlight. Avoid exposure to heat or direct sunlight and do not store near a flame. Store in cool, dry area.

PESTICIDE DISPOSAL
Pesticide wastes are acutely hazardous. In the disposal of excess pesticide, spray, or sludge, it is a violation of Federal Law. If these wastes cannot be disposed of in accordance with local regulations, contact your State Pesticide Control Agency or the Hazardous Waste Resource Center at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL
When empty, return to supplier. Before returning container to supplier:

1. Pressureize container with nitrogen to 50 psig total pressure at 70°F.

2. Replace valve plug tightly in valve outlet.

3. Thoroughly wash equipment.

USE THIS PRODUCT WITHIN 120 DAYS OF ITS PURCHASE.

In case of accident or emergency, call CHEMTREC at 800-424-9300.
