ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without prior notification to the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

STORAGE AND HANDLING

Nalco 7338 is incompatible with many commonly used materials of construction such as steel, galvanized iron, aluminum, tin, and zinc. Nalco 7338 can be stored and handled in baked phenolic-lined steel, polyethylene, stainless steel, or reinforced epoxy-plastic equipment. This product freezes at about 20.31°F (-7°C). Therefore, unless the storage tank is inside or underground, heating and insulation may be required. If heating is needed, exposure to high temperatures should be avoided. For short storage times (up to about 1 month), temperatures of up to 100°F (37.8°C) can be tolerated but the preferred maximum storage temperature is about 80°F (26.7°C).

A stainless steel centrifugal pump is suggested for transfer service. Spiral-wound stainless steel with polymer is suitable for gaskets and packing.

Handle in a well-ventilated area. If vapors are irritating to the nose or eyes, special ventilation or respiratory protection (MSHA/NIOSH approved air purifying respirator equipped with an organic vapor canister) may be required.

STORAGE AND DISPOSAL

PESTICIDE DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Pesticide waste is toxic. Improper disposal of excess pesticide, spray mixture or rinse water is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or your Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Region for guidance on proper disposal.

CONTAINER DISPOSAL: Empty containers and packaging must be disposed of in accordance with local, state and federal regulations. Non-refillable containers may be returned to the Nalco distributor for disposal.

RECYCLING: Some packaging materials are reusable. Check with your local recycling agency for current procedures.

TRASH: Refillable containers need to be flushed at the pump, and rinsed out properly after use. The rinse water needs to be drained in a permitted manner. If you do not have a permit for release, check with the proper local regulatory agency to ensure that the rinse water is being disposed of properly.

BEFORE HANDLING OR USING THIS PRODUCT SEE YOUR EMPLOYER AND READ CURRENT MATERIAL SAFETY DATA SHEET.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

AIR WASHERS AND INDUSTRIAL SCRUBBING SYSTEMS / RECIRCULATING COOLING AND PROCESS WATER SYSTEMS

This product may be used only in industrial air washers and air washer systems which have mist-eliminating components. Nalco 7338 should be added at the application rates described below, to a water treatment system at a convenient point of uniform mixing such as the basin area. Additional may be made intermittently (SLUG DOSE) or continuously. Badly fouled systems can be shocked treated with Nalco 7338. Under these conditions, blowdown should be discontinued for up to 24 hours.

Nalco 7338 can be used in industrial process water systems that contain ultra filtration units and non-medical reverse osmosis membranes (where approved for compatibility by the membrane manufacturer) and associated distribution systems.

LIMITED WARRANTY AND DISCLAIMER

Seller warrants that the product conforms to its chemical description as contained on this label and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. THE WARRANTIES MADE IN THIS PARAGRAPH ARE SELLER’S SOLE WARRANTIES WITH RESPECT TO THE PRODUCT AND ARE MADE EXPRESSLY IN LIEU OF AND EXCLUDE ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE AND ALL OTHER EXPRESS OR IMPLIED REPRESENTATIONS AND WARRANTIES.

Made in USA

UN 2922, Corrosive Liquid, Toxic, N.O.S., (Glutaraldehyde), 8 (6.1), PG II
[Marine Pollutant: Glutaraldehyde]

NOTE TO PHYSICIAN:

Aspiration may cause lung damage. Probable mucosal damage may contraindicate the use of gastric lavage.

Have the MSDS and, if available, the product container or label with you when calling a poison control center or a doctor for further treatment advice.

FIRST AID

If swallowed:
Call a poison control center or a doctor immediately for treatment advice.
- Do not induce vomiting.
- Do not give anything to drink.

If in eyes:
- Wash immediately and continuously with flowing water for at least 30 minutes.
- Remove contact lenses after the first 5 minutes and continue washing.
- Obtain prompt medical consultation, preferably from an ophthalmologist.

If inhaling:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or a doctor for further treatment advice.

If on skin or clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or a doctor for treatment advice.

NOTE TO PHYSICIAN:

Aspiration may cause lung damage. Probable mucosal damage may contraindicate the use of gastric lavage.

Call a poison control center or a doctor for further treatment advice.

If inhaled:

Inhalation of Nalco 7338 is toxic to the respiratory system. Nalco 7338 should be used at the same application rates, and in the same manner as described above. It should be added to the system at a point that will allow for uniform mixing throughout the system.

HEAT TRANSFER SYSTEMS

(Evaporative Condensers, Dairy Sweetwater Systems, Hydrostatic Sterilizers and Retorts, and Pasteurizers and Warmers)

Nalco 7338 should be used at the same application rates, and in the same manner as described above. It should be added to the system at a point of uniform mixing such as a basin area, sump area or other reservoir or collecting area from which the treated water will be circulated uniformly throughout the system.

INDUSTRIAL WASTEWATER SYSTEMS

(Wastewater Systems, Wastewater Sludge and Wastewater Holding Tanks)

Nalco 7338 should be added to a wastewater system or sludge at a convenient point of uniform mixing such as the digester. Add 0.43 to 2.2 gallons (500 to 2,500 ppm) Nalco 7338 per 1,000 gallons of wastewater or sludge.

RECYCLATING COOLING AND PROCESS WATER SYSTEMS

Service water and auxiliary systems

Nalco 7338 should be used at the same application rates, and in the same manner as described above. It should be added to the system at a point that will allow for uniform mixing throughout the system.

Nalco 7338 can be used in industrial process water systems that contain ultra filtration units and non-medical reverse osmosis membranes (where approved for compatibility by the membrane manufacturer) and associated distribution systems.
