**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read this entire label and follow all use directions and use precautions. Do not handle this product if you have an allergy to anticoagulants.

**USE RESTRICTIONS:**
- This product may only be used to control the following rodent pests in and around man-made structures: Norway rat (Rattus norvegicus), Roof rat (Rattus rattus), Cotton rat (Sigmodon hispidus), Polynesian rat (Rattus exulans), White-throated woodrat* (Neotoma albigula), and Mexican woodrat* (Neotoma micropus).

**Bait stations:**
- Man-made structures include homes and other permanent or temporary residences, food processing and related structures around and associated with these sites. Fence and perimeter baiting, beyond 100 feet from a structure as defined above, is prohibited. This product must not be applied directly to food or feed crops.
- Burrow baiting with Contrac Super Size Blox is prohibited.

**TREATMENT AREAS:**
- This product is especially suited for wet or damp areas, such as sewers. Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milks or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait.
- Do not sell this product in individual containers holding less than 16 pounds of bait.

**APPLICATION DIRECTIONS:**
- Apply 1 or 2 bait blocks per placement. One-8 oz. bait block may provide enough bait to kill two to eight rats. Use two blocks only at points of extremely high rat activity. Space placements at appropriate intervals — usually 15 to 30 feet apart. Maintain an uninterrupted supply of fresh bait for at least 10 days or until signs of rat activity cease.
- Replace contaminated or spoiled bait immediately. Wear gloves, collect and dispose of all dead, exposed animals and leftover bait. To prevent reinestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal. Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals. Pesticide Disposal: Wastes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility. Pesticide Container: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Dispose of empty container by placing in trash at an approved waste disposal facility or by incineration. Call your Local Waste Agency for any questions on proper disposal.

**WARRANTY:**
To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

**CONTRAC® SUPER SIZE BLOX™**

**MADE IN USA**

**FIRST AID**

Have label with you when obtaining treatment advice.

**IF SWALLOWED:**
- Call a poison control center, doctor, or 1-877-854-2494, or 1-800-858-7378 immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

**IF ON SKIN OR CLOTHING:**
- Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**IF IN EYES:**
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

**NOTES TO PHYSICIAN**

If swallowed or absorbed through the skin, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K1 intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

**NOTES TO VETERINARIAN**

Anticoagulant Bromadiolone: For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K1. If needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

**NOTES TO USER**

If bait stations are mandatorily for outdoor, above-ground use. Tamper-resistant bait stations and replenish as needed.

**APPLICATION DIRECTIONS:**
- Apply 1 or 2 bait blocks per placement. One-8 oz. bait block may provide enough bait to kill two to eight rats. Use two blocks only at points of extremely high rat activity. Space placements at appropriate intervals — usually 15 to 30 feet apart. Maintain an uninterrupted supply of fresh bait for at least 10 days or until signs of rat activity cease.
- Replace contaminated or spoiled bait immediately. Wear gloves, collect and dispose of all dead, exposed animals and leftover bait. To prevent reinestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION:**
If swallowed or absorbed through skin. Causes moderate eye irritation. Do not get in eyes, on skin, or on clothing. Keep away from children, domestic animals, and pets.

**User Safety Requirements**
Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

**ENVIRONMENTAL HAZARDS**

This product is extremely toxic to fish, birds and other wildlife. Dogs, cats, and predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply this product directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark.

**Not permitted for use against the following species in California:**
- Cotton rat, Polynesian rat, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.
