If Inhaled: If a person is not breathing, call 911 for emergency services. Use artificial respiration if needed. If the person is breathing, have the person sit or lie down until the person is no longer dizzy or has recovered.

If Swallowed: Do not induce vomiting unless told to do so by the poison control center or doctor.

If Skinned: Do not get in eyes, on skin, or on clothing. Wash exposed skin with soap and water. After handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

KEEP OUT OF REACH OF CHILDREN

DANGER

Do not contaminate water, food, or feed by storage or disposal. EPA Reg. No. 1

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DIRECTIONS FOR TREATING PUBLICLY-OWNED TREATMENT WORKS TO CONTROL COLIFORM AND OTHER BACTERIA: Add BUSAN 94 at a concentration of 1.0 to 10.0 ppm by weight of water being treated, depending on the severity and type of contamination. Make the continuous addition of BUSAN 94 for a baking point at a point in the system where mixing will be rapid and thorough. Add BUSAN 94 to the system in a location where contact times of 30 minutes or greater will be reached before reaching the outfall.

A. Direct the continuous addition at a point just after the initial chlorine mixing. Rapid mixing is necessary for maximum effectiveness. BUSAN 94 must be added to a location where a contact time of 10-15 minutes will be reached before reaching the outfall.

B. Options for use:...
