ALL-WEATHER BLOX™

KILLS RATS, MICE & MEADOW VOLES*
Mold Resistant • Moisture Resistant
Peanut Flavored
KEEP OUT OF REACH OF CHILDREN
CAUTION

See back panel for First Aid, additional Precautionary Statements, and Directions for Use.

ACTIVE INGREDIENT:
Diphacinone (CAS #82-66-6): 0.005%
OTHER INGREDIENTS: 99.995%
TOTAL 100.000%

NET WT: 4 lbs (1.81 kg)

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.

This Product May Only be Used Inside and Within 100 Feet of Man-made Structures

Photo may not be representative of a label-consistent bait placement

Product Code: DI4021

**FIRST AID**

**HAKE LABEL WHEN OBTAINING TREATMENT ADVICE**

If Swallowed:  
• Call a poison control center, doctor, or 1-877-844-2044 immediately for treatment advice.  
• Have person sip a glass of water if able to swallow.  
• Do not induce vomiting unless told to do so by the poison control center or doctor.

**NOTE TO PHYSICIAN**  
If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K₁ intramuscularly or orally. Repeat as necessary based on prothrombin times.

**TREATMENT FOR PET POISONING**  
If animal eats this bait, call a veterinarian or 1-877-844-2044 at once.

**NOTE TO VETERINARIAN**  
Anticoagulant Diphenacrine: For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K₁.

**PRECAUTIONARY STATEMENTS**

**Hazard to Humans and Domestic Animals**  
**CAUTION:** Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Keep away from children, domestic animals and pets. Do not get in eyes, on skin, or on clothing. All handlers (including applicators) must wear long pants, shoes, socks, and waterproof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

**User Safety Requirements**  
Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing them. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

**ENVIRONMENTAL HAZARDS**

This product is extremely toxic to mammals, birds and other wildlife. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, or to areas where surface water will be present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water or waste.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.  
**READ THIS LABEL:** Read the entire label and follow all use directions and use precautions. Use only for sites, pests, and application methods described on this label.  
**IMPORTANT:** Do not expose children, pets, or non-target animals to rodenticides. To help to prevent exposure:  
1. Store unused product out of reach of children and pets.  
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait station. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be taken from bait stations when they are lifted, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to horticultural livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.

3. Dispose of product container and unused, spoiled, or unconsumed bait as specified on this label.  

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal.  
**Pesticide Storage:** Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.  
**Pesticide Disposal:** Waters resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.  
**Container Handling:** Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if possible.  
**Note to physician:** If swallowed, this product may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K₁ intramuscularly or orally. Repeat as necessary based on prothrombin times.

**WARRANTY:** To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than as indicated on the label. Buyer assumes all risk of use and handling of this material when such use and handling is contrary to label instructions.

TOTAL 100.000%

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.
Any person who retrieves carcasses or unused bait following application of this product must wear protective clothing as specified on this label.

CAUTION:
Hazards to Humans and Domestic Animals

Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten bait. If ingested, administer Vitamin K1 intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

NOTE TO PHYSICIAN
If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. Do not induce vomiting unless told to do so by the poison control center or doctor.

NOTE TO VETERINARIAN
Do not induce vomiting unless told to do so by the poison control center or doctor.

PRECAUTIONARY STATEMENTS
Hazard to Humans and Domestic Animals
CAUTION: Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Keep away from children, domestic animals and pets. Do not get in eyes, on skin, or on clothing. All hardening (including application) must wear long pants, shoes, socks, and waterproof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

User Safety Requirements
Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other washables. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

ENVIRONMENTAL HAZARDS
This product is extremely toxic to mammals, birds and other wildlife. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Therefore, apply bait only to sites where children, pets, non-target mammals, or birds may have access to the bait station. Do not apply bait directly to water or to areas where water surface is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water or rinse.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read this entire label and follow all use directions and use precautions. Use only for sites, pests, and application methods described on this label.

IMPORTANT: Do not expose children, pets, or non-target animals to rodenticides. To help to prevent exposure:
1. Store unused product out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents children from reaching into bait compartments and obtaining bait. If bait can be shaken from bait stations when they are lifted, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to hooved livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container and unused, spoiled, or unconsumed bait as specified on this label.

FOLLOW-UP:
Replace contaminated or spoiled bait immediately. Wearing waterproof gloves, collect and properly dispose of all visible dead animals and leftover bait. Discourage reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed.

NOTE TO VETERINARIAN
Do not exceed the recommended withdrawal time of 10 days or until signs of new feeding by rats.

NOT FOR USE ON CROPS
This product is not recommended for use on any food-producing crop. Do not contaminate water, food or feed by storage or disposal.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

Pesticide Disposal: Waste resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

Container Handling: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Dispose of empty container by placing in trash, at an approved disposal facility or by incineration.

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

KEEP OUT OF REACH OF CHILDREN
CAUTION
See side panels for First Aid, additional Precautionary Statements, and Directions for Use.

DIETRAC® ALL-WEATHER BLOX™
KILLS RATS, MICE & MEADOW VOLES*
Mold Resistant • Moisture Resistant
Peanut Flavored

ACTIVE INGREDIENT:
Diphacinone (CAS #82-66-6): 0.005%
OTHER INGREDIENTS: 99.995%
TOTAL 100.000%

DIRECTIONS FOR USE
(Continued from other panel)
Bait stations are mandatory for outdoor, above-ground use. Tempered-resist bait stations must be used wherever children, pets, non-target mammals, or birds may have access to the bait placement location.

USE RESTRICTIONS: This product may only be used to control the following rodent pests in and around man-made structures: House mouse (Mus musculus), Norway rat (Rattus norvegicus), Roof rat (Rattus rattus), Cotton rat (Sigmodon hispidus), Eastern harvest mouse (Reithrodontomys humulis), Golden mouse (Ochrotomys nutalli), Polynesian rat (Rattus exulans), Meadow vole (Microtus pennsylvanicus), White-throated woodrat (Neotoma albiventris), Southern plains woodrat (Neotoma micropus), and Mexican woodrat* (Neotoma mexicana). This product must be used in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harrowing or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port or terminal buildings and related structures around and associated with these sites. Fence and perimeter baiting, beyond 100 feet from a structure as defined above, is prohibited. This product must not be applied directly to food or feed crops.

Burrow baiting with DIETRAC® All-Weather Blox™ is prohibited.

Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait.

Do not sell this product in individual containers holding less than 4 pounds of bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats, mice or meadow voles* will most likely find and consume the bait. Generally, these areas are along walls, by grated openings, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain and snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:
Rats: Apply 3 to 16 one-ounce Blocks per placement in infested areas. Space placements at intervals of 15 to 30 feet. Maintain a constant supply of fresh bait for 10 days or until there no longer are signs of new feeding by rats.

When baiting sewers, securely attach one end of wire to each block and the other end to a stationary structure such as the bottom step of a manhole ladder or a sewer grate. Allow just enough wire for the block to rest on manhole benching. If benching is not present, suspend each block a few inches above the high water mark or secure block on a board supported by opposing steps of the ladder. Setting blocks in this manner will reduce chances that they will be removed by rats or water. Use 3 to 16 blocks per manhole, depending upon the apparent intensity of rat activity. Maintain an uninterrupted supply of fresh bait for at least 10 days or until there are no signs of new feeding by rats.

Mice and Meadow Voles*: Apply 1 Block per typical placement in infested areas. Space placements at 8 to 12 foot intervals. Two Blocks may be needed at points of very high activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mouse or meadow vole* activity cease.

FOLLOW-UP: Replace contaminated or spoiled bait immediately. Wearing waterproof gloves, collect and properly dispose of all visible dead animals and leftover bait. Discourage reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed.

* Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.
