Kills Warfarin Resistant Norway Rats
Bait Can Be Used Indoors or Out
Pelleted Bait
With Bromadiolone

KILLS RATS, MICE & MEADOW VOLES*

ACTIVE INGREDIENT:
Bromadiolone (CAS #28772-56-7): 0.005%
OTHER INGREDIENTS†: 99.995%
†Contains Denatonium Benzoate

TOTAL 100.000%

Net Weight: 12 lbs (5.4 kg)

KEEPS OUT OF REACH OF CHILDREN

KEEP OUT OF REACH OF CHILDREN

CAUTION
See back panels for additional First Aid and precautionary statements, and Directions For Use.

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat
### FIRST AID

**If Swallowed:**
- Call a poison center, doctor, or 1-877-854-2494 at once. Note to veterinarian.
- Keep container closed and away from other chemicals.
- Do not contaminate water, food or feed by storage or disposal.
- Follow manufacturer’s instruction for cleaning/maintaining PPE.

**If in Eyes:**
- Hold eye open and rinse slowly and gently with water for 15−20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye, preferably mouth-in-mouth if possible.
- Call a poison control center, doctor, or 1-877-854-2494 immediately for further treatment advice.

**If Inhaled:**
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance. Then give artificial respiration, or use mouth-to-mouth resuscitation.
- Call a poison control center, doctor, or 1-877-854-2494 immediately for further treatment advice.

### TREATMENT FOR PET POISONING

**If animal eats bait, call veterinarian or 1-877-854-2494 at once.**

**If Ingested:**
- Administer Vitamin K₁ intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

### PRECAUTIONARY STATEMENTS

**Hazard to Humans and Domestic Animals:**
**CAUTION:** Harmful if swallowed. Harmful if inhaled. Avoid breathing dust. Causes moderate eye irritation. Keep away from children. Do not inhale dust. Do not get in eyes or on clothing.

**Environment:**
- Burns hot water. Keep and wash PPE separately from other laundry. Users should remove clothing/PPE immediately if pesticide gets inside. Remove PPE immediately after handling this product.
- If gloves or clothing/PPE become contaminated, wash clothing with detergent, hot water, and bleach, then dry thoroughly before reuse or storage. Do not resell, sell, give away, or dispose of PPE designed for use with this product without thoroughly cleaning or decontaminating.

### STORAGE AND DISPOSAL

**Do not contaminate water, food, feed or food-handling equipment, or milk or milk handling equipment or surfaces:**
- Remove and wash contaminated clothing before reuse.
- Remove wasted bait or bait pack material from bait station and container when empty.
- Follow manufacturer’s instruction for cleaning/maintaining PPE.

**Waste resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility:**
- Store only in original container in a cool, dry place inaccessible to children and pets.
- Keep containers closed and away from other chemicals.
- Keep containers and used equipment out of reach of children, pets, non-target mammals or birds.
- Do not contaminate water or soil. Avoid contamination of ground water supplies or aquatic life.
- Keep out of sight of children.

**CONTAINMENT OF BAIT RESIDUES:**
- Keep bait away from potential forage for children, pets, non-target mammals or birds.
- If necessary, claim bait residues in conjugate by means of the following method:
  - Apply 2 oz. of bait per placement at 8 foot intervals in infested areas.
  - Monitor the activity of baiting at the same interval as the previous baiting.
  - Keep bait away from children, pets, non-target mammals or birds.

**WARRANTY:**
- To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

**Directions for Use (Continued from other panel):**

1. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If it can be taken from bait stations when they are filled, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to foliage, livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.

2. Dispose of product container and unused, spoiled, or contaminated/used bait as specified on this label.

3. Baits stations are mandatory for outdoor, above ground use. Tamper-resistant bait stations must be used wherever children, pets, non-target mammals or birds may have access to the bait placement location.

### USE RESTRICTIONS

This product may only be used to control the following rodent pests in and around agricultural buildings and man-made agricultural structures: house mouse (Mus musculus), Norway rat (Rattus norvegicus), Rice rat (Rattus estivus), Cotton rat (Sigmodon hispidus), Eastern harvest mouse (Reithrodontomys fulvescens), Golden mouse (Ochrotomys nuttalli), Polyvesan rat (Rattus exulans), White-throated vole (Marmota parryi), White-footed mouse (Peromyscus leucopus), South American lemming (Neotoma micropus), and Mexican woodrat (Neotoma mexicana). This product must be used in and within 100 feet of agricultural buildings and man-made agricultural structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations. Fences and perimeter baiting, beyond 100 feet from an agricultural structure as defined above, is prohibited. This product must not be applied directly to food or feed crops.

### Net Weight: 12 lbs (5.4 kg)

**TREATMENT FOR PET POISONING:**

**If animal eats bait, call veterinarian or 1-877-854-2494 at once.**

**If Ingested:**
- Administer Vitamin K₁ intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

**If Swallowed:**
- Call a poison control center, doctor, or 1-877-854-2494 immediately for treatment advice.

**If in Eyes:**
- Hold eye open and rinse slowly and gently with water for 15−20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye, preferably mouth-in-mouth if possible.
- Call a poison control center, doctor, or 1-877-854-2494 immediately for treatment advice.

**If Inhaled:**
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance. Then give artificial respiration, or use mouth-to-mouth resuscitation.
- Call a poison control center, doctor, or 1-877-854-2494 immediately for further treatment advice.

**NOTES TO PHYSICIAN:**

If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K₁ intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

**NOTE TO VETERINARIAN:**

Anticoagulant Bromadiolone: For animals ingesting bait and/or showing containing signs of bleeding or elevated prothrombin times, give Vitamin K₁, if needed, check prothrombin times every 5 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

**PRECAUTIONARY STATEMENTS:**

**Hazard to Humans and Domestic Animals:**
**CAUTION:** Harmful if swallowed, harmful if inhaled. Avoid breathing dust. Causes moderate eye irritation. Keep away from children. Do not inhale dust. Do not get in eyes or on clothing.

**Environment:**
- Burns hot water. Keep and wash PPE separately from other laundry. Users should remove clothing/PPE immediately if pesticide gets inside. Remove PPE immediately after handling this product.
- If gloves or clothing/PPE become contaminated, wash clothing with detergent, hot water, and bleach, then dry thoroughly before reuse or storage. Do not resell, sell, give away, or dispose of PPE designed for use with this product without thoroughly cleaning or decontaminating.

**STORAGE AND DISPOSAL:**

Do not store in homes or human residences. Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or milk handling equipment or surfaces that come into direct contact with food. Do not broadcast bait. When used on a USDA inspected facility, this product must be applied in tamper-resistant bait stations.

Do not sell this product in individual containers holding less than 8 pounds of bait.

**SELECTION OF TREATMENT AREAS:**

Determine areas where rats, mice, or meadow voles will most likely find and consume the bait. Generally, these areas are away from walls, by gnawed openings, or or beside burrows, in corners and concealed places, between floors and walls, or in locations where rats, mice, or voles have been seen. Protect bait from rain and snow. Replace as much alternative food as possible.

**APPLICATION DIRECTIONS:**

When applying to 14 oz. per bait station (at intervals of 10 to 30 feet) per placement in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until signs of rat activity cease.

**MICE AND MEADOW VOLES:** Apply 14 to 16 oz. (1-2 level tablespoons) of bait per placement at 8 to 12 feet intervals in infested areas. Larger placements (up to 2 oz.) may be needed at points of very high activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mouse or meadow vole activity cease.

**Follow-Up:** Replace contaminated or spoiled bait immediately. Wear gloves, cover and dispose of all dead, exposed animals and leftover bait. To prevent reinestation, limit sources of rodent food, water, and harborage as much as possible. If reinestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.
