KILLS RATS & MICE
Kills Warfarin Resistant Norway Rats
All-Weather Formula
Can Be Used Indoors or Out
With Bromadiolone

KILLS RATS, MICE, AND MEADOW VOLES*

ACTIVE INGREDIENT:
Bromadiolone (CAS #28772-56-7): . . . 0.005%
OTHER INGREDIENTS†: ........... 99.995%
†Contains Denatonium Benzoate

TOTAL 100.000%

Net Weight: 18 lbs (8.2 kg)

KEEP OUT OF REACH OF CHILDREN
CAUTION

Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat
**SAFETY INFORMATION**

**FIRST AID**

**IF SWALLOWED:**
- Call a poison control center, doctor, or 1-877-854-2494, or 1-800-858-7378 immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.

**IF ON SKIN OR CLOTHING:**
- Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes.
- Call a poison control center or doctor for treatment advice.

**IF IN EYES:**
- Hold eye open and rinse slowly and gently with water for 15–20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center, doctor, or 1-877-854-2494 immediately for treatment advice.

**NOTICE TO PHYSICIAN**

If swallowed or absorbed through the skin, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K₁ intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

**ENVIRONMENTAL HAZARDS**

This product is extremely toxic to fish, birds and other wildlife. Dogs and predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply this product directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff may also be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water or surface water when disposing of equipment wash water or rinsate.

**PRECAUTIONARY STATEMENTS**

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or absorbed through the skin. Keep away from children, domestic animals and pets. Do not get in eyes, on skin or on clothing.

All handlers (including applicators) must wear shoes plus socks, and waterproof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

**USER SAFETY REQUIREMENTS**

Follow manufacturer’s instruction for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

**WARNING**

The use of this product is being restricted by Federal law to prevent the abuse of its anticoagulant properties. All handlers (including applicators) must wear shoes plus socks, and waterproof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal. Do not use in homes or human residences. Do not place near or inside ventilation duct openings. Do not broadcast bait. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.

**APPLICATION DIRECTIONS**

RATS: Place 3 to 16 bait blocks (at intervals of 15 to 30 feet) per placement in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until signs of rat activity cease.

MICE AND MEADOW VOLES: Place 1 block per placement. Space placements at 8- to 12-foot intervals in infested areas. Two blocks may be needed at points of very high activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mouse or meadow vole activity cease.

FOLLOW-UP: Replace contaminated or spoiled bait immediately. Wearing gloves, collect and dispose of all dead, exposed animals and leftover bait. To prevent reinfection, limit sources of rodent food, water, and harborage as much as possible. If reinfection does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

**NOTE TO VETERINARIAN**

If animal eats bait, call veterinarian at once. See side panels for First Aid and additional precautionary statements.

**NOTE TO RECIPIENT**

Call a poison control center or doctor for further information on health concerns and pesticide incidents.

**PRODUCT INFORMATION**

**ACTIVE INGREDIENT:** Bromadiolone (CAS #28772-56-7): 0.005% OTHER INGREDIENTS: Denatonium Benzoate TOTAL 100.000%

**KILLS RATS, MICE, AND MEADOW VOLES**

KILLS WARFARIN RESISTANT NORWAY RATS

Norway rats, roof rats, and house mice may consume a lethal dose in one night’s feeding with first dead rodents appearing four or five days after feeding begins.

**KEEP OUT OF REACH OF CHILDREN**

CAUTION:

FOR SITES, PESTS, AND APPLICATION METHODS DESCRIBED ON THIS LABEL.

**IMPORTANT:** Do not expose children, pets, or nontarget animals to rodenticides. To help to prevent exposure:

1. Store unused product out of reach of children and pets.
2. Keep bait containers closed and away from other chemicals. Do not store near or inside ventilation duct openings.
3. Dispose of product container and unused, spoiled, or unconsumed bait as specified on this label.

**NOTE TO PHYSICIAN**

If swallowed or absorbed through the skin, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K₁ intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

**TREATMENT FOR POISON PETTING**

If animal eats bait, call veterinarian at once.

**FOR ANIMALS**

- For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K₁. If needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

**FOLLOW-UP:**

- Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

**NOTE TO RECIPIENT**

Call a poison control center or doctor for further information on health concerns and pesticide incidents.

**NOTE TO PHYSICIAN**

If swallowed or absorbed through the skin, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K₁ intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.
