PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals
CAUTION: Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Keep away from children, domestic animals and pets. Do not get in eyes, on skin, or on clothing.

All handlers (including applicators) must wear long pants, shoes, socks, and waterproof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

User Safety Requirements
Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exists, use detergent and hot water. Wash and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

ENVIRONMENTAL HAZARDS
This product is toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ THIS LABEL: Print this entire label and follow all use directions and use precautions. Use only for sites, pests, and application methods described on this label. IMPORTANT: Do not expose children, pets, or nontarget animals to rodenticides. To help prevent exposure:
1. Store unused product out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. It can be shaken from bait stations when they are filled. Units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to hosted livestock, saccos, bears, or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container and unused, spotted, or unconsumed bait as specified on the label.

NOTICE TO PHYSICIAN
If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K1 intravenously or orally. Repeat as necessary based on monitoring of prothrombin times.

NOTE TO VETERINARIAN
Anticoagulant Diphenacrine: For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K1.

TREATMENT FOR PET POISONING
If an animal eats this bait, call a veterinarian or 1-877-854-2494 at once.

TREATMENT FOR CHILD POISONING
If an animal eats this bait, call a veterinarian or 1-877-854-2494 at once. Do not induce vomiting in children or pets. DO NOT give the patient anything to eat or drink.

FIRST AID
If Swallowed:
• Call a poison control center, doctor, or 1-877-854-2494 immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.

If Inhaled:
• Remove to fresh air.

If Skinned:
• Wash the skin with soap and water.

If Contacted:
• Wash exposed portions with soap and water.

IF SYMPTOMS OR EFFECTS ARE NOT IMPROVING, OR IF SYMPTOMS OR EFFECTS ARE SEVERE, CALL A PHYSICIAN OR POISON CENTER IMMEDIATELY.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait.

Do not sell this product in individual containers holding less than 4 pounds of bait.

SELECTION OF TREATMENT AREAS:
Determine areas where rats, mice, or meadow voles* will most likely feed and consume the bait. Generally, these areas are along walls, by gnawed openings, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain and snow.

APPLICATION DIRECTIONS:

• Rate: Apply to 3 to 16 one-coua black bait blocks per placement in infested areas. Space placements at intervals of 15 to 30 feet. Maintain a constant supply of fresh bait for 10 days or until there no longer are signs of new feeding by rats.

When baiting sewers, securely attach one end of the wire to each block and the other end to a stationary structure such as the bottom step of a manhole ladder or a sewer grate. Allow just enough wire for the block to rest on manhole bottom. If this is not possible, suspend each block a few inches above the high water mark or secure block on a board supported by opposing steps of the ladder. Securing blocks in this manner will reduce chances that they will be removed by rats or water. Use 3 to 16 blocks per manhole, depending upon the apparent intensity of rat activity. Maintain an uninterrupted supply of fresh bait for at least 10 days or until there are no signs of new feeding by rats.

• Rice and Meadow Voles*: Apply 1 block bait per typical placement in infested areas. Space placements at 1 to 2 foot intervals. Two blocks may be needed at points of very high activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mice or meadow voles* activity cease.

Follow-up:
Replace contaminated or spoiled bait immediately. Wear waterproof gloves, collect and properly dispose of all visible dead animals and leftover bait. To discourage reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed.

DIRECTIONS FOR USE (Continued from other panel)

Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used whenever children, pets, non-target mammals, or birds may have access to the bait placement location.

USE RESTRICTIONS: This product may only be used to control the following rodent pests in and around man-made structures: House mouse (Mus musculus), Norway rat (Rattus norvegicus), Roof rat (Rattus rattus), Cotton rat* (Sigmodon hispidus), Eastern harvest mouse* (Reithrodontomys hudsonicus), Golden mouse* (Ochrotomys nutalli), Polynesian rat* (Rattus exulans), Meadow vole* (Microtus pennsylvanicus), White-throated woodrat* (Neotoma albigula), Southern plains woodrat* (Neotoma micropus), and Mexican woodrat* (Neotoma lepida). This product must be used in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commercial rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port or terminal buildings and related structures around and associated with these sites. Fence and perimeter baiting, beyond 100 feet in a structure as defined above, is prohibited. This product must not be applied directly to food feed crops.

Baiting with TOMCAT® All-Weather Bait Chunks is prohibited.

Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surface that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait.

• Application methods:
  • Broadcast bait.
