FIRST AID

Have Label when給予ing Advice

If Swallowed: • Call a poison control center, doctor, or 1-877-684-3949 immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by the poison control center or doctor.

If on Skin: • Wash with plenty of soap and water.

NOTE TO PHYSICIAN

If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If promptly, administer Vitamin K₁ (phytomenadione) or orally. Repeat as necessary based on monitoring of prothrombin time.

TREATMENT FOR PET POISONING

If an animal eats this bait, call a veterinarian or 1-877-684-3949 at once.

NOTE TO VETERINARIAN

Anticoagulant Diphacinone: For animals ingesting bait and/or showing pressing signs (bleeding or elevated prothrombin time), give Vitamin K₁.

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals

CAUTION: Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Keep away from children, domestic animals and pets. Do not get in eyes, on skin, or on clothing.

All handlers (including applicators) must wear long pants, shoes, socks, and a protective glove. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

User Safety Requirements

Follow manufacturer’s instruction for cleaning/cleaning/merging PPE. If no such instructions for washable exists, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

ENVIRONMENTAL HAZARDS

This product is toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water or to areas where surface water is present or to terrestrial areas below the mean high water mark. Runoff also might be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinse.

APPLICATION DIRECTIONS:

Break and apply 4 to 16 pieces of bait per placement (usually at intervals of 10 to 30 feet). Maintain a constant supply of fresh bait for 10 days or until sign of rat activity ceases. Place bait stations 8 to 12 foot intervals. Two-1 oz. pieces may be needed at points of entry. Use one-1 oz. piece per bait placement. Space placements at 8 to 12 foot intervals. Two-1 oz. pieces may be needed at points of entry.

Storage and Disposal

Do not contaminate water, food or feed by storage or disposal. Store in a cool, dry place inaccessible to children and pets. Follow manufacturer’s instruction for cleaning/maintaining PPE. If no such instruction, follow local instructions. Wash water, food or feed contaminated as much as possible. If contamination does occur, repeat treatment. For continuous infestation, set up permanent bait stations and replenish bait as needed.
