Mikroklene

Directions For Sanitizing Food Contact Surfaces

1. Remove gross food particles by prescrape, presoak, when necessary, and a presoak treatment.
2. Wash in a solution of 1/2 oz. Mikroklene per 2 1/2 gals. water 1/4 1/2 1 1/2 ppm titratable iodine. Apply with cloth, mop or Mikro-Spray. Allow surfaces to remain wet for 10 minutes then wipe dry. When amber color of solution fades noticeably, mix a fresh solution.
3. Rinse with clean water.
4. Sanitize in a solution of 1/4 oz. Mikroklene per gallon of tepid (75°-100°F) water (75 ppm titratable iodine). Apply with cloth, mop or Mikro-Spray. Renew solution daily or before amber color disappears. Do not use on silver or silverplate. May cause blackening.
5. Drain and air dry.

NOTE: Dilution table

Directions for Mikroklene Food Contact Surface Sanitizer

- Use to sanitize previously cleaned, hard, nonporous food contact surfaces. Use 1/2 oz. Mikroklene per 2 1/2 gals. of 75-100 deg. F water (75 ppm titratable iodine). Apply with cloth, mop or Mikro-Spray.
- Renew solution daily or before amber color disappears. Do not use on silver or silverplate. May cause blackening.
- Keep out of reach of children.
