PRECAUTIONARY STATEMENTS

FIRST AID

If inhaled:

If swallowed:

If on skin or clothing:

OTHER RECOMMENDATIONS

SURFACE DISINFECTANT

To disinfect inanimate, hard non-porous surfaces add one 0.5 oz. premeasured packet of product or measure powder at the following use dilutions:

PRECAUTIONS:

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Contact your local state or federal environmental regulator to ensure proper use and disposal.

WARNING: This product is designed to provide both general cleaning and disinfection. It is a phosphate-free formulation designed to provide effective cleaning, deodorizing, and disinfecting specifically for hospitals, long-term care facilities, nursing homes, and other institutions where housekeeping is of prime importance in controlling the hazard of cross-contamination.

KILLS HIV-1, HBV and HCV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS

This product has been shown to inactivate HBV, HCV, HIV-1, and influenza A virus and is expected to inactivate all Influenza A viruses, including pandemic swine flu. This broad-spectrum activity is attributable to the product’s amine-based quaternary ammonium compounds. This product is recommended for use to disinfect inanimate, hard non-porous surfaces of the equipment with a cloth, sponge, hand pump trigger sprayer or by immersion. Thoroughly wet all surfaces to be disinfected, then allow to remain in place 10 minutes. For heavily soiled, hard, non-porous surfaces, use a cloth, sponge, or hand pump trigger sprayer so as to wet all surfaces thoroughly. Allow to remain in place 10 minutes, then rinse the treated surface with potable water and let air dry prior to storage. The product is effective on plastic, and in most cases, it can be used on a broad range of non-porous surfaces.

IREB and RED EMBED

A product using the same primary active ingredient as the Powdered Detergent/Disinfectant is being actively marketed by a number of different companies. When purchasing items, ask your local supplier for information on the product, including the level of formaldehyde that is present. The level of formaldehyde that is present must be less than 0.005% to meet federal regulations. Please contact your local supplier for information on the Powdered Detergent/Disinfectant and the active ingredient of the product you wish to purchase.
