This state of the art, non-chlorine phenolic germicide is a sterile, ready-to-use product specifically developed to be both hard water and aerosol effective in a contaminated system for use on hard, nonporous critical environmental surfaces found in food processing, medical, industrial, aircraft, marine, and railroad business. Use this product as a baseline for non-environmental surfaces such as floors, walls, counters, floors, walls, and other equipment in food processing preparation and finishing facilities in contact with food, and animal husbandry, poultry and feed processing facilities, veterinary clinics, animal research facilities, pharmaceuticals, medical devices, and food-related facilities.

Germicidal: The 1:250 (one half ounce per gallon) solution passes the A.O.A.C. Germicidal Test in 1 minute, 10 minutes, and 60 minutes, when diluted with 400 ppm A.O.A.C. hard water in the presence of 5% organic soil (serum). 10 minutes at 90°F. BROAD SPECTRUM DATA: The following organisms also pass the A.O.C. Aseptic Dilution Test at 1:1000, 1:500, and 1:500, when diluted with 400 ppm A.O.A.C. hard water in the presence of 5% organic soil (serum). 10 minutes at 90°F.

Chlorine: Sodium hypochlorite 5% solution is used at 1:500 dilution (one half ounce per gallon). Solution in 400 ppm A.O.A.C. hard water in 5 minutes at 90°F. Although efficacy of 1 minute contact time has been shown to be adequate against H1N1 virus, this time interval may be sufficient for other organisms. Use a 1-minute contact time for disinfection against all of the organisms shown.

Kills Pandemic 2009 H1N1 influenza A virus formerly called swine flu.

Germicide: Provides effective killing of food poisoning bacteria while simultaneously chemically neutralizing their activity.

HAZARD TO HUMANS AND DOMESTIC ANIMALS: Cautionary. Causes irreversible eye damage. Causes skin burns. Harmful if swallowed. Do not get in eyes, on skin or on clothing. Wear protective gloves, irritant protective clothing and gloves. Wash hands thoroughly with soap and water after handling. Remove contaminated clothing and skin before washing.

DIRECTIONS FOR USE:

1) It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. CLEANING AND DISINFECTING WASHABLE, NON-POROUS SURFACES: To make solution, add 1/8 oz. (16 oz. or 1/2 cup) of the solution to 1 gal. of water. Pour into bucket and use for wiping down surfaces. Wear protective gloves and irritant protective clothing and gloves. Thoroughly wash all area of the surface with a detergent solution. Rinse with clean water. Disinfect by applying a 1:100 dilution (1/2 oz. per gallon) of the solution for 5 minutes, rinse with clean water.

TECHNICAL DIFFICULTIES:

In the event of any difficulties, please return the enclosed trouble sheet to Steris. A representative from Steris will contact you regarding your concerns.
