Controls bacteria, fungi, and algae in industrial cooling water systems and auxiliary water and waste water systems; controls slime-forming bacteria and fungi in industrial air-washer systems.

FOR INDUSTRIAL USE ONLY

Active Ingredient(s): 2,2-Dibromo-3-nitropropionamide
Inert Ingredient(s):

Net Contents: 25 Tablets
Net Wt: 5 kg/11.023 lb
Lot No:

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with the labeling.

INDUSTRIAL COOLING WATER SYSTEMS

Note: Tablets wrapped in water soluble packaging are ready for use and should not be removed from protective film. To prevent corrosion, place a tablet of Nalco 2840 in the heater provided (or equivalent) and suspend float in the water so the tablet is completely submerged. Additional holders may be obtained from Nalco Company. Nalco 2840 is best used in the basin of the cooling water system. Avoid areas of high velocity water flow, Avoid placing Nalco 2840 in direct sunlight.

To control bacteria, fungi, and algae in clean to moderately contaminated systems, add one tablet per 500-1,000 gallons of water in the system. Heavily contaminated systems may require two tablets per 500-1,000 gallons of water.

EACH TABLET OR GROUP OF TABLETS OF NALCO 2840 WILL PROVIDE APPROXIMATELY 3 WEEKS OF CONTROL. Add additional tablet(s) of Nalco 2840 per 500-1,000 gallons of water in the system every three weeks, or as needed to maintain control.

AUXILIARY WATER AND WASTE WATER SYSTEMS

Note: Tablets wrapped in water soluble packaging are ready for use and should not be removed from protective film. Place tablets in holder provided or equivalent. Holders prevent direct contact with metal surfaces and keep tablets near the surface allowing easy observation. Additional holders may be obtained from Nalco Company.

Nalco 2840 controls odor-forming and slime-forming bacteria, fungi, and algae in auxiliary water systems such as fire protection systems; pump or screw type water and waste material disposal; holding or recovery systems such as storage tanks, storage piles, associated piping, settling ponds or lagoons; transport spills or canals; and disposal wells. Nalco 2840 should be added to the system at a rate of one tablet per 500-1,000 gallons of water in the system. Each tablet will provide approximately 3 weeks of control per 500-1,000 gallons of water.

INDUSTRIAL AIR-WASHER SYSTEMS

Use only in industrial air washer systems that maintain effective mist eliminators.

Note: Tablets wrapped in water soluble packaging are ready for use and should not be removed from protective film. Place tablets in holder provided or equivalent. These holders prevent direct contact with metal surfaces and keep tablets near the surface allowing easy observation. Additional holders may be obtained from Nalco Company.

For control of slime-forming bacteria and fungi, add one to two tablets per 500 gallons of water in the system, depending on the severity of the contamination. Each tablet or group of tablets will provide approximately 3 weeks of control. Badly fouled systems must be cleaned before treatment is begun.
