FIBERGLASS BOTTOMKOTE® RACING BRONZE Y999

PRODUCT DESCRIPTION: FIBERGLASS BOTTOMKOTE® RACING BRONZE Y999 combines season-long protection against fouling organisms with a hard, smooth racing finish. FIBERGLASS BOTTOMKOTE® RACING BRONZE Y999 uses an acrylic resin to provide ease of application and a hard finish that is compatible with most other types of antifouling paints. It also can be hauled out and trailed (on a short term basis) without losing its antifouling capability. FIBERGLASS BOTTOMKOTE® RACING BRONZE Y999 can also be used as a primer and furnished to provide an even smoother surface for racing sailboats or powerboats. FIBERGLASS BOTTOMKOTE® RACING BRONZE Y999 is for use below the waterline on fiberglass, wood and properly primed underwater metal boat hulls and parts (except aluminum). FIBERGLASS BOTTOMKOTE® RACING BRONZE Y999 is effective in fresh or low foulant saltwater on barnacles, and zebra mussels.

DIRECTIONS FOR USE:
It is a violation of federal law to use this product in a manner inconsistent with its labeling.

COMPATIBILITY: FIBERGLASS BOTTOMKOTE® RACING BRONZE Y999 can be applied over most other hard thinners. However, it is important that these coatings lie in excellent condition, well adhered to the hull and any foul or flaking paint must be removed. Soft antifouling paints must be removed.

V.O.C.: Less than 600 grams/liter

THINNER: Interox® Special Thinner 216

Interox® Brush-Ease 433

THINNING: Thin only if necessary. Maximum 10%.

CLEAN UP: Interox® Special Thinner 216

Interox® Brush-Ease 433

THEORETICAL COVERAGE: 300 sq. ft./gal. yields 1 mil D.T.

DRY TIMES: Touch Dry 1 hour minimum.

17°F (25°C) 2 hours minimum.

Launch 2 hours minimum 60 day maximum.

*Under good drying conditions paint may be oversprayed after 2 hours, however it is best to allow an overnight dry to assure complete solvent evaporation. Lower temperature results in longer dry and launch times.

APPLICATION TEMPERATURES: 50°F (10°C) and above (air and hull).

APPLICATION SYSTEMS

PREVIOUSLY PAINTED SURFACES - Good Condition: Remove all traces of loose paint and contamination by sanding the entire surface well with 80-120 grit production paper, wipe surface clean. Apply two coats of bottom paint.

Poor Condition: Completely remove all old paint with Interox® Interspar 298E for fiberglass, Interox® Interspar 298E for wood and by sandblasting steel surfaces to a near white metal. Proceed with application system for bare wood as described below.

BARE FIBERGLASS - No Sand System: Wash entire surface thoroughly with Interox® FiberglassSolvent Wash 202, changing rags frequently. Before liquid dries, wipe clean with a dry cloth. (Be sure all wax and other contaminants are removed). Repair imperfections with Interox® Waterville YAV135; sand and wipe clean. Apply a thin continuous coat of Interox® Fiberglass No Sand Primer YPA690 with brush or roller. Do not spray, do not sand. Allow to dry between 2-3 hours - no more. Apply two coats of bottom paint.

Sanding System: Wash entire surface thoroughly with Interox® Fiberglass Solvent Wash 202, changing rags frequently. Before liquid dries, wipe clean with a dry cloth. (Be sure all wax and other contaminants are removed). Repair imperfections with Interox® Waterville YAV135; sand and wipe clean. Sand entire gritted well with 80-120 grit production paper until flat, matte finish is obtained; wipe surface clean. Apply two coats of bottom paint.

BARE WOOD: Sand entire surface thoroughly in a smooth finish with 80 grit production paper; wipe surface clean. Repair imperfections with Interox® Waterville YAV135; sand and wipe clean. Apply first coat of bottom paint reduced with Interox® Special Thinner 216 (10% maximum) to penetrate the porous grain. Paint seams with Interox® Seam Compound 30. Apply sealer and three coats of bottom paint immediately.

BARE STEEL: Sandblast surface to a near white metal, remove dust residue with broom and air hose. Within three hours of blasting apply the first coat of Interox® 2000/2001E. If application of Interox® 2000/2001E cannot be applied within one hour after blasting, apply one thin continuous coat of Interox® YPA590 with brush or roller. Do not sand or spatter. Allow to dry between 2-3 hours - no more. Apply two coats of bottom paint.

Color difference may occur between actual paint and color swatch on front of can.

PRECAUTIONARY STATEMENTS

WARNING

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Causes eye irritation. Harmful if swallowed or absorbed through skin. Avoid contact with skin, eyes or clothing. When protective clothing such as gloves, long-sleeved cotton shirt, long pants, and hat. May be lethal if ingested. Do not breathe vapor or spray mist. Wear proper protective clothing, as required, and avoid breathing spray mist. Do not contaminate clothing, food, or water. Wash hands after eating, drinking, chewing gum, using tobacco or using the toilet.

FIRST AID

If Swallowed:

• Call a poison control center or doctor immediately for treatment advice.

• Have person sip a glass of water if able to swallow.

• Do not induce vomiting unless told to do so by a poison control center or doctor.

• Do not give anything by mouth to an unconscious person.

If on skin or clothing:

• Take off contaminated clothing.

• Wash skin immediately with plenty of water for 15-20 minutes.

• Call a poison control center or doctor for treatment advice.

If inhaled:

• Move person to fresh air.

• Hold person open and rinse slowly and gently with water for 15-20 minutes.

• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

• Call a poison control center or doctor for further treatment advice.

ENVIRONMENTAL HAZARD

This material is toxic to fish. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during painting to enter water. Dispose of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans and other waters unless in accordance with the requirements of a National Permit Discharge Elimination System (NPDES) permit and the permitting agency has been notified in writing prior to discharge. Do not discharge effluent in sewer system without previously notifying the local storage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

Flammable. Keep away from heat and open flame.

STORAGE AND DISPOSAL

Do not contain water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticides are toxic. Paint that cannot be used according to label instructions must be disposed of according to Federal, State or local procedures under the Resources Conservation and Recovery Act.

CONTAINER DISPOSAL: Dispose of container by triple rinsing and recycling or puncturing and disposing in a sanitary landfill or by other approved state and local procedures. Do not burn contents or allow to become a solid.

FOR CHEMICAL EMERGENCY, SPILL, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL FREE - DAY OR NIGHT - CHEMTREC: 1-800-424-8000. MEDICAL ADVISORY NUMBER - CONTACT YOUR LOCAL POISON CONTROL CENTER OR 1-800-855-6613.
