STORAGE AND DISPOSAL

STORAGE
Store below freezing temperatures. Prolonged storage may result in foaming. Warning and application will retain material to avoid contact. If heat will exceed 25°F in any container, the label closed. Do not incorporate water used for flood by storage or disposal. This product interacts generation of seed potatoes.

DISPOSAL
Disposal methods are specific. Improper disposal of excess hazardous material. Do not remove any container that contains packaging material.

CONTAINER DISPOSAL
Hazardous waste: 1 gal, 200 gal, or nonhazardous container. Do not use or recondition for the disposal of equipment manufacturing equipment.

SHELF LIFE
SHELF LIFE 2 EC is applied at a 1% active ingredient level on wash and damp dried potatoes. The diluted material should be applied into the application equipment. Do not apply more than 1 application of 0.0104 pound of chlorpropham per 1000 pounds of potatoes.

APPLICATION

SHELF LIFE 2 EC is applied at a 1% active ingredient level on wash and damp dried potatoes. The diluted material must be applied at the proper amount of material across the entire area of potatoes. Each application can be ineffective. The following examples are listed below. Pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to the container label or by use of the appropriate methods for guidance.
