ACTIVE INGREDIENTS:
5-Chloro-2-methyl-4-isothiazolin-3-one .............................................. 1.11%
2-Methyl-4-isothiazolin-3-one ............................................................... 0.39%
INERT INGREDIENTS .............................................................................. 98.50%
TOTAL .................................................................................................... 100.00%

KEEP OUT OF REACH OF CHILDREN
DANGER

FIRST AID
IF ON SKIN: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 min. Call a poison control center or doctor for treatment advice.
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes then continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poisonous control center or doctor.
Have person sip a glass of water if able to swallow. Do not give anything to an unconscious person.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsion maybe necessary.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER:
CORROSIVE. Causes irreversible eye damage and skin burns. May cause allergic skin reaction. Harmful if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or on clothing. Mixers, loaders and other exposed to this product must wear: long-sleeved shirt and long pants; chemical resistant gloves such as nitrile or butyl rubber; shoes plus socks; goggles and face shield; and chemical resistant apron. Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not re-use them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Users should wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly. This product may cause skin sensitization reactions in some people.

ENVIRONMENTAL HAZARDS
This product is toxic to aquatic plants, fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewers without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of waste. Apply this pesticide only as specified on this label.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For the control of microbial biofilm bacteria, algae, and fungi, add WCS 102 microbicide to: Industrial process water systems, industrial recirculating water cooling towers, industrial recirculating closed loop water cooling systems, brewery pasteurizers, can warmers, retort water systems, industrial scrubbing systems, evaporative condenser water systems, hydrostatic sterilizer water systems, air conditioner/refrigeration condensate water systems, coal slurry systems and influent water filtration system. Add WCS 102 microbicide at some point in the system to insure uniform mixing.

INDUSTRIAL RECIRCULATING WATER COOLING TOWERS
For the control of bacteria, algae and fungi add WCS 102 to industrial recirculating water cooling towers. Add WCS 102 at some point in the system to insure uniform mixing. Initial Dose: When the system is noticeably fouled, apply 148-883 ppm WCS 102 (1.26-7.46 pounds or 19-113 fluid ounces of WCS 102 per 1,000 gallons of water in the system). Repeat until control is achieved. Badly fouled systems should be cleaned before treatment is begun.
Subsequent Dose: When microbial control is evident, add 35-219 ppm WCS 102 (0.3-1.86 pounds or 4.5-28 fluid ounces of WCS 102 per 1,000 gallons of water in the system) weekly or as needed to maintain control.
AIR WASHER T EEMS
Add to the al or sump or chill water sump to insure uniform mixing. 35-883 ppm WCS T2 (0.3-7.46 pounds or 5-124 fluid ounces of WCS T2 per 1,000 gallons of water in the system) depending upon the severity of contamination to control microbial biofilm bacteria, fungi and algae which cause fouling in industrial air washer systems.

INTERMITTENT OR SLUG METHOD
Initial Dose: When the system is noticeably fouled, apply 148-883 ppm WCS T2 (1.26-7.46 pounds or 21-124 fluid ounces of WCS T2 per 1,000 gallons of water in the system). Repeat until control is achieved.

Subsequent Dose: When microbial control is evident, add 35-218 ppm WCS T2 (0.3-1.86 pounds or 5-31 fluid ounces of WCS T2 per 1,000 gallons of water in the system) weekly or as needed to maintain control. Badly fouled systems should be cleaned before treatment is begun.

CONTINUOUS FEED METHOD
Initial Dose: When the system is noticeably fouled, apply 148-883 ppm WCS T2 (1.26-7.46 pounds or 21-124 fluid ounces of WCS T2 per 1,000 gallons of water in the system).

Subsequent Dose: Maintain this treatment level by adding a continuous feed of 35-218 ppm WCS T2 (0.3-1.86 pounds or 5-31 fluid ounces of WCS T2 per 1,000 gallons of makeup water). Badly fouled systems must be cleaned before initial treatment.

NOTE: For use only in systems that maintain effective mist eliminating components.

OIL FIELD INJECTION WATERS
For the control of microbial biofilm-forming and sulfate-reducing bacteria in oil and gas field water systems, including enhanced recovery injection fluids, drilling, fracturing and completion fluids, slug treat with 0.7-3.02 ppm WCS T2 microbicide depending on the severity of contamination.

Initial Dose: Add 166-332 ppm WCS T2 (6.0-13.9 gallon or 58.0-116.8 pound WCS T2 per 1000 barrel of water) at a point in the system where it will be uniformly mixed. Repeat treatment after three days or as needed until control is achieved.

Subsequent Dose: Add 67-166 ppm WCS T2 (2.8-6.7 gallon or 23.5-58.0 pound WCS T2 per 1000 barrel of water) every seven days or as needed to maintain control.

INDUSTRIAL RECIRCULATING CLOSED LOOP WATER COOLING SYSTEMS
For the control of bacteria, algae or fungi, add WCS T2 industrial recirculating closed loop water cooling system. Add WCS T2 at some point in the system to insure uniform mixing.

Initial Dose: When the system is noticeably fouled, apply 148-883 ppm WCS T2 (1.26-7.46 pounds or 21-124 fluid ounces of WCS T2 per 1,000 gallons of water in the system). Repeat until control is achieved. Badly fouled systems should be cleaned before treatment is begun.

Subsequent Dose: When microbial control is evident, add 35-218 ppm WCS T2 (0.3-1.86 pounds or 5-31 fluid ounces of WCS T2 per 1,000 gallons of water in the system) weekly or as needed to maintain control.

STORAGE AND DISPOSAL
PESTICIDE STORAGE: Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Do not apply this product in a way that will contact workers or other persons.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide or residue is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill the container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recup. Shake for 10 seconds. Pour rinse into application equipment or mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration or by approved state and local authorities.

General: CONSULT FEDERAL, STATE OR LOCAL DISPOSAL AUTHORITIES FOR APPROVED ALTERNATIVE PROCEDURES.

Conditions of Sale and Warranty: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label only when used in accordance with label directions under normal conditions of use. SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTIES EITHER OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE. Handling, storage, and use of the product by Buyer or User are beyond the control of Seller. Risks such as ineffectiveness or other unintended consequences resulting from, but not limited to, failure to follow directions will be assumed by the Buyer or User. IN NO CASE WILL SELLER BE HELD LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE HANDLING, STORAGE OR USE OF THIS PRODUCT.
