Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use mild soap and rinse items thoroughly. Do not reuse them.

Mixers, loaders, applicators, and other handlers must wear the following:
- long-sleeve shirt
- long pants
- shoes plus socks

Causes moderate eye irritation. Avoid contact with eyes or clothing. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

CAUTION:

User Safety Recommendations:
- If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
- If partly filled: Place in trash or offer for recycling if available.
- If product is being taken from storage, label with original label or a substitute label containing all of the required information.

STORAGE AND DISPOSAL
- Do not apply using a high pressure hand-wand or hand-held fogger in enclosed spaces.
- Not for use in or around floor holes, drain, sink, sump, or cesspool.
- Avoid applying near electrical appliances.
- Do not apply near electrical equipment due to the possibility of shock hazard.

Entry Restrictions:
- Except when applying to dogs, foals, horses and livestock, do not allow others to enter treated area during treatment, for at least 3 hours following application. Defer treatment of pregnant or nursing animals or animals on medication. During the flea season, retreat any animal that shows signs of sensitivities.
- If inhaled, remove victim to fresh air and call a physician for advice.
- If skin sensitivity occurs, bathe your pet. If signs of sensitivity occur, bathe your pet with milk, baking soda, or mild soap and rinse with large amounts of water. Consult a veterinarian before using this product on debilitated, aged, sick or pregnant animals, or animals on medications. Apply on healthy skin. Do not spray into eyes or face. Avoid contact with eyes, mouth, and genitalia. Sensitivities may occur after repeated exposure. For maximum results, a combination of spot treatment and surface spraying is recommended.

HORSE AND LIVESTOCK SPRAY:
- To kill flies, horseflies, deer flies, stable flies, face flies, tsetse flies, mosquitoes, gnats, and blood sucking lice on livestock.
- For livestock the product may be applied to the legs and under body. Use a stiff brush to get the spray to the base of the hair. Repeat every 2-3 weeks as required.

EFFECTIVE, FAST-ACTING, READY TO USE INSECTICIDE

FOR MULTI-SPECIES USE**
- KILL: Head lice, larynx mites, red mites, scabies, mites, spiders, insects, beetles, and silverfish in homes, buildings, boats, trucks, and vehicles.
- Efficacy: Mosquitoes, ticks, lice, and fleas may be controlled for at least 24 hours when applied directly to the animal as a spray. For maximum results, a combination of spot treatment and surface spraying is recommended.

HOMES AND UNSTOCK SPRAY:
- To kill flies, horseflies, deer flies, stable flies, face flies, tsetse flies, mosquitoes, gnats, and blood sucking lice on premises and on dogs. Effective, fast-acting insecticide.
- For household use a coarse wet spray. Direct the spray into cracks and crevices. Treat areas where insect pests are found or are likely to be found. If spraying a room with high ceilings and large surfaces, first apply a fine mist and then a coarse spray. Be sure to change nozzle and return to fine mist to cover ledges and corners.

For indoor surface spraying:
- Insecticides are not effective in areas that are far from the mixing point. Always check for complete and thorough coverage. For best results, remove or cover decorative drapes, moldings, windows and door frames and canopies that obstruct the spray pattern. Areas of the animal treated should be placed in animal quarters following treatment. Thoroughly spray infested areas, including cracks and crevices, along and behind baseboards, under bookcases, around the legs and under body, around and between the legs, in the ears, under the feet, along the legs, under the tail, neck, and other parts of the body. For pets, use a stiff brush to get the spray to the base of the hair. Repeat every 2-3 weeks as needed.

For outdoor spraying:
- For maximum control of insects, a combination of spot treatment and surface spraying is recommended.

DOG AND FOAL INSECTICIDE USE:
- To kill flies, horseflies, deer flies, stable flies, face flies, tsetse flies, mosquitoes, gnats, and blood sucking lice on dogs. Effective, fast-acting insecticide. Apply with conventional sprayers or a cloth. To protect beef cattle, chicken, turkeys, and sheep, use a fine mist with a single nozzle. For treatment of dogs, apply a fine mist to the legs and under body. Use a stiff brush to get the spray to the base of the hair. Repeat every 2-3 weeks as required.

INDOOR SPRAY:
- For indoor surface spraying:
- For outdoor spraying:

PISTOL-MOUNTED SPRAY:
- To control flies, horseflies, deer flies, stable flies, face flies, tsetse flies, mosquitoes, gnats, and blood sucking lice on livestock. Effective, fast-acting insecticide. Apply with conventional sprayers or a cloth. To protect beef cattle, chicken, turkeys, and sheep, use a fine mist with a single nozzle.

FOR HOME USE:
- To kill flies, horseflies, deer flies, stable flies, face flies, tsetse flies, mosquitoes, gnats, and blood sucking lice on premises and on dogs. Effective, fast-acting insecticide.
- For indoor use a coarse wet spray. Direct the spray into cracks and crevices. Treat areas where insect pests are found or are likely to be found. If spraying a room with high ceilings and large surfaces, first apply a fine mist and then a coarse spray. Be sure to change nozzle and return to fine mist to cover ledges and corners.
