EMISSIONS: POOL SANITIZER
When used as directed, this product meets an effective chlorinating disinfecting pool. The slow dissolving product requires sufficient chlorination to reduce the growth of harmful algae and organisms and to prevent algae growth.

STORAGE AND DISPOSAL:
This pesticide is toxic to fish and aquatic life. When disposing of this product, follow the directions on the product’s label. If the product is discarded, it may decompose this product and cause a violent reaction leading to fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water. When using automatic feeding devices, always follow manufacturer’s directions as to the proper addition of sanitizer products to chlorinators. Use eye or mouth, if possible. Call poison control center or doctor for treatment advice.

IN CASE OF UNPLANNED CHEMICAL EXPOSURE;
This product may be used in plastic skimmers only if skimmer and piping between skimmer and pump are plastic. Do not add other chemicals through the skimmer. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. May generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water. When using automatic feeding devices, always follow manufacturer’s directions as to the proper addition of sanitizer products to chlorinators. Use eye or mouth, if possible. Call poison control center or doctor for treatment advice. 

FIRST AID: IF IN EYES:
This pesticide is toxic to fish and aquatic life. When disposing of this product, follow the directions on the product’s label. If the product is discarded, it may decompose this product and cause a violent reaction leading to fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water. When using automatic feeding devices, always follow manufacturer’s directions as to the proper addition of sanitizer products to chlorinators. Use eye or mouth, if possible. Call poison control center or doctor for treatment advice. 

IN CASE OF INGESTION:
This pesticide is toxic to fish and aquatic life. When disposing of this product, follow the directions on the product’s label. If the product is discarded, it may decompose this product and cause a violent reaction leading to fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water. When using automatic feeding devices, always follow manufacturer’s directions as to the proper addition of sanitizer products to chlorinators. Use eye or mouth, if possible. Call poison control center or doctor for treatment advice. 

IF ON SKIN OR CLOTHING:
This pesticide is toxic to fish and aquatic life. When disposing of this product, follow the directions on the product’s label. If the product is discarded, it may decompose this product and cause a violent reaction leading to fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water. When using automatic feeding devices, always follow manufacturer’s directions as to the proper addition of sanitizer products to chlorinators. Use eye or mouth, if possible. Call poison control center or doctor for treatment advice. 

IF INHALED:
This pesticide is toxic to fish and aquatic life. When disposing of this product, follow the directions on the product’s label. If the product is discarded, it may decompose this product and cause a violent reaction leading to fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water. When using automatic feeding devices, always follow manufacturer’s directions as to the proper addition of sanitizer products to chlorinators. Use eye or mouth, if possible. Call poison control center or doctor for treatment advice. 

IMPORTANCE OF GOOD HYGIENE:
This pesticide is toxic to fish and aquatic life. When disposing of this product, follow the directions on the product’s label. If the product is discarded, it may decompose this product and cause a violent reaction leading to fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water. When using automatic feeding devices, always follow manufacturer’s directions as to the proper addition of sanitizer products to chlorinators. Use eye or mouth, if possible. Call poison control center or doctor for treatment advice.

NOTE:
This pesticide is toxic to fish and aquatic life. When disposing of this product, follow the directions on the product’s label. If the product is discarded, it may decompose this product and cause a violent reaction leading to fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water. When using automatic feeding devices, always follow manufacturer’s directions as to the proper addition of sanitizer products to chlorinators. Use eye or mouth, if possible. Call poison control center or doctor for treatment advice.

SWIMMING POOL SANITIZER
When used as directed, this product is an effective chlorinating disinfecting agent. The slow dissolving product requires sufficient chlorination to reduce the growth of harmful algae and organisms and to prevent algae growth.

DIRECTIONS FOR USE:
When used as directed, this product is an effective stabilized chlorinating disinfecting agent. This product can be used in feed mechanisms such as automatic chlorinators and floaters as a maintenance treatment. Fill unit dosing mechanism as needed. Check and refill chlorinator as needed. Do not let this product come in direct contact with vinyl liners or other bleachable surfaces as damage may occur.

WHEN USED IN AUTOMATIC CHLORINATORS AND FLOATERS:
This product can be used in dosing mechanisms to maintain a consistent level of active chlorine in the pool water. When using automatic feeding devices, always follow manufacturer’s directions as to the proper addition of sanitizer products to chlorinators. Use eye or mouth, if possible. Do not add this product to any dosing device containing remnants of any other product. Such use may cause a violent reaction leading to fire and explosion.

WHEN USED IN SKIMMERS:
This product may be used in plastic skimmers only if skimmer and piping between skimmer and pump are plastic. Do not add other chemicals through the skimmer.

NOTE:
Buyer assumes all responsibility for safety and use not in accordance with directions.

ENVIRONMENTAL HAZARDS:
This pesticide is toxic to fish and aquatic life. When disposing of this product, follow the directions on the product’s label. If the product is discarded, it may decompose this product and cause a violent reaction leading to fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water. When using automatic feeding devices, always follow manufacturer’s directions as to the proper addition of sanitizer products to chlorinators. Use eye or mouth, if possible. Call poison control center or doctor for treatment advice.

IN CASE OF UNPLANNED CHEMICAL EXPOSURE:
This pesticide is toxic to fish and aquatic life. When disposing of this product, follow the directions on the product’s label. If the product is discarded, it may decompose this product and cause a violent reaction leading to fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water. When using automatic feeding devices, always follow manufacturer’s directions as to the proper addition of sanitizer products to chlorinators. Use eye or mouth, if possible. Call poison control center or doctor for treatment advice.
