This product is a phosphate-free, pH neutral formulation designed to provide effective cleaning, disinfection, deodorizing, and degreasing. It is useful in food processing plants where housekeeping is of prime importance in controlling cross-contamination from human operators to food surfaces. Use on kitchen equipment and food preparation areas. It is useful for cleaning and disinfecting hard, non-porous surfaces such as stainless steel, metal, interior metal, plastic, glass, porcelain, glazed ceramics, painted surfaces, and tiles. Use in patient care areas. This product is intended to provide good general cleaning and disinfection, but cannot replace the action of specific disinfectants, such as bleach, used in situations where they are most effective.

**DIRECTIONS FOR USE**

**To disinfect hospital rooms, care for newborns and children:**

1. Use at a rate of 1 oz./1000 sq. ft. of living area and make the solution at 1:100 dilution. May be applied by spraying or by using a cleaning mop with disinfecting solution.
