Water Additive for Pathogen* Reduction in Fruit and Vegetable Processing Water and Controlling the Growth of Spoilage and Decay Causing Non-Public Health Organisms on Fruit and Vegetable Surfaces

FOR COMMERCIAL USE

STRONG OXIDIZING AGENT

DIRECTIONS FOR USE

1. Dilute Tsunami 100 in water to obtain a concentration of a minimum of 30-80 ppm peroxyacetic acid. At this use dilution, 16.4 gallons of Tsunami 100 will be required to treat 100 gallons of process water. This will produce about 30-80 ppm peroxyacetic acid. Measure the residual peroxyacetic acid concentration in the water using a Test Kit (consult Ecolab Representative) and adjust dose as needed. Allow a 1.5 minute rinsing time.

2. Add Tsunami 100 at a rate from 2.5-6.7 fluid ounces per 100 gallons of process water. This will produce about 50-125 ppm peroxyacetic acid. Add 100 gallons of process water. The fruits and vegetables can be sprayed or continuously to produce about 36 - 575 ppm total product and about 5 - 30 ppm peroxyacetic acid. Measure the residual peroxyacetic acid concentration in the water using a Test Kit (consult Ecolab Representative) and adjust dose as needed. Allow a 1.5 minute rinsing time.

3. Measure the residual peroxyacetic acid concentration in the water using a Test Kit (consult Ecolab Representative) and adjust dose as needed. Allow a 1.5 minute rinsing time.

4. Hold eye open and rinse slowly and gently with water for 15 - 20 minutes. Remove contact lenses, if present, after the first 5 minutes. Continue rinsing eye. Call a poison control center or doctor for treatment.

5. For treatment of seedborne microorganisms that cause spoilage and decay causing non-public health organisms on fruits and vegetables.

For Home or Institutional Use

For home or institutional use, Tsunami 100 can be used on the following types of fresh, fruit排除和 safety information. This is to ensure that all users are aware of the potential hazards associated with the use of the product. If the product is not used correctly, it can lead to health risks and environmental damage. It is important to follow the instructions and guidelines provided by the manufacturer and regulatory authorities to ensure safe and effective use.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Do not puncture or incinerate containers. Do not incinerate or burn in a disposable incinerator. Store in a cool, dry place out of reach of children and pets.

STORAGE & DISPOSAL

Do NOT CONTAMINATE WATER, FOWL OR FERTILIZER STORAGE PESTICIDE STORAGE Pesticide storage facilities should be located out of reach of children and pets. It is important to follow the instructions and guidelines provided by the manufacturer and regulatory authorities to ensure safe and effective use.

For more information on the safety and storage of Tsunami 100, please refer to the product label or contact the manufacturer or regulatory authority for guidance.

The following information is provided for guidance:

- The product is not intended for use in domestic or institutional settings.
- The product is not intended for use in agricultural settings.
- The product is not intended for use in residential settings.
- The product is not intended for use in commercial settings.
- The product is not intended for use in institutional settings.
- The product is not intended for use in home settings.
- The product is not intended for use in any setting.
