**PRODUCT NAME**: KILL+ZONE®

**ACTIVE INGREDIENTS**:
- (2-methylprop-1-enyl)cyclopropanecarboxylate
- Tetramethrin (1-cyclohexene-1,2-dicarboximido) methyl

**OTHER INGREDIENTS**:
- MAGENTA
- YELLOW
- Other ingredients: Contains Petroleum Distillate. Vomiting may cause aspiration pneumonia.

**ENVIRONMENTAL HAZARDS**:
- **INDOOR USE**: For Residential Use Only
- **OUTDOOR APPLICATIONS**: Remaining application requirements.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS & DOMESTIC ANIMALS**

**CAUTION**
- Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.
- **FIRST AID**
  - IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
  - IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
  - IF INHALED: Move victim to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a poison control center or doctor for further advice.
  - IF SWALLOWED: Get medical help or call a poison control center immediately. Do not induce vomiting. Rinse mouth and drink 1-2 glasses of milk or water. Call a poison control center or doctor for further advice.

**OTHER INGREDIENTS**:
- **ACTIVE INGREDIENTS**:
  - (2-methylprop-1-enyl)cyclopropanecarboxylate
  - Tetramethrin (1-cyclohexene-1,2-dicarboximido) methyl

**CAUTION/ADVERTENCIA**
- Do not make applications during rain. Do not water the treated area. Do not allow adults, children or pets to enter treated areas until sprays have dried. Wait two (2) hours after application, then open windows, vents and doors for 2 hours. If an odor is still detected, additional ventilation is required. Do not allow the product to enter any drain during or after application.

**FOR CONTROL OF WASPS, BEES, HORNETS AND YELLOW JACKETS**:
- The best time to spray the nest is in the early morning or early evening, when air temperature is cooler and most insects are in the nest and little activity is observed around the nest opening. Spray only if the air is still. Stand a safe distance from the nest, not directly under it. Hold container upright at arm’s length, point the actuator at the nest and spray in the opening of the nest first. Then spray the rest of the nest until it is saturated. Treated insects may fall out of the nest and die. Any insects returning to the nest after treatment will be killed. Wait 48 hours before removing the nest. Foliation of desirable plants that were contacted with spray should be hosed off. Other than applications to building foundations, up to a maximum height of three feet, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors and eaves) are limited to spot and crack-and-crevice applications only.

**STORAGE & DISPOSAL**
- Do not contaminate water, food or feed by storage or disposal.
- **PESTICIDE STORAGE**:
  - Store in a cool, dry area away from heat or open flame.
