SHAKE AND SOFT SERVE MACHINES CLEANING PROCEDURE
FOR COMMERCIAL USE
DIRECTIONS FOR USE

1. Remove mix from the machine. If local health codes permit rerun, place mix in sanitized rerun container and store in refrigerated cooler.

2. In a clean sink, prepare a sanitizing solution of Triplet Plus (100 parts per million available chlorine).

3. Rinse thoroughly with clean hot water.

4. Drain the solution from the machine. Turn machine to the "Off" position.

5. Drain the solution from the machine. Turn machine to the "Off" position.

6. Remove and completely disassemble all machine parts (doors, blades, pump, etc.).

7. Brush wash all disassembled parts in a suitable detergent in a clean sink.

8. Remove parts and allow to air dry.

9. Flood the surface with the sanitizing solution, or apply with a clean cloth, sponge, or spray, making sure to completely sanitize parts by immersing for at least 1 minute in a fresh solution in the cylinder, reactivate the "Wash" cycle and allow to remain on for five minutes.

10. Remove parts and allow to air dry. Follow local health ordinance.

NOTE:
Consult local ordinances for possible variation in procedures.
