INERT INGREDIENTS
- dimethyl benzyl ammonium chlorides ............0.105%
- ethylbenzyl ammonium chlorides .............0.105%
- n-Alkyl (68% C12, 32% C14) dimethyl
- n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18)

CLEANER (on hard inanimate surfaces)
NET CONTENTS: 128 FL OZ (1 US Gallon)

TUBERCULOCIDAL
U.S. Patent No. 5,444,094

Sani-Cide is designed specifically as a general non-acid cleaner and disinfectant for use in homes, hospitals, nursing homes, schools, transportation terminals, office buildings, manufacturing facilities, retail businesses and athletic/recreational facilities where housekeeping is of prime importance in controlling the hazard of cross-contamination. It is formulated to disintegrate hard, non-porous, inanimate environmental surfaces, floors, walls, metal surfaces, stainless steel surfaces, glazed porcelain, glazed ceramic tile, plastic surfaces, bathroom stalls, showers, bathtubs, and cabinets. For plastic and painted surfaces, spot test on an inconspicuous area before use. May be used in the kitchen on counters, sinks, appliances and stove tops. A rinse with potable water is required for surfaces in direct contact with food. In addition, this product disinfects those areas which generally are hard to keep from smelling, such as garbage storage areas, empty garbage bins and cans, basements, restrooms and other areas which are prone to odors caused by microorganisms.

DISINFECTANT, DEODORIZING AND CLEANING
Remove filth or heavy soil prior to application of this product. Hold container six to eight inches from surface to be treated. Spray until area is covered with the solution. Allow product to penetrate and the surface to remain wet for 3 minutes (for Bloodborne Pathogens) before allowing to remain wet for HIV-1 1 minute and for HBV and HCV 5 minutes. May be used in the kitchen on counters, sinks, appliances and stove tops. A rinse with potable water is not necessary. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco.
