ENVIRONMENTAL HAZARDS
This pesticide is toxic to aquatic plants, fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARD
This product is corrosive to mild steel.

STORAGE AND DISPOSAL
PROHIBITIONS: This product (pH 3.0) is corrosive to mild steel.

PESTICIDE STORAGE: Do not store or transport in unlined metal containers. Do not contaminate food or feed by storage, disposal or cleaning of equipment.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Plastic nonrefillable container: Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or by incineration or, if allowed by state and local authorities, by burning. If burned, stay outside of smoke. Do not reuse this container to hold materials other than pesticides or dilute pesticides (rinsate). After emptying and cleaning, it may be allowable to temporarily hold rinsate or other pesticide-related materials in the container. Contact your state regulatory agency to determine allowable practices in your state.

GENERAL: CONSULT FEDERAL STATE OR LOCAL DISPOSAL AUTHORITIES FOR APPROVED ALTERNATIVE PROCEDURES.

CONDITIONS OF SALE AND WARRANTY
Thor GmbH warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label only when used in accordance with label directions under normal conditions of use. THOR GMBH MAKES NO OTHER EXPRESS OR IMPLIED WARRANTIES EITHER OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE. Handling, storage and use of the product by Buyer or User are beyond the control of Thor GmbH and Seller. Risks such as ineffectiveness or other unintended consequences resulting from, but not limited to, failure to follow label directions will be assumed by the Buyer or User. IN NO CASE WILL THOR GMBH OR SELLER BE HELD LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE HANDLING, STORAGE OR USE OF THIS PRODUCT.

PIECEMENT: Tox 1 (3:1), 8 (6:1), PG-II

LIQUID, TOXIC, N.O.S. (mixture containing 5-Chloro-2-methyl-4-isothiazolin-3-one and 2-Methyl-4-isothiazolin-3-one (3:1)), 8 (6:1), PG-II

ACTICIDE® 14

ACTIVE INGREDIENTS:
5-Chloro-2-methyl-4-isothiazolin-3-one...... 10.60%
2-Methyl-4-isothiazolin-3-one................... 3.50%
OTHER INGREDIENTS:............................................. 85.90%
TOTAL:............................................................. 100.00%

ACTICIDE® 14 microbiocide weighs 10.4 lb per gallon

KEEP OUT OF REACH OF CHILDREN
DANGER - PELIGRO

See Side panel for additional precautionary statements

FIRST AID

If in Eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If Swallowed:
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Call a poison control center or doctor immediately for treatment advice.

If on Skin:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor.

If Inhaled:
- Remove person from exposure.
- If person is not breathing, call 911 or an ambulance, mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

Note to physician: Probable mucosal damage may contraindicate the use of gastric lavage.

EPA Reg. No. 67071-5
EPA Est. No. 67071-DEU-001
Manufactured By: Thor GmbH
D-67346 Speyer, Germany Tel. (06232) 6360
U.S. Office: Thor Specialties, Inc.
50 Waterview Drive; Shelton, CT 06484 Tel. (203) 516-6980

Precautionary Statements:
Hazards to Humans and Domestic Animals

DANGER
Corrosive. Causes irreversible eye damage and skin burns. May be fatal if swallowed or absorbed through skin. Harmful if swallowed. Do not get in eyes, on skin or on clothing. Do not breathe vapor or spray mist. Avoid contact with skin. Prolonged or frequently repeated skin contact may cause allergic reaction in some individuals. Remove contaminated clothing and wash before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE): Mixers, loaders, and others exposed to methylisothiazolinone must wear:
- Coveralls over long-sleeved shirt and long pants
- Socks and chemical resistant footwear
- Goggles or face shield
- Chemical-resistant gloves (such as rubber or made out of any waterproof material)
- A respirator with an organic-vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-23C), or a canister approved for pesticides (MSHA/NIOSH approval number prefix TC-14G), or NIOSH approved Respirator with an organic (OV) cartridge or canister with any R, P, or HE prefilter.
- In addition, mixers and loaders and persons cleaning equipment must wear a chemical-resistant apron.

Follow manufacturer’s instructions for cleaning/ maintaining PPE.
If there are no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations: Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly. Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Industrial microbiocide for use in metal working fluids, metal cleaning fluids, hydraulic fluids, dispersed pigments, adhesives and tackifiers, wood and wood products, paints and coatings, building materials, polymer latices, "aqueous compositions, liquid household, consumer, industrial, janitorial products, semi-solid/solid household, consumer, industrial, janitorial products, oil field injection waters, "paper slime control, recirculating water cooling towers, "air washer systems, recirculating closed loop water cooling systems, "brewery pasteurizer and can warmer systems, "Ultra filtration units, "industrial wastewater treatment systems and sewage systems and fuels. READ AND FOLLOW THE DIRECTIONS FOR USE ON THE ACCOMPANYING INFORMATION SHEET.

*Not approved for these uses in the State of California

UN 2922, CORROSIVE

Batch: Mfg Date: Net Contents (pounds): (gallons):
**METAL WORKING FLUIDS:**

ACTICIDE® 14 microbiocide is recommended for the control of bacteria and fungi in soluble and emulsifiable type aqueous metal working fluid solutions and emulsions.

The preservative should be dispensed into the use dilution of the metal working fluid using a metering pump and uniformly dispersed throughout the system.

A higher dosage rate and/or increased frequency of treatment may be required depending upon the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

<table>
<thead>
<tr>
<th>For a noticeably fouled system:</th>
</tr>
</thead>
<tbody>
<tr>
<td>7 to 16 FL OZ (0.6 to 1.3 LB) per 1000 GAL of emulsion. (55 to 125 ppm ACTICIDE® 14)</td>
</tr>
<tr>
<td>Repeat until control is achieved.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>When control is evident:</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.5 FL OZ (0.3 LB) per 1000 GAL of emulsion every 4 weeks. (27 ppm ACTICIDE® 14)</td>
</tr>
</tbody>
</table>

**METAL CLEANING FLUIDS:**

ACTICIDE® 14 microbiocide is recommended as a preservative for use in the manufacture and use of alkaline, acid and emulsion based metal cleaning fluids typically used in electroplating, phosphatizing, galvanizing and general metal cleaning operations.

The preservative should be dispensed into the use dilution of the metal cleaning fluid using a metering pump and uniformly dispersed throughout the system.

A higher dosage range and/or increased frequency of treatment may be required depending on the rate of dilution of the preservative with the make up fluid, the nature and severity of the contamination, level of control required, filtration effectiveness, system design, etc.

<table>
<thead>
<tr>
<th>For direct addition to a fouled system:</th>
</tr>
</thead>
<tbody>
<tr>
<td>7.2 to 29 FL OZ (0.6 to 2.3 LB) per 1000 GAL of use-dilution metal cleaning fluid every 3-4 weeks to provide 56 to 225 ppm product</td>
</tr>
</tbody>
</table>

**CONCENTRATES:**

For addition to a metal cleaning concentrate, add ACTICIDE® 14 microbiocide at a level to ensure that the final use-dilution fluid will contain 56 to 225 ppm product.
### WATER-BASED HYDRAULIC FLUIDS:

ACTICIDE® 14 microbiocide is recommended as a preservative for use in the manufacture and use of high water-based hydraulic fluids and invert emulsion hydraulic fluids typically prepared by emulsifying 40% by volume water in 60% by volume of mineral oil using an oil soluble emulsifying agent.

A higher dosage range and/or increased frequency of treatment may be required depending upon rate of dilution of the preservative with make-up fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

<table>
<thead>
<tr>
<th>For a noticeably fouled system:</th>
<th>15 to 25 FL OZ (1.2 to 2.0 LB) per 1000 GAL of fluid (117 to 195 ppm ACTICIDE® 14) every 8 weeks to be followed by subsequent maintenance dosage</th>
</tr>
</thead>
<tbody>
<tr>
<td>For non-fouled system maintenance:</td>
<td>12 to 15 FL OZ (1.0 to 1.2 LB) per 1000 GAL of fluid every 8 weeks (94 to 117 ppm ACTICIDE® 14)</td>
</tr>
</tbody>
</table>

### DISPERSED PIGMENTS AND *COLORANTS:*

ACTICIDE® 14 microbiocide is recommended for the control of bacteria and fungi in the manufacture and storage of dispersed pigments such as kaolin clay, montmorillonite clay, titanium dioxide, calcium carbonate, calcium sulfate, barium sulfate, magnesium silicate and kieselguhr used in paint and paper productions coatings.

**SUPPLEMENTAL DOSING:**

Depending on the nature/severity of the contamination, if analysis indicates a loss of active ingredient(s) and further microbial control is necessary, product may be dosed with additional ACTICIDE® 14 microbiocide at a level to ensure that the final use-dilution product will not exceed the maximum concentration indicated (225 ppm ACTICIDE® 14).

*Not approved for this use in the State of California.*

### ADHESIVES AND TACKIFIERS:

ACTICIDE® 14 microbiocide is recommended as an in-container preservative for the control of bacteria and fungi in water soluble and water dispersed adhesive such as animal glues, vegetable glues, natural rubber latices, polyvinyl acetate, styrene-butadiene and acrylic latices. ACTICIDE® 14 microbiocide is recommended as a preservative for tackifiers derived from rosin and hydrocarbon resins.

A higher dosage rate providing up to 45 ppm active ingredients may be required for storage during extremely high temperatures and humidity.

| 0.006 – 0.0225% | 0.06 – 0.225 LB per 1000 LB fluid |
| 25 – 102 grams per 454 kg fluid | (60 to 220 ppm ACTICIDE® 14) |
| 0.006 – 0.022% | 0.06 – 0.22 LB per 1000 LB fluid |
| 25 – 102 grams per 454 kg fluid | (60 to 220 ppm ACTICIDE® 14) |
WOOD AND WOOD PRODUCTS:

ACTICIDE® 14 is recommended for the protection of wood and wood products such as landscape timbers, fences, posts, pilings, cross ties, decks and similar exterior structures, from mold and mildew. Treat pressure-treatment solution in the pressure treating process for mold and mildew control.

Under extreme mildew conditions, ACTICIDE® 14 may be used up to a maximum concentration of 343 ppm product (33 fluid ounces ACTICIDE® 14 per 1000 gallons of treatment solution).

This application will afford protection up to 12 weeks and during repeated use of solution.

ACTICIDE® 14 may be used at higher concentrations so long as the end-use product/article contains a maximum concentration of 343 ppm ACTICIDE® 14.

*For the control of blue stain, mold and decay of freshly cut lumber and logs:

Treat lumber immediately after it is sawn. Freshly dipped or sprayed lumber must be protected from rain. Dip tanks and drip aprons must be roofed, paved and drained to prevent dilution and loss of stain solution. Antistain treatment concentrations must be geared to achieve protection of the thickest or most valuable item being treated. The concentration of the ready-to-use antistain solution must be adjusted to accommodate seasonal changes in the exposure and species being treated. Dip tanks and spray equipment and metering equipment must be properly maintained.

Lumber and logs must be totally immersed or sprayed to ensure all surfaces are treated. Ensure good mixing prior to and during the treatment process.

*Not approved for this use in the State of California.
### PAINTS AND COATINGS:

<table>
<thead>
<tr>
<th>ACTICIDE® 14 microbiocide is recommended as an in-container preservative for the control of bacteria and fungi in water based coatings such as paper and wood coatings and paints used for architectural product finishes and special purpose coatings.</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

### SPECIFICALLY AS A WOOD COATING:

<table>
<thead>
<tr>
<th>Specific as a wood coating, ACTICIDE® 14 is recommended for the protection of wood and wood products such as landscape timbers, fences, posts, pilings, cross ties, decks and similar exterior structures, from mold and mildew. As a pressure treatment for mold and mildew control for southern yellow pine, hemlock, ponderosa pine and other soft woods. Thoroughly wet and allow to dry.</th>
</tr>
</thead>
<tbody>
<tr>
<td>A single application will afford protection for 12 weeks.</td>
</tr>
</tbody>
</table>

### UNDER EXTREME MILDWE CONDITIONS:

<table>
<thead>
<tr>
<th>ACTICIDE® 14 may be used at higher concentrations so long as the end-use product/article contains a maximum concentration of 330 ppm ACTICIDE® 14.</th>
</tr>
</thead>
</table>

### SPECIAL PURPOSE COATING USES

Use as a preservative for:

- Electrodeposition paints or solutions
- Photo/photoplating solutions or coatings
- Fount (or fountain) solutions used in the printing process as a maintenance fluid/coating and as a special coating for printing plates.

The application/addition directions for these special purpose coating uses are:

### ELECTRODEPOSITION

ACTICIDE® 14 microbiocide is recommended as a tankside additive for the control of bacteria, fungi, and algae in re-circulating electrodeposition systems and associated rinse systems. Alternately, ACTICIDE® 14 microbiocide may be added through the components of the electrodeposition paint prior to their addition to the electrodeposition system.
**ACTICIDE® 14**

**INFORMATION SHEET**

**THIS ACTICIDE® 14 INFORMATION SHEET MUST ACCOMPANY EACH SHIPMENT OF ACTICIDE® 14**

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

---

**Tankside Addition to Electrodeposition Systems:**

ACTICIDE® 14 microbiocide should be dispensed into the recirculating rinse system, ultrafilter permeate, or final distilled rinse system at a point to insure uniform mixing.

A change of frequency of treatment may be required depending on the rate of dilution of the preservative with the makeup fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

*Not approved for this use in the State of California*

---

**TREATMENT OF ELECTRODEPOSITION PAINT COMPONENTS**

**Initial Dose of Paint Components:**

ACTICIDE® 14 microbiocide should be added to the resin, pigment, or other component of the electrodeposition paint at a level to ensure that the final use-dilution fluid will contain 35 to 245 ppm product.

*Not approved for this use in the State of California*

---

**Supplemental Tanked Dosing of Electrodeposition System:**

If additional microbial control is necessary, ACTICIDE® 14 microbiocide may be added to the electrodeposition system tankside to supplement the microbiocide incorporated through paint components.

*Not approved for this use in the State of California*

**NOTE:** To ensure uniform mixing, add ACTICIDE® 14 microbiocide to latex or solution slowly with agitation. The actual concentrations required will depend upon such factors as the specific substance to be treated, frequency of repeated microbial contamination expected and level of protection required.
**PHOTOPLATE PROCESSING, FOUNTAIN SOLUTIONS, AND INK/INK COMPONENTS**

ACTICIDE® 14 microbiocide is recommended for the control of bacteria and fungi in photoplate processing such as stabilizer solutions and in fountain solutions. ACTICIDE® 14 is recommended for water-based printing inks such as flexographic, gravure, screen and ink jet types. ACTICIDE® 14 is recommended for the control of bacteria and fungi in printing ink components such as resins, plasticizers, water soluble dyes, pigments, gelling agents, waves, surfactants, and thickeners.

A level adjustment may be necessary to accommodate slight changes in solution formulations.

**CONCENTRATES:**

ACTICIDE® 14 should be added to concentrates at a level to ensure that the final use dilution of the product will contain 0.035% ACTICIDE® 14.

To ensure uniform mixing add ACTICIDE® 14 microbiocide to the product slowly with agitation.

*Not approved for this use in the State of California*

**BUILDING MATERIALS:**

ACTICIDE® 14 microbiocide is recommended as an in-container preservative for the control of bacteria and fungi in building materials such as mastics, caulks, joint cements, concrete admixtures, spackling and grouting.

<table>

</tr>
</tbody>
</table>

(100 to 350 ppm ACTICIDE® 14)

(50 to 225 ppm ACTICIDE® 14)
**LATICES, POLYMER EMULSIONS OR SOLUTIONS:**

ACTICIDE® 14 microbiocide is recommended for the control of bacteria and fungi in the manufacture and storage of synthetic and natural polymer latices including: acrylics, styrene-butadiene, carboxylated styrene-butadiene, ethylene-vinyl acetate and biopolymers intended for industrial use such as xanthan gum, gum arabic, guar gum, protein derived polymers, starches and casein derived polymers.

**CONCENTRATES:**

ACTICIDE® 14 microbiocide may be added to the above products formulated as concentrates which are in turn diluted for use at a level to ensure that the final use-dilution product will not exceed the concentration indicated.

**SUPPLEMENTAL DOSING:**

Depending on the nature/severity of the contamination, if analysis indicates a loss of active ingredient(s) and further microbial control is necessary, product may be dosed with additional ACTICIDE® 14 microbiocide at a level to ensure that the final use-dilution product will not exceed the maximum concentration indicated (225 ppm ACTICIDE® 14).

**AQUEOUS COMPOSITIONS:**

ACTICIDE® 14 microbiocide is recommended as an in-container preservative for the control of bacteria and fungi in aqueous products such as:

- fiberglass sizing solutions
- aqueous emulsions and dispersions including
  - stabilized oil/water emulsions
  - surface preparation compounds
  - foam control products
  - nutrient solutions
  - pesticide formulations.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

 LIQUID HOUSEHOLD, CONSUMER, INDUSTRIAL, JANITORIAL PRODUCTS

For the control of bacteria and fungi in liquid soaps, liquid cleaners, liquid detergents, liquid laundry products, liquid dishwashing detergents, waxes, polishes, liquid fabric treatment/refresher products, liquid air fresheners/deodorizers, car care products, and other similar cleaners. ACTICIDE® 14 may also be used for the control of bacteria and fungi in package utility products such as pre-moistened sponges and mops. ACTICIDE® 14 may also be used for the control of bacteria and fungi in solutions that are then put into/onto wet wipes for use in industrial, commercial, residential and household uses cited above. Wet wipes containing a solution preserved with this product may not be used for personal care, as baby wipes, or for food contact.

CONCENTRATES:

ACTICIDE® 14 microbiocide may be added to those products formulated as concentrates which are in turn diluted for use at a level to ensure that the final use-dilution product will contain between 40 to 160 ppm ACTICIDE® 14 microbiocide.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

*ULTRA FILTRATION UNITS, such as REVERSE OSMOSIS SYSTEMS

ACTICIDE® 14 microbiocide is recommended for the control of bacteria and fungi in ultra filtration units, such as reverse osmosis systems.

Add into industrial ultra filtration or reverse osmosis systems by either continuous feed or periodic injection. Compatibility of ACTICIDE® 14 microbiocide with reverse osmosis membranes should be confirmed with membrane manufacturers.

For the control of bacteria and fungi in carbon beds.

For periodic membrane cleaning.

Badly fouled systems should be cleaned before treatment is begun.

*Not approved for this use in the State of California

1 – 35 ppm ACTICIDE® 14

0.04 – 0.10 LB per 120 GAL of cleaning solution

*INDUSTRIAL WASTEWATER TREATMENT SYSTEMS AND SEWAGE SYSTEMS:

ACTICIDE® 14 microbiocide is recommended for the control of microbial biofilms, bacteria, fungi, and algae in industrial waste water treatment and sewage systems. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority.

INITIAL DOSE:

When the system is noticeably fouled, apply ACTICIDE® 14 as indicated. Repeat until control is achieved. Badly fouled systems should be cleaned before treatment is begun.

SUBSEQUENT DOSE:

When microbial control is evident, add ACTICIDE® 14 weekly or as needed to maintain control.

*Not approved for this use in the State of California

0.13 – 0.78 LB or 2 – 12 FL OZ per 1000 GAL of water in the system (15.5 to 93 ppm ACTICIDE® 14)

0.03 – 0.2 LB or 0.45 – 3 FL OZ per 1000 GAL of water in the system (3.5 to 23 ppm ACTICIDE® 14)
ACTICIDE® 14
INFORMATION SHEET

THIS ACTICIDE® 14 INFORMATION SHEET MUST ACCOMPANY EACH SHIPMENT OF ACTICIDE® 14

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**FUELS AND OILS:**

ACTICIDE® 14 is recommended for the control of bacteria and fungi in the following liquid hydrocarbon fuels and oils: crude oils, aviation fuels, kerosene, heating oils, diesel fuels, residual fuel oils, coal slurries, liquefied petroleum gases and petrochemical feedstocks. ACTICIDE® 14 is recommended for REFINERY AND TERMINAL USE ONLY. ACTICIDE® 14 should be directly dispensed into a fuel tank, storage tank or a flowing stream of fuel in a manner to ensure uniform distribution of the preservative in the fuel system. Slug dose or continuous feed methods are recommended.

A shock dose of up to 42 gallons of ACTICIDE® 14 per 1 million gallons of fluid is recommended in the case of extreme contamination. Grossly contaminated systems should be physically cleaned to remove debris.

FOR USE IN AVIATION FUEL, THE FEDERAL AVIATION ADMINISTRATION MUST BE CONSULTED AS TO THE ACCEPTABILITY OF THE ADDITIVE FOR USE IN SPECIFIC ENGINES AND/OR AIRCRAFT.

**For a noticeably fouled system:**

11 to 21 GAL per 1 million GAL of fluid.

(11 to 21 ppm ACTICIDE® 14)

Repeat until control is achieved.

**Maintenance dose:**

5 – 16 GAL per 1 million GAL of fluid

(5 to 16 ppm ACTICIDE® 14)

Repeat every 4 – 6 weeks or when microbial contamination is detected.
