ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and wildlife. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the treating plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARD: This product (pH 3.12) is corrosive to mild steel.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage and disposal. PESTICIDE STORAGE: Keep container tightly closed. Protect from freezing. Store in a dry place. Do not store at elevated temperatures.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous and/or toxic. Improper disposal of excess pesticide or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL
Non-refillable container. Do not reuse or refill this container. Triple rinse for guidance. This pesticide is toxic to fish and wildlife. It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Industrial microbiocide for use in adhesives, *tackifiers, paints, coatings, building materials, polymer latices, printing inks, and * aqueous dispersions, *fiberglass sizings, *dispersed pigments, household consumer, industrial, janitorial products.

*Not approved for these uses in the State of California

READ AND FOLLOW THE DIRECTIONS FOR USE ON THE ACCOMPANYING INFORMATION SHEET.

UN 3265, CORROSIVE LIQUID,
ACIDIC, ORGANIC, N.O.S. (mixture containing 5-Chloro-2-methyl-4-isothiazolin-3-one and 2-Methyl-4-isothiazolin-3-one (3:1), 8, PG-II

ACTICIDE® LA 1209

ACTIVE INGREDIENTS:
2-Bromo-2-nitropropane-1, 3-diol .................. 8.80%
5-Chloro-2-methyl-4-isothiazolin-3-one ....... 0.85%
2-Methyl-4-isothiazolin-3-one .................. 0.28%

INERT INGREDIENTS: ............................. 90.07%

TOTAL: .................................................. 100.00%

KEEP OUT OF REACH OF CHILDREN DANGER

SEE SIDE PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS

FIRST AID

If in Eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If Swallowed:
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.

If on Skin:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment.

If Inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give
  artificial respiration, preferably mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

Note to physician: Probable mucosal damage may contraindicate the use of gastric lavage.

HOT LINE NUMBER: In case of emergency, for additional information call toll free 1-800-424-9300. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

Precautionary Statements:
Hazard to Humans and Domestic Animals
DANGER

CORROSIVE. CAUSES IRREVERSIBLE EYE DAMAGE OR SKIN BURNS. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or on clothing. Do not breathe mist. Wear a minimum of a NIOSH approved particulate filtering facepiece respirator with any N, R, or P filter; OR a NIOSH approved elastomeric particulate respirator with any N, R, or P filter; OR a NIOSH approved powered purifying respirator with HE filters. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Prolonged or frequently repeated skin contact may cause allergic reaction in some individuals. Remove and wash contaminated clothing before reuse.

Personal Protective Equipment (PPE):
- Coveralls over long-sleeved shirt and long pants
- Socks and chemical resistant footwear
- Chemical-resistant gloves (such as barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, polyvinyl chloride, or viton)
- Goggles or face shield and Chemical-resistant apron

User Safety Recommendations: Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

*Not approved for these uses in the State of California

**ACTICIDE® LA 1209 INFORMATION SHEET**

**THIS ACTICIDE® LA 1209 INFORMATION SHEET MUST ACCOMPANY EACH SHIPMENT OF ACTICIDE® LA 1209**

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

| PRESERVATIVE FOR ADHESIVES AND *TACKIFIERS*:
| ACTICIDE® LA 1209 microbiocide is recommended as an in-container preservative for the control of bacteria and fungi in water soluble and water dispersed adhesives such as animal glues, vegetable glues, natural rubber latices, polyvinyl acetate, styrene-butadiene and acrylic latices. *ACTICIDE® LA 1209 microbiocide is recommended as a preservative for tackifiers derived from rosin and hydrocarbon resins. A higher dosage rate providing up to 33 ppm isothiazolones and 264 ppm bronopol may be required where extended storage time is required or under conditions of high temperatures and/or humidity. *Not approved for this use in the State of California |
| **0.05% – 0.20%** |
| Add 0.5 – 2.0 lbs. per 1000 lbs. of fluid to provide 6 – 23 ppm isothiazolones and 44 – 176 ppm bronopol. |

| PRESERVATIVE FOR BUILDING MATERIALS:
| ACTICIDE® LA 1209 microbiocide is recommended as an in-container preservative for the control of bacteria and fungi in building materials such as mastics, caulks, joint cements, spackling and grouting. |
| **0.05% – 0.20%** |
| Add 0.5 – 2.0 lbs. per 1000 lbs. of fluid to provide 6 – 23 ppm isothiazolones and 44 – 176 ppm bronopol. |

| PRESERVATIVE FOR LATICIES:
| ACTICIDE® LA 1209 microbiocide is recommended for the control of bacteria and fungi in the manufacture and storage of synthetic and natural polymer latices including acrylics, styrene-butadiene, carboxylated styrene-butadiene, ethylene-vinyl acetate and biopolymers intended for industrial use such as xanthan gum, gum arabic, guar gum, protein derived polymers, starches and casein derived polymers. |
| **0.05% – 0.30%** |
| Add 0.5 – 3.0 lbs. per 1000 lbs. of emulsion to provide 6 – 33 ppm isothiazolones and 44 – 264 ppm bronopol. |

| PRESERVATIVE FOR PAINTS AND COATINGS:
| ACTICIDE® LA 1209 microbiocide is recommended as an in-container preservative for the control of bacteria and fungi in water based coatings such as paper, wood coatings and paints (including paint wash solutions) used for architectural, product finishes and special purpose coatings. A higher dosage rate providing up to 33 ppm isothiazolones and 264 ppm bronopol may be required for storage during extremely high temperatures and humidity. |
| **0.05% - 0.20%** |
| Add 0.5 – 2.0 lbs. per 1000 lbs. of fluid to provide 6 – 23 ppm isothiazolones and 44 – 176 ppm bronopol. |
| **0.05% – 6.0%** |
| Add 0.5 – 60.0 lbs. per 1000 lbs. of fluid to provide 5.5 – 660 ppm isothiazolones and 44 – 5280 ppm bronopol to concentrates of paints and coatings. |

*Not approved for this use in the State of California*

<table>
<thead>
<tr>
<th>Special Purpose Coating Uses:</th>
<th>Include use as a preservative for:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• electrodeposition paints or solutions</td>
<td></td>
</tr>
<tr>
<td>• photoelectroplating solutions or coatings</td>
<td></td>
</tr>
<tr>
<td>• fount (or fountain) solutions used in the printing process as a maintenance fluid/coating and as a special coating for printing plates,</td>
<td></td>
</tr>
<tr>
<td>• spin finish coatings for fibers.</td>
<td></td>
</tr>
</tbody>
</table>

The application/addition directions for these special purpose coating uses are:

**Electrodeposition:** ACTICIDE® LA 1209 microbiocide is recommended as a tankside additive for the control of bacteria, fungi, and *algae in re-circulating electrodeposition systems and associated rinse systems. Alternately, ACTICIDE® LA 1209 microbiocide may be added through the components of the electrodeposition paint prior to their addition to the electrodeposition system.

*Not approved for this use in the State of California.*

**Tankside Addition to Electrodeposition Systems:** ACTICIDE® LA 1209 microbiocide should be dispensed into the recirculating rinse system, ultrafilter permeate, or final distilled rinse system at a point to insure uniform mixing. When the system is noticeably fouled, add 640 to 2400 ppm ACTICIDE® LA 1209 microbiocide (6.4 to 24 gallons per 10,000 gallons of fluid in the system). Repeat until control is achieved. When microbial control is evident, add 320 to 1055 ppm ACTICIDE® LA 1209 (3.2 to 10.55 gallons per 10,000 gallons of fluid in the system) weekly or as needed to maintain the system. A change of frequency of treatment may be required depending on the rate of dilution of the preservative with the makeup fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

**Treatment of Electrodeposition Paint Components:**

Initial Dose of Paint Components: ACTICIDE® LA 1209 microbiocide should be added to the resin, pigment, or other component of the electrodeposition paint at a level to ensure that the final use-dilution fluid will contain 320 to 2400 ppm product.

Supplemental Tanked Dosing of Electrodeposition System: If additional microbial control is necessary, ACTICIDE® LA 1209 microbiocide may be added to the electrodeposition system tankside to supplement the microbiocide incorporated through paint components. If the system becomes noticeably fouled, add 640 to 2400 ppm ACTICIDE® LA 1209 microbiocide (6.4 to 24 gallons per 10,000 gallons of fluid in the system). Repeat until control is achieved. When microbial control is evident, the system can be maintained by addition of 320 to 1055 ppm ACTICIDE® LA 1209 microbiocide (3.2 to 10.55 gallons per 10,000 gallons of fluid in the system) weekly or as needed.
Ink/Ink Components, *Photoplate Processing, and *Fountain Solutions:
ACTICIDE® LA 1209 microbiocide is recommended for the control of bacteria and fungi in *photoplate processing such as stabilizer solutions and in *fountain solutions. ACTICIDE® LA 1209 microbiocide is recommended for water-based printing inks such as flexographic, gravure, screen and ink jet types. ACTICIDE® LA 1209 microbiocide is recommended for the control of bacteria and fungi in printing ink components such as resins, plasticizers, water soluble dyes, pigments, gelling agents, waves, surfactants, and thickeners. ACTICIDE® LA 1209 microbiocide should be added to achieve the recommended dosage range for ink, ink components, *fountain solutions and *photoplate processing chemicals of 0.1% to 1.0% on a total weight basis. A level adjustment may be necessary to accommodate the slight change in solution formulations.

ACTICIDE® LA 1209 may be added to products formulated as concentrates which are in turn diluted for use at a level to ensure that the final use-dilution product will contain no more than 1.0% ACTICIDE® LA 1209.

*Not approved for this use in the state of California

PRESERVATIVE FOR AQUEOUS COMPOSITIONS:
ACTICIDE® LA 1209 microbiocide is recommended as an in-container preservative for the control of bacteria and fungi in aqueous products such as aqueous emulsions and dispersions including:
- pesticide formulations
- *stabilized oil/water emulsions,
- *surface preparation compounds,
- *foam control products,
- *nutrient solutions

CONCENTRATES:
ACTICIDE® LA 1209 microbiocide may be added to those products formulated as concentrates which are in turn diluted for use at a level to ensure that the final use-dilution product will contain between 0.05% to 0.30% ACTICIDE® LA 1209 microbiocide.

*Not approved for this use in the State of California.

*FIBERGLASS SIZING SOLUTIONS:
ACTICIDE® LA 1209 microbiocide is recommended as an in-container preservative for the control of bacteria and fungi in fiberglass sizing solutions.

CONCENTRATES:
ACTICIDE® LA 1209 microbiocide may be added to those products formulated as concentrates which are in turn diluted for use at a level to ensure that the final use-dilution product will contain between 0.05% to 0.30% ACTICIDE® LA 1209 microbiocide.

*Not approved for this use in the State of California.

0.05% – 0.30%
Add 0.5 – 3.0 lbs. per 1000 lbs. of composition to provide 6 – 33 ppm isothiazolones and 44 – 264 ppm bronopol.

0.05% - 0.30%
Add 0.5 – 3.0 lbs. per 1000 lbs. of composition to provide 6 – 33 ppm isothiazolones and 44 – 264 ppm bronopol.
