apistan

anti-varroa mite strip
- kills Varroa, not the honey bee
- no-mess application

active ingredient: tau-fluvalinate
(cas # 102851-06-9) 10.25%
other ingredients: 89.75%
total: 100.00%

keep out of reach of children

caution
see side panel for additional precautions/directions

contents: 100 strips
net wt. 1 lb 5 oz (600g)

precautionary statements — hazards to humans and domestic animals — caution:
if swallowed: harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. If workers contact treated material or surfaces: pesticide residues that get on their skin may cause itching and/or irritation that can be severe and they should avoid contact with treated strips or surfaces, and they should wash the affected skin immediately if irritation begins to occur.

if in eyes: hold open eye and rinse slowly and gently with water for 15-20 minutes.
• take off any contact lenses, if present, after the first 5 minutes.

if on skin or clothing: • take off contaminated clothing. • rinse skin immediately with plenty of water for 15-20 minutes.

if ingested: • call a poison control center or doctor immediately for treatment advice. • never give anything by mouth to an unconscious person.

first aid:
call a poison control center or doctor immediately for treatment advice.

if swallowed:
• call a poison control center or doctor immediately for treatment advice. • have person sip a glass of water if able to swallow.
• do not induce vomiting unless told to do so by the poison control center or doctor. • do not give anything by mouth to an unconscious person.

if on skin or clothing:
• take off contaminated clothing. • rinse skin immediately with plenty of water for 15-20 minutes.

if in eyes:
• hold open eye and rinse slowly and gently with water for 15-20 minutes. • remove contact lenses, if present, after the first 5 minutes.

when cleaning up:
• clean clothing.
• wash gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

environmental hazards:
this product is toxic to honey bees if bees are exposed to direct application. However, dried residues of this product are non-toxic to honey bees. Limit during non-foraging periods to minimize adverse effects.

directions for use:
• use on honey supers before removing the treated strips. • apply as per directions. • after treatment, do not use beeswax for human consumption (including honeycomb, chunk honey, and wax for confectionary purposes).

storage and disposal:
• do not contaminate water, food, or feed by storage or disposal. • pesticide storage: store in a cool, dry place. keep strips in original unopened package until ready to use. the storage area must be dry, well-ventilated, and well-secured. do not store in direct sunlight. do not store unused strips in any liquid or original package. do not store unused strips near pesticides or other chemical substances that could contaminate the strips and result in bee toxicity. keep pesticide storage area clean. • pesticide disposal: for non-waste, use all material in this container by application according to label directions. if waste cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (other such programs are run by state or local governments by industry). • container handling: non-refillable container. do not reuse or refill this container. do not reuse strips. then offer for recycling if available or dispose of empty carton in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. if burned, stay out of smoke.
