PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals

CAUTION. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling.

FIRST AID
If in eyes:
Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on skin:
Wash thoroughly after handling. Wash clothing before reuse. Remove PPE immediately after handling this product. Wash the outside of PPE with soap and water for 2 minutes. Do not reuse PPE if it contains material from this product.

If swallowed:
Do not induce vomiting. Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for emergency medical treatment.

Have the product container or label with you when calling a poison control center or doctor, or going for emergency medical treatment.

Personal Protective Equipment (PPE)
Applicants and other handlers must wear:
A. Long-sleeved shirt and long pants B. Waterproof gloves C. Shoes plus socks
Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables, use:
A. Long-sleeved shirt and long pants  B. Waterproof gloves  C. Shoes plus socks

Environmental Hazards
This product is toxic to fish, aquatic invertebrates, oyster and shrimp. Drift and runoff may be hazardous to aquatic organisms in waters adjacent to treated areas. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinseout.

Storage and Disposal
Do Not Contaminate Water. Food or Feed by Storage or Disposal. Pesticide Storage: Avoid storage temperatures at or below freezing and over 100 degrees. If container is damaged or product spills, soak up product with absorbent material and dispose of in a sanitary landfill. Store in a locked storage cabinet in original container only. Pesticide Disposal: Wastes resulting from this product may be disposed of on site or at an approved waste disposal facility. Container Disposal: Non-refillable container. Do not reuse or refill this container. Clean container completely. Insect Repellent: After applying:
Encourage the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill container 1/4 full with water and recap. Shake for 10 seconds. Four minutes into application equipment or a mix tank or store rinseout for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available.

INSECT REPELLENT
For Fruits, Vegetables, and Indoor and Outdoor Ornamentals

CONCENTRATE
ACTIVE INGREDIENT
Capsaicin and other capsaicinoids*
0.00018%

OTHER INGREDIENTS
99.99982%

TOTAL
100.00 %

*Includes 0.00012% capsaicin and 0.00006% other capsaicinoids

Made From Hot Cayenne Pepper

This product contains 0.000014% lbs. of Active Ingredient per Gallon

Keep Out of Reach of Children
CAUTION

See side panel for first aid and precautionary statements.

Agricultural Use Requirements:
Use this product only in accordance with its labeling and with the Worker Protection Standard. 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements of training, decontaminating, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirement in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not allow or offer worker entry into treated areas until the restricted entry interval of 0 hours after the spray has dried.
PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated such as plants, soil, or water, or covers waterproof gloves, and shoes plus socks.

Hot Pepper Wax Insect Repellent repels Aphids, Cabbage Loopers, Beet Armyworms, Spider Mites, and Whiteflies.

Uses:
Use Hot Pepper Wax Insect Repellent to repel insects from fruit and vegetable plants, indoor/Outdoor ornamentals, and grasses. Avoid use on Variegated African Violets, Sweet Basil, Parsley, Dicentra eximia, and fruit trees when in the pink bud stage until after the petals fall.

Mixing:
Mix this product thoroughly before combining with water. When mixing solutions larger than 5 gallons, add the product to the tank before adding the water.

Rate:
Mix this product with water at the rate of 1 part Hot Pepper Wax to 32 parts water. Vary this rate according to need. If the concentration is heavy, use the double rate until the pests are controlled. Once pests are under control, reduce the rate to half for maintenance.

Application:
Apply this product using spray equipment as a foliar spray to the leaves, stems, and flowers of the plant until wet but not dripping. Good coverage of all portions of the plant will enhance repellency. Use 40 to 60 gallons per acre of the Hot Pepper Wax/water mixture (combined as discussed in the Rate section above) for row crops. Trees and ornamentals require more per acre depending on size and spacing (possibly 100 to 200 gallons per acre). Do not flood roots in soil or media. Do not apply this product through any type of irrigation system.

Do not apply when rain is expected within 24 hours. During hot and humid weather, spray plants in the evening. Avoid use when plants are stressed by drought. Discontinue use if burning occurs.

Frequency:
For best results, keep new growth coated. The repellency of this product is most effective on existing growth when applied every 7 to 14 days. However, more frequent application of up to every 3 days is appropriate when infestation is heavy. Use increased frequency only until pest numbers begin to decrease.

Restriction Use:
Do not exceed the 1:32 rate in greenhouses. Avoid use of this product if greenhouse temperature will exceed 85 °F before the product has dried. Use spray equipment that will allow spray to cover all foliage surfaces. Low pressure/high volume sprayers are most effective. Low volume applicators will require more frequent application.

33052-007A (73238) Hot Pepper Wax 08/24/10
Black Dieline

NET CONTENTS: 1 gallon (3.79 liters)
