ENVIROCIDE EFFECTIVELY KILLS HUMAN IMMUNODEFICIENCY VIRUS TYPE 1 (HIV) AND HEPATITIS B VIRUS (HBV) ON PRECLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS. IN HEALTHCARE SETTINGS OR OTHER SETTINGS IN WHICH THERE IS AN EXPECTED LIKELIHOOD OF SOILING OF NONANIMATE SURFACES/OBJECTS WITH BLOOD/BODY FLUIDS, AND IN WHICH THE SURFACES/OBJECTS CAN BE ASSOCIATED WITH THE POTENTIAL FOR TRANSMISSION OF HIV-1 AND HBV.

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 AND HBV OF SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUID:

Personal Protection: Wear appropriate barrier protection such as protective gloves, gowns, masks and eye coverings.

Cleaning Procedure: Blood and other bodily fluids must be thoroughly cleaned from surfaces and objects before disinfection with Envirocide.

Contact Time: A contact time of 2 minutes is required for HIV-1 and HBV. This contact time will not be sufficient for some of the organisms listed in the table. Refer to label for contact times against other organisms.

Infectious Materials Disposal: Cleaning materials used that may contain blood or other bodily fluids must be autoclaved and/or disposed of in accordance with local regulations for infectious materials disposal.

This product is not to be used as a terminal sterilant/high-level disinfectant on any surface or instrument that (1) is contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization/high-level disinfection.

FIRST AID

In eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on skin: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

For Chemical Emergency ONLY (spill, leak, fire, exposure or accident), call CHEMTREC at 1-800-424-9300. For all other inquiries about this product, call Metrex Customer Service at 1-800-841-1428, Monday through Friday, between 6 a.m. and 4 p.m. Pacific Time.

Take off contaminated clothing. Rinse skin with soap and water. If skin irritation occurs, rinse with water for 30 seconds. Remove and rinse instruments. Follow with appropriate cleaning and disinfection process.

For use as a virucide on non-inanimate surfaces, including HIV-1 and HBV applications:

Spray Envirocide directly onto precleaned surface, thoroughly wetting area to be treated. Allow surface to remain visibly wet for 2 minutes at room temperature (68°F/20°C).

For use as a disinfectant on non-inanimate surfaces:

Spray Envirocide directly onto precleaned surface, thoroughly wetting area to be disinfected. Allow surface to remain visibly wet for 3 minutes at room temperature (68°F/20°C) for Tuberculocidal® activity and effectiveness against Staphylococcus aureus, Pseudomonas aeruginosa, Trichophyton mentagrophytes and Salmonella enterica.

Wipe surface using a towel or allow to air dry. For use as a virucide on precleaned non-critical medical devices, instruments and implements, non-refillable container. Do not reuse or refill this container. Offer for recycling, if available.

ACTIVE INGREDIENTS:

DIsoctyl(hydroxyethoxyethyl)dimethyl benzyl ammonium chloride .................................................. 0.58% Isopropanol .......................................................... 17.20% INERT INGREDIENTS: .......................................................... 82.20% TOTAL .......................................................... 100.00%

PRODUCT DESCRIPTION:

Envirocide® is a multi-purpose disinfectant/decontaminant cleaner for use on hard, nonporous inanimate surfaces. It is useful in hospital operating rooms, dental operatory rooms, emergency departments, isolation areas, neonatal units and other critical care areas where control of cross contamination between treated surfaces is important.

Envirocide® will effectively clean and disinfect, when used as directed, such items as interior and exterior surfaces of infant incubators, bassinets, cribs and warmers, ambulance equipment, equipment surfaces, silts lamp, exam tables, gurneys, IV poles, operating light switches, exterior surfaces of anesthesia machines and respiratory therapy equipment, exterior surfaces of dental operatory rooms, stools, veterinary care surfaces, floors, walls, handrails, door knobs, bed rails, tables, chairs, launas, bathroom fixtures, exterior toilet surfaces, garbage cans, keyboards, carts, baskets, shopping carts and telephones which are made of plastic (i.e., polycarbonate, polypropylene, polychlorotrifluoroethylene), and uses listed on this label consisting of nonporous vinyl, stainless steel, painted surfaces, Pleated® filter and glass.

DIRECT USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For precleaning non-inanimate surfaces prior to disinfection:

Place cleaned instruments and implements in a container. Spray Envirocide as to thoroughly drench all instrument surfaces and allow to remain visibly wet for 30 seconds. Remove and rinse instruments. Follow with appropriate cleaning and disinfection process.

For use as a virucide on non-inanimate surfaces, including HIV-1 and HBV applications:

Spray Envirocide directly onto precleaned surface, thoroughly wetting area to be treated. Allow surface to remain visibly wet for 2 minutes at room temperature (68°F/20°C).

For use as a disinfectant on non-inanimate surfaces:

Spray Envirocide directly onto precleaned surface, thoroughly wetting area to be disinfected. Allow surface to remain visibly wet for 3 minutes at room temperature (68°F/20°C) for Tuberculocidal® activity and effectiveness against Staphylococcus aureus, Pseudomonas aeruginosa, Trichophyton mentagrophytes and Salmonella enterica.

Wipe surface using a towel or allow to air dry. For use as a virucide on precleaned non-critical medical devices, instruments and implements, non-refillable container. Do not reuse or refill this container. Offer for recycling, if available.
