With Brodifacoum

Pelleted Bait

This product may only be used inside and within 100 feet of agricultural buildings and man-made agricultural structures

Kills Warfarin Resistant Norway Rats & House Mice

Net Weight: 12 lbs (5.4 kg)

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat
**DIRECTIONS FOR USE (Continued from other panel)**

man-made agricultural structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations provided that infestations of these rodents have been confirmed. Efforts should be made to remove food trash, garbage, clutter and debris. Bait must be placed no less than 3 inches into active rat burrows. Do not broadcast bait. Do not use in homes or human residences. Do not place near or inside ventilation duct openings. Do not contaminate food, feed, feedstuffs, feed or feed handling equipment, or milk or meat handling equipment or surfaces that come in direct contact with food. Do not broadcast bait. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations. Do not sell this product in individual containers holding less than 0.5 ounces of bait.

**SELECTION OF TREATMENT AREAS:** Determine areas where rats, mice, or meadow voles will most likely feed and consume the bait. Generally, these areas are along walls, by graved openings, or in burrows, in corners and concealed places, between floors and walls, or in locations where rats, mice, or meadow voles' or their signs have been seen. Protect bait from rain and snow. Remove bait as much as possible.

**APPLICATION DIRECTIONS:**

**RATS:** Apply 5 to 10 ounces of bait (at intervals of 15 to 30 feet) per placement in infested areas. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of rat activity cease.

**MICE AND MEADOW VOLES:** Apply 1/4 to 1/2 oz. (11-2 oz.) (level tablespoons) of bait per placement at 12 to 24 feet intervals in infested areas. Larger placements (up to 2 oz) may be needed at points of very high mouse or meadow vole activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mice or meadow voles' activity cease.

**FOLLOW-UP:** Replace contaminated or spoiled bait immediately. Weighing gloves, collect and dispose of all bait, exposed animals and leftover bait. To prevent contamination, limit sources of rodent food, water and harborage as much as possible. If rat infestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CAUTION: Harmful if swallowed. Causes moderate eye irritation. Keep away from children, domestic animals and pets. Do not get in eyes or on clothing. All handlers (including application) must wear shoes plus socks, and gloves. Any person who inhales excess or unused bait following application of this product must wear gloves.

**ENVIRONMENTAL HAZARDS**

This product is extremely toxic to mammals and birds. Dogs, cats and other predators and scavengers; mammals and birds might be poisoned if they feed upon animals that have eaten this bait. This pesticide is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to infested areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or drain.
