READY-TO-USE PLACE PAC
PELLETS

KILLS RATS, MICE & MEADOW VOLES*

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat

Norway rats and house mice may consume a lethal dose in one night's feeding with first dead rodents appearing four or five days after feeding begins.

See back panels for First Aid and additional precautionary statements.
**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **READ THIS LABEL**. Read this entire label and follow all use directions and use precautions. Use only for sites, pests, and application methods described on this label.

**IMPORTANT:** Do not expose children, pets, or nontarget animals to rodenticides. To help prevent exposure:

1. Store unused product out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from bait stations when they are lifted, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to hosted livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container and unused, spoiled, or unconsumed bait as specified on this label.

Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used wherever children, pets, nontarget mammals, or birds may have access to the bait station placement location.

**USE RESTRICTIONS:** This product may only be used to control the following rodent pests in and around man-made structures:

- House mouse (Mus musculus)
- Norway rat (Rattus norvegicus)
- Roof rat (Rattus rattus)
- Cotton rat (Sigmodon hispidus)
- Eastern harvest mouse (Reithrodontomys humulis)
- Golden mouse (Ochrotomys nuttalli)
- Polynesian rat (Rattus exulans)
- Meadow vole (Microtus pennsylvanicus)
- White-throated woodrat (Neotoma albigula)
- Southern plains woodrat (Neotoma micropus)
- Mexican woodrat (Neotoma mexicanus)

This product must be used in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port terminal buildings and related structures around and associated with these sites. Fence and perimeter baiting, beyond 100 feet from a structure as defined above, is prohibited. This product must not be applied directly to food or feed crops.

Baiting with Final Rodenticide Ready-To-Use Place Pacs is prohibited.

Do not place near or inside ventiﬁcation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait. Do not use this product in sewers.

Do not sell this product in individual containers holding less than 16 pounds of bait.

**SELECTION OF TREATMENT AREAS:** Determine where rats, mice, or meadow voles will most likely find and consume the bait. Generally, these areas are along walls, by grained openings, in corners and concealed places, between floors and walls, or in locations where rats, mice, or meadow voles* or their signs have been seen. Protect bait from rain and snow. Remove as much alternative food as possible.

**APPLICATION DIRECTIONS:**

- **RATS:** Apply 4 to 16 pacs (at intervals of 15 to 30 feet) per placement in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until there no longer are signs of fresh rat activity.
- **MICE AND MEADOW VOLES:** Apply 1 pac per placement. Space placements at 8 to 12 foot intervals in infested areas. Two pacs may be applied at points of extremely high mouse or meadow vole* activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until there no longer are signs of fresh mouse or meadow vole* activity.

**FOLLOW-UP:** Replace contaminated or spoiled bait immediately. Wearing gloves, collect and dispose of all dead, exposed animals and leftover bait. To prevent reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal.

**Pesticide Storage:** Store only in original container in a cool, dry place inaccessible to children and pets.

Keep containers closed and away from other chemicals.

**Pesticide Disposal:** Dispose of wastes resulting from the use of this product in trash or at an approved waste disposal facility.

**Container Handling:** Nonrefillable container. Do not reuse or refill this container. **Plastic:** Offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill; or by incineration. In most states, burning is not allowed. **Paper:** Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration. In most states, burning is not allowed.

**WARRANTY:** To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

**DIRECTIONS FOR USE**

(Continued from other panel)

---

**NOTE TO PHYSICIAN**

If animal eats bait, call veterinarian or 1-877-854-2494 at once.

**TREATMENT FOR PET POISONING**

If animal eats bait, call veterinarian or 1-877-854-2494 at once.

**NOTE TO VETERINARIAN**

**Anticoagulant Brodifacoum:** For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K1 at doses of 2-5 mg/kg. If needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

**ENVIRONMENTAL HAZARDS**

This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals might be poisoned if they feed upon animals that have eaten this bait. This pesticide is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or inverte.
**KILLS RATS, MICE, & MEADOW VOLES**

Kills Warfarin Resistant Norway Rats & House Mice

Norway rats and house mice may consume a lethal dose in one night’s feeding with first dead rodents appearing four or five days after feeding begins.

**ACTIVE INGREDIENT:**
Brodifacoum (CAS #56073-10-0): 0.005%

**OTHER INGREDIENTS†:** 99.995%

†Contains Denatonium Benzoate  TOTAL 100.000%

Norway rats and house mice may consume a lethal dose in one night’s feeding with first dead rodents appearing four or five days after feeding begins.

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.*

**NET WEIGHT:** 0.88 oz (25 g)

EPA REG. NO.: 12455-91  EPA EST. NO.: 12455-W1

If animal eats bait, call veterinarian or 1-877-854-2494 immediately for treatment advice.

**FIRST AID**

Have label with you when obtaining treatment advice.

If Swallowed:
- Call a poison control center, doctor, or 1-877-854-2494 immediately for treatment advice.
- Have a person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.

If In Eyes:
- Hold eye open and rinse slowly and gently with warm water for 15–20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center, doctor, or 1-877-854-2494, immediately for treatment advice.

**NOTE TO PHYSICIAN**

If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K₁ intramuscularly or orally. Vitamin K₁ is antidotal at doses of 10–20 mg (not mg/kg). Repeat as necessary based on monitoring of prothrombin times.

**IF INDOORS**

- Wash eyes gently with soapy water for 15–20 minutes.
- Call a poison control center, doctor, or 1-877-854-2494, immediately for treatment advice.

**TREATMENT FOR PET POISONING**

If animal eats bait, call veterinarian or 1-877-854-2494 immediately for treatment advice.

**NOTE TO VETERINARIAN**

Anticoagulant Brodifacoum: For animals ingesting bait and/or showing poisoning signs (bleeding, elevated prothrombin times), give Vitamin K₁ at doses of 0.1–0.5 mg/kg. If needed, check prothrombin times every 2 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

See back panels for First Aid and additional precautionary statements.
