**DANGER / PELIGRO**

• Call a poison control center or doctor for treatment advice.

• Rinse skin immediately with plenty of water for 15-20 minutes.

• If exposed in the eyes, flush the eye(s) open with running water for 15 minutes. If pain or irritation occurs, seek medical attention.

• If swallowed, induce vomiting if conscious, alert. Do not give anything by mouth to an unconscious person. Support breathing if necessary.

• If signs of cholinesterase inhibition appear, atropine sulfate is antidotal.

**USER SAFETY RECOMMENDATIONS**

- Keep and wash PPE separately from other laundry. Discard clothing and other materials exposed to this product. (See Disposal section for additional information.)

- Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions are available, use a solution of one part household bleach to ten parts water.

- Allow a minimum of 24 hours before bringing exposed materials into livestock facilities.

**PRECAUTIONARY STATEMENTS**

• In addition, mixers and loaders must:
  - Wear a respirator certified per applicable OSHA and/or NIOSH requirements.
  - Wear protective clothing (heavy rubber boots, heavy rubber gloves, work apron, and a long-sleeved shirt/long pants), and eye protection.
  - Use a leak-proof laboratory type pipet/dispenser or other dispensing device with a tight fitting cap to avoid exposure to pesticide vapor.
  - Avoid contact with eyes and skin. 
  - Not use in closed spaces.

• Socks plus shoes

• Protective eye wear (goggles, face shield, or safety glasses)

**APPLICATION RESTRICTIONS**

- Aerial Application: Do not apply DIBROM Concentrate to crops in bloom, either before or after blooming, or to weeds while bees are visiting the treatment area, except as specifically permitted in the labeling.

- Application of DIBROM Concentrate is not possible, such as cleaning up a spill or leak and cleaning or repairing contaminated equipment or structures.

- Any R, P, or HE prefilter. Please note that N designation for respirator filters does not guarantee a fit to your face or a seal around your mouth to prevent air leakage. See the manufacturer's written operating instructions.

**ENVIRONMENTAL HAZARDS**

- Do not contaminate water, food, or feed by storage, disposal, or cleaning of equipment or clothing.

- In addition to the specific directions for use listed above, the user must be aware of and follow all federal, state, local, and tribal environmental regulations and guidelines that apply to the use of DIBROM Concentrate.

- The system must be capable of removing the pesticide from the shipping container and the application equipment after a spill or leak, such as a broken package or spill, and the user must follow the appropriate procedures and directions to correct this hazard if necessary.

- The system must be capable of removing the pesticide from the shipping container and the application equipment after a spill or leak, such as a broken package or spill, and the user must follow the appropriate procedures and directions to correct this hazard if necessary.

- At any disconnect point, the system must be equipped with a dry disconnect coupler or other means of separating the system from the container.

- A person certified for the appropriate application equipment must perform the repair of the application equipment, the PPE specified in the PPE section of this labeling must be worn by the person so certified.

- Be provided and have immediately available for use in case of an emergency.

**OPERATIONAL USE INSTRUCTIONS**

- Aerial Application:
  - Treatment of a site must be based on pest surveillance results. Do not treat any site in a 7 day period that will result in the application of more than 0.1 lb. of DIBROM Concentrate per acre within a 7 day period and the amount of undiluted product per acre is the maximum amount to be sprayed in one hour.
  - DIBROM Concentrate is a special formulation for the control of mosquitoes, flies, and other insects. Applications must be at the correct volume rate(s) and nozzle flow rate(s) are properly calibrated.

- SUPPRESSION OF DEER FLIES AND OTHER TABINIDS
  - Municipalities, Tidal Marshes, Swamps, Woodlands, and Agricultural Areas

- Small Flying Moths, Flies (including but not limited to Crane Flies, Adult Staphylinids, and Long-legged flies)
  - Applied more than two hours after sunrise or two hours before sunset, limiting application to the following conditions: Not applied in and around open bodies of water, rocks, or vegetation exists; i.e., woodlands, etc.

- Ultra Low Volume (ULV) Aerial Application:
  - Dilute Aerial Application:
    - Apply half to one fluid ounce of undiluted DIBROM Concentrate per acre (equivalent to 0.05 to 0.1 lb. a.i./acre). Use the 1 fluid ounce rate where heavy vegetation exists; i.e., woodlands, etc.

- Treatment of animal or human populations, or if specifically approved by the state or control a threat to public and/or animal health as determined by a state, tribal or local public health authority.

**DISPOSAL OF UNwanted MATERIAL**

- Use caution when disposing of containers. Not for use in and around the home by children, pets, livestock, or wildlife.

- A hazardous waste in accordance with federal, state, and local regulations.

- Thoroughly wash all equipment and containers. Also clean all equipment and containers using a solution of one part household bleach to ten parts water.

- If the pesticide has come into contact with the environment, such as contaminated clothing, hoses, soil, or water, wash or clean as necessary and then dispose of the equipment according to state, local, and federal regulations.

- The container may be reclaimed or recycled. Check with your local dealer or state agency for specific disposal instructions or call the National Household Hazardous Waste Information Line at 1-800-280-HELP (4357).
