OTHER INGREDIENTS
EPA Reg. No. 6836-115-71898
Total available halogen as chlorine ........... 62.8%

A Safety Data Sheet relative to the use of this product is also available upon request.

IF INHALED:
sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a doctor.

IF INGESTED:
Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a doctor.

IF IN-DERM:
Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

IF ON SKIN:
Dilute and wash thoroughly with water. Call a poison control center or doctor for treatment advice. Have the container or label with you when calling a poison control center or doctor.

If irritation or rash persists, seek medical attention.

IN CASE OF FIRE:
Fire is more likely to spread because of rapid reaction with generation of heat, liberation of hazardous gases, and possible explosion. Use dry chemical or CO2 extinguishers. Avoid inhalation of smoke or fumes. Firefighters should use self-contained breathing apparatus.

PACKAGING/CONTAINERS:
Nonrefillable container. Do not reuse or refill this container. DO NOT REUSE.

Check the canister periodically and replace when empty. Do not attempt to open or puncture and dispose of  in a sanitary landfill, or incinerate or burn if allowed by local regulations. For reuse, refer to the appropriate feeder manual. See the L-key located inside the feeder at the bottom. DO NOT FORCE. Replace feeder cap.

When microbial control is evident, add 0.1 to 0.3 pounds per 1000 gallons of water contained in the system. Repeat initial dosage until one to three ppm (mg/L) bromine residual is established for at least 4 hours.

DOSAGE RATES
FOR CONTROL OF ALGAE
CONTROLLED FEED METHOD
CB-3939 is added at the rate of 0.08 to 0.10 pounds per 1000 gallons (or 0.8 to 1.0 ppm) of water in the system. Control the application by measuring the free chlorine residual in the treated water.

SUBSEQUENT DOSE:
For control of algae in continuous feed applications. Make-up, machine washwater, etc. Contaminates biofilm forming bacteria, fungi and algae in industrial airwashers and paper mill operations. After rinsing, the cans are dried thoroughly at approximately 350°F and the cleaning of the canister. Store in a cool, dry area out of reach of children.

STORAGE AND DISPOSAL
Storage:
Pesticide storage: Keep containers tightly closed. Store in a cool, dry, well-ventilated area. Keep in the original container or in a tightly closed container.

PESTICIDE DISPOSAL:
Pesticide containers must be handled as hazardous waste. Disposal of these containers must be in accordance with local, state, and federal regulations. Disposal of containers may be made in a sanitary landfill, or incinerator, or, if allowed by local regulations, properly enclosed and burned outside of buildings.
