Spray Disinfectant

For use only on hard, non-porous environmental surfaces. Sherman Halt is an all-purpose disinfectant that effectively kills 99.9% of the most common bacteria, viruses and fungi, as well as specific drug-resistant strains of bacteria (MRSA, Staph aureus, VRE), viruses (H1N1, rhinovirus, norovirus, enterovirus), fungi (Trichophyton mentagrophytes), and protozoa (Cryptosporidium parvum, Giardia lamblia). Additionally, Sherman Halt is effective against tubercle bacilli (Mycobacterium tuberculosis), and is effective in killing propagating spores of Bacillus subtilis, even in the presence of non-toxic organic material. 

Sherman Halt is designed to be highly effective in killing pathogenic bacteria, viruses, fungi and protozoa, and the spray is so easy to use that it can be applied anywhere - in hospital rooms, doctors' offices, or other areas of the healthcare facility. Sherman Halt can be used as a terminal disinfectant to decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

STORAGE AND DISPOSAL

Store upright in a cool, dry place away from direct sunlight. Do not store near heat or open flame. Contents under pressure. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not use on plastics or furniture. 

Nonrefillable container; do not reuse or refill. 

Wastes resulting from the use of this product are hazardous and may contain hazardous substances. Consult your local waste management facilities to determine proper waste disposal procedures. 

This product is not to be used as a terminal high-level disinfectant or sterilization process or as a terminal sterilization process or for sterilization of medical devices. 

Inhalation, ingestion or removal of this product may cause adverse health effects. Be sure to read and follow instructions on the label carefully. 

NOTE: Read and check carefully all information, including the specifications in this box. The job will not be sent to print until final okay is received. All information contained on the label and in this box are the responsibility of the final approver.
