ACTIVE INGREDIENTS: 2-methylpropenyl-3-(25\(\text{cis/trans isomer ratio: max}\)\% (±) trans 2,

WON'T HARM PLANTS

CRAWLING BUGS:
 spray comes in contact with active ingredients in a variety of ways, including contact with skin, respiratory or ocular exposure. Avoid contact with skin, eyes, or respiratory tract.

Insecticidal soap is a non-selective, non-toxic product that is effective against a wide range of insects and pests. It can be used indoors or outdoors to control many insects, including aphids, whiteflies, spider mites, and thrips.

WEEDS:

The active ingredient in weed killer is glyphosate, which is a non-selective herbicide that kills a range of weeds and grasses. It works by inhibiting the growth of plants, causing them to die. It is effective on a wide range of weeds and can be applied to both ornamental and vegetable gardens.

BROADLEAF WEEDS:

The active ingredient in broadleaf weed killer is triclopyr, which is a selective herbicide that kills a wide range of broadleaf weeds. It works by inhibiting the growth of plants, causing them to die. It is effective on a wide range of weeds and can be applied to both ornamental and vegetable gardens.

FIRST AID:

In case of contact with eyes, wash immediately with plenty of water for at least 15 minutes. If contact with skin, wash the affected area with soap and water. If contact with clothing, remove clothing and wash with soap and water.

In case of ingestion, do not induce vomiting. Call a poison control center or doctor if any symptoms occur. If swallowed, do not induce vomiting. Call a poison control center or doctor if any symptoms occur.

ENVIRONMENTAL HAZARDS:

Do not contaminate water, food, or feed by storage or disposal.

STORAGE AND DISPOSAL:

Store in a cool, dry place away from heat and excessive moisture.

PESTICIDE DISPOSAL AND CONTAINER HANDLING:

Do not contaminate water, food, or feed by storage or disposal.

STORAGE:

Store in a dry, cool place away from heat and excessive moisture.

APPLICATION:

Apply liquid directly to the target area.

FLEXOGRAPHY:

Rob J

Gary Weintraub

205 x 710 CL&D

DOUBLE SIDED:

Product can be used for an indefinite period of time.

DEFENSE SYSTEM:

Preventive sprays are designed to protect against a wide range of insects and pests. They work by covering the target area with a protective barrier, preventing insects and pests from entering.

PROFESSIONAL USE:

Professional products are designed for use by professionals, including pest control operators, gardeners, and farmers. They are formulated with a higher concentration of active ingredients and are designed to be applied in a professional setting.

PERSONAL USE:

Personal products are designed for use by homeowners and gardeners. They are formulated with a lower concentration of active ingredients and are designed to be applied in a domestic setting.

PERMIT REQUIRED:

Approval is required from the local health department before use.

PESTICIDE REGISTRATION:

Contact your local health department for approval before use.

PESTICIDE REGISTRATION:

Contact your local health department for approval before use.

PRECAUTIONARY STATEMENTS:

Hazard to Humans and Domestic Animals:

CAUTION:

This product is toxic to birds.

CAUSATION:

This product is toxic to birds.

DOMESTIC ANIMALS:

Keep out of reach of children.
