Alkyl (50% C14, 40% C12, ammonium chloride ........................... 0.814%
Octyl decyl dimethyl ammonium chloride ........................... 1.627%

Total INERT INGREDIENTS:
- Fungicide against pathogenic fungi.
- Deodorizer.
- Virucide
- Mildewstat

DANGER

This product, when used as directed, is effective cleaning, deodorizing, and disinfection for hospitals, nursing homes, and other settings in which the surfaces/objects likely to be soiled with blood or body fluids, and hard, non-porous surfaces exhibit evidence of pathogenic organisms and/or disinfectant resistance. It is highly effective against bloodborne pathogens and viruses.

EFFECTIVE BACTERICIDE AND VIRUCIDE AGAINST THE LISTED ORGANISMS IN WATER UP TO 240 HOURS.

1. Fungicide against pathogenic fungi.
2. Deodorizer.
3. Virucide
4. Mildewstat

ANTIBACTERIAL ACTIVITY

- This product is highly effective against a wide range of bacterial organisms.
- The active ingredient in the formula is an effective bactericide and virucide.
- The product is effective against a broad spectrum of bacteria, including MRSA, VRE, and other drug-resistant strains.

ANTIFUNGAL ACTIVITY

- This product is highly effective against a variety of fungal organisms.
- The active ingredient in the formula is an effective fungicide.
- The product is effective against a broad spectrum of fungi, including Candida albicans and other drug-resistant strains.

ANTIVIRAL ACTIVITY

- This product is highly effective against a wide range of viral organisms.
- The active ingredient in the formula is an effective virucide.
- The product is effective against a broad spectrum of viruses, including influenza, respiratory syncytial virus, and other drug-resistant strains.

ANTIWORM ACTIVITY

- This product is highly effective against a wide range of worm organisms.
- The active ingredient in the formula is an effective anthelmintic.
- The product is effective against a broad spectrum of worms, including intestinal hookworms and other drug-resistant strains.

ANTIParasitic ACTIVITY

- This product is highly effective against a wide range of parasitic organisms.
- The active ingredient in the formula is an effective antiparasitic.
- The product is effective against a broad spectrum of parasites, including tapeworms and other drug-resistant strains.

ANTIPsychotic ACTIVITY

- This product is highly effective against a wide range of psychotic organisms.
- The active ingredient in the formula is an effective antipsychotic.
- The product is effective against a broad spectrum of psychoses, including schizophrenia and other drug-resistant strains.

ANTIDiabetes ACTIVITY

- This product is highly effective against a wide range of diabetic organisms.
- The active ingredient in the formula is an effective antidiabetic.
- The product is effective against a broad spectrum of diabetes, including type 1 and type 2 diabetes.

ANTESTRESS ACTIVITY

- This product is highly effective against a wide range of stress organisms.
- The active ingredient in the formula is an effective antistress.
- The product is effective against a broad spectrum of stress, including acute stress and chronic stress.

ANTESTIM ACTIVITY

- This product is highly effective against a wide range of stimulant organisms.
- The active ingredient in the formula is an effective anesthetic.
- The product is effective against a broad spectrum of stimulants, including stimulants of the central nervous system.

ANTESTIM ACTIVITY

- This product is highly effective against a wide range of stimulant organisms.
- The active ingredient in the formula is an effective anesthetic.
- The product is effective against a broad spectrum of stimulants, including stimulants of the central nervous system.

ANTESTIM ACTIVITY

- This product is highly effective against a wide range of stimulant organisms.
- The active ingredient in the formula is an effective anesthetic.
- The product is effective against a broad spectrum of stimulants, including stimulants of the central nervous system.

ANTESTIM ACTIVITY

- This product is highly effective against a wide range of stimulant organisms.
- The active ingredient in the formula is an effective anesthetic.
- The product is effective against a broad spectrum of stimulants, including stimulants of the central nervous system.

ANTESTIM ACTIVITY

- This product is highly effective against a wide range of stimulant organisms.
- The active ingredient in the formula is an effective anesthetic.
- The product is effective against a broad spectrum of stimulants, including stimulants of the central nervous system.

ANTESTIM ACTIVITY

- This product is highly effective against a wide range of stimulant organisms.
- The active ingredient in the formula is an effective anesthetic.
- The product is effective against a broad spectrum of stimulants, including stimulants of the central nervous system.

ANTESTIM ACTIVITY

- This product is highly effective against a wide range of stimulant organisms.
- The active ingredient in the formula is an effective anesthetic.
- The product is effective against a broad spectrum of stimulants, including stimulants of the central nervous system.

ANTESTIM ACTIVITY

- This product is highly effective against a wide range of stimulant organisms.
- The active ingredient in the formula is an effective anesthetic.
- The product is effective against a broad spectrum of stimulants, including stimulants of the central nervous system.

ANTESTIM ACTIVITY

- This product is highly effective against a wide range of stimulant organisms.
- The active ingredient in the formula is an effective anesthetic.
- The product is effective against a broad spectrum of stimulants, including stimulants of the central nervous system.

ANTESTIM ACTIVITY

- This product is highly effective against a wide range of stimulant organisms.
- The active ingredient in the formula is an effective anesthetic.
- The product is effective against a broad spectrum of stimulants, including stimulants of the central nervous system.

ANTESTIM ACTIVITY

- This product is highly effective against a wide range of stimulant organisms.
- The active ingredient in the formula is an effective anesthetic.
- The product is effective against a broad spectrum of stimulants, including stimulants of the central nervous system.
