KEEP OUT OF REACH OF CHILDREN

DANGER

See side panel for additional precautionary statements.

NET CONTENTS: 2 Liters / 67.6 Fl. Oz.

NABC® Concentrate provides 700 ppm of quaternary ammonium compounds to disinf ect, sanitize, clean and deodorize toilet bowls, showers, sinks, fiberglass, synthetic marble, stainless steel, glass, and other hard, non-porous bathroom surfaces.

One-Day Cleaning/Disinfecting

Rest. Sex-Panes Surfaces: For heavily soiled areas, use 2 oz. per gallon of water. Apply with a mop, cloth or coarse spray device. Treated surface must remain wet for 10 minutes. Allow to air dry or wipe off with a clean cloth or paper towel.

Contact time: 15-20 minutes. Remove contact lenses, if present, after the 15-20 minute contact time. After product is diluted in accordance with the directions for use, it is for external use only and must be thoroughly rinsed with potable water before re-use. Do not use this product to disinfect or clean utensils, glasses, dishes, or cookware.

Disposal of Infectious Material: Contaminated cleaning materials, blood and other body fluids must be autoclaved and/or disposed of according to accepted local regulations for infectious waste disposal.

Precautionary Statements

DANGER: Causes irreversible eye damage. Harmful if swallowed. In case of eye contact, flush eyes with large amounts of water. Get medical attention immediately. Do not induce vomiting unless told to do so by a poison control center or doctor for treatment advice.

If on skin:
Remove contaminated clothing and wash clothing before reuse.

In eyes:
Flush with large amounts of water for 15-20 minutes. Remove contact lenses, if present, after the topical rinse. After product is diluted in accordance with the directions for use, it is for external use only and must be thoroughly rinsed with potable water before re-use. Do not use this product to disinfect or clean utensils, glasses, dishes, or cookware.

Special Instructions for Cleaning and Disinfecting Surfaces/Objects Soiled with Blood/Bodily Fluids: Personal protection: Exposure to blood or body fluids may be avoided by use of barrier protection such as latex or other impervious gloves. Face shields and impervious gowns must also be worn if splashing of blood or body fluids may occur.

NABC Concentrate is a non-acid formulation designed for use in schools, public buildings, restaurants, bars, cafeterias, non-acid formulation designed for use in schools, public buildings, restaurants, bars, cafeterias, office buildings, hotels, motels, theaters, factories, manufacturing facilities, food processing plants, apartment buildings, medical/religious facilities, public restrooms and similar facilities.

A high level of disinfecting activity is achieved with a contact time of 15-20 minutes. The reduction of microorganisms is as follows:

*Kills HCV, HBV and HIV on pre-cleaned environmental surfaces/objects previously soiled with blood/bodily fluids in a surface on which there is an expected likelihood of soiling of non-porous surfaces/objects with blood or body fluids, and in which the surfaces/objects may be soiled with blood or body fluids can be associated with the potential for transmission of Hepatitis C Virus (HCV), Hepatitis B Virus (HBV) and Human Immunodeficiency Virus Type 1 (HIV) and may require additional disinfection.

NABC Concentrate provides 700 ppm of quaternary ammonium compounds to disinfect, sanitize, clean and deodorize toilet bowls, showers, sinks, fiberglass, synthetic marble, stainless steel, glass, and other hard, non-porous bathroom surfaces.
