Hazards to Humans and Domestic Animals:

CAUTION: Harmful if inhaled or absorbed through the skin, avoid contact with skin, eyes or clothing, avoid breathing dust. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet, remove and wash contaminated clothing before reuse.

Environmental Hazards: Do not apply directly to treated, finished drinking water reservoirs or drinking water reservoirs when the water is intended for human consumption.

FIRST AID:

If INGESTED: Offer nothing by mouth. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

If ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for treatment advice.

NOTICE TO USER:

How the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-800-222-1222 for emergency medical treatment information.

Storage and Disposal:

Do not contaminate water, food or feed by storage or disposal.

Precautions to Avoid:

Precautions to Avoid Exposure or Ingestion

If exposed: Wash thoroughly with soap and water.

If swallowed: Do not induce vomiting. If conscious, give 1 or 2 glasses of water. Call a poison control center or doctor for further treatment advice.

If skin contacted: Wash with soap and water.

If in eyes: Rinse with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

If inhaled: Remove to fresh air. If not breathing, call 911 or an ambulance. If breathing is difficult, give oxygen. Call a poison control center or doctor for further treatment advice.

General Information:

Mosquito Bits® is a highly selective microbial insecticide effective against mosquitoes in a variety of habitats. When spread uniformly over the surface of contaminated water the Bits release a biological mosquito larvicde at the water's surface. This larvicide gradually settles in the water where it is eaten by mosquito larvae growing there. MOSQUITO BITS® may be used in all types of contaminated standing water sites where mosquito larvae grow. The Bits will give a quick kill within 24 hours. For more residual long term control please consider the use of MOSQUITO DUNKS® after applying MOSQUITO BITS®. Employ a seven to fourteen day interval between applications.

Biological Mosquito Control
