DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

2882 is used in industrial and/or commercial recirculating cooling tower systems and industrial airwashing systems to control microbiological slime. Prior to the use of 2882 in industrial and/or commercial recirculating cooling tower systems and industrial airwashing systems, systems should be cleaned to remove algae growth, microbiological slime, and other deposits. Then make an initial slug addition of 12.0 to 17.9 fl oz of 2882 per 1000 gal of water to provide 100 to 150 ppm of 2882, based on total weight of water in the system. Repeat initial dosage until control is evident. Make subsequent slug additions of 6.0 to 17.9 fl oz of 2882 per 1000 gal of water (50 to 150 ppm 2882) every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sum of recirculating cooling tower systems.

2882 is used in industrial air-washing systems which maintain effective mist-eliminating components. Prior to use of 2882, systems should be cleaned to remove sludge and other deposits. An initial slug dose of 28.1 to 35.9 fl oz of 2882 per 1000 gal of water is recommended. Repeat initial dosage until control is evident. Subsequent slug additions of 21.0 to 35.9 fl oz of 2882 per 1000 gal of water should be employed every 1 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bleedoff and severity of the bacterial problem. Slug additions may be made to the sump or the water collection trays of the airwash system.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Do not expose to extremes of temperature. Do not stack more than four drums high. Leaking or damaged drums should be placed in overspill drums for disposal. Spills should be absorbed in sawdust or sand and disposed of in a sanitary landfill. Keep container closed when not in use.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use, according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at your EPA Regional Office for guidance.

CONTAINER DISPOSAL:

For refillable containers:
Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller.

For containers 55 gallons and smaller:
To clean the container prior to refilling or disposal, use a triple rinse wash as follows: Empty the remaining contents from this container into application equipment or a mix tank. Fill the container about 10 percent full with water. Agitate vigorously. Pour or pump rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this rinsing procedure two more times. Do not discharge rinsate containing this product unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge rinsate containing this product to sewer systems without prior approval from the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.
