**Precautionary Statements**

**Hazards to Humans and Domestic Animals**

**Warning**
Cautions cause eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants, and hat. May be fatal if swallowed or inhaled. Do not breathe vapor or spray mist. While spraying paint or sanding or sandblasting boat surfaces, wear a mask or a respirator (jointly approved by the Mining Enforcement and Safety Administration and the National Institute of Occupational Safety and Health). Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

**First Aid:**

- If swallowed: Immediately call a poison control center or doctor.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.
- If on skin or clothing:
  - Take off contaminated clothing.
  - Rinse skin immediately with plenty of water for 15-20 minutes.
- If in eyes:
  - Hold eye open and rinse slowly and gently with water for 15-20 minutes.
  - Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- If inhaled:
  - Move person to fresh air.
  - If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

**Order Number:**

**BRA642 BLACK**
For commercial use only

**For specific state registrations contact your International Representative**

**Active Ingredient:**
CUPROUS OXIDE

**Inert Ingredients:**
COPPER AS METALLIC = 37.11%

**Contains petroleum distillates.**

**Directions for Use**
It is a violation of Federal law to use this product in a manner inconsistent with labeling.

**Product Description:**
A high performance, tributyl phosphate (TBP) solution. Use of this product for cleaning, protective glaze, bonding materials, and other marine coatings, for use in fresh, salt and brackish waters. Prevents coating buildup. At high salinity or dry dockage, it is highly recommended to use in a combination with a goitrogenic agent to prevent growth of marine organisms. TBP is used in the production of the product. Interspeed 640 is for commercial use only. Not for sale to the general public.

**Product Information:**
- **Finish/Disperse:** Semi-Gloss (ASTM D-1233)
- **Volume:** One pack
- **Mix Ratio:** 62% to 2% (ASTM D-2697)
- **Finishes:**
  - Semi-Gloss (ASTM D-1233)
  - Satin (ASTM D-1270)
- **Theoretical Coverage:**
  - 240 sq. ft./gal. (43.8 microns)

**Application Details:**
- **Method:** Airless spray, brush or roller
- **Brush:** Not recommended. If necessary use (1:600) or see thinning section.
- **Cleaner:** 1:10

**Physical or Chemical Hazard:**
Flammable. Keep away from heat, sparks or open flame.

**Storage and Disposal:**
Do not combine with water, fuel or storage by disposal.

**Fungicide:**
- Pesticide wastes are toxic. Open dumping is prohibited. Pesticide, spray mixture, or residue that cannot be used or chemically represented should be disposed of according to procedures approved by Federal, state or local disposal authorities.

**Container Disposal:**
Triple rinse (or equivalent). Then offer for recycling or reconditioning by puncture and disposal of in a sanitary landfill, or by other approved State and local procedures.

**Disclaimer:** The performance of any marine paint or coating depends on many factors outside the control of International Paint Inc. Including surface preparation, proper application, and environmental conditions. Therefore, International Paint Inc. cannot guarantee the performance of this product. The user assumes all risks of the product. IMPLOQ Warrants Interpaint Coatings for a period of 5 years from the date of purchase against defects in materials and workmanship. International Paint Inc. assumes no liability for any damage, direct or indirect, incurred by the user of this product.

**Environmental Hazards:**
This material is toxic to fish. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans and other waters unless in accordance with the requirements of the National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer systems without previously notifying the local sewage treatment plant authorities. For guidance, contact your State Water Board or Regional Office at the EPA.

**Regulatory Data:**
- **V.O.C.:** 27.6 (as applies)
- **MSDS:** MIL-P-24647, Type A, C, or A&B, Application 1 & 2, System C, Compatibility International should be consulted for detailed application advice. Specification recommendations and all to the suitability of specific products on individual vessels.

**System Limitations:**
- **Volatile:** 4000 ppm (as applies)
- **Temperature Range:**
  - **Minimum:** 10°F (-12°C)
  - **Maximum:** 102°F (39°C)

**Technological Advantages:**
- **V.O.C.:** 27.6 (as applies)
- **Temperature Range:**
  - **Minimum:** 10°F (-12°C)
  - **Maximum:** 102°F (39°C)

**FINISHES:**
- **Semi-Gloss (ASTM D-1233)**

**KEEP OUT OF REACH OF CHILDREN**

**WARNING**

FIVE U.S. GALLONS (18.927 LITERS)
New Construction/Extension or Yard Proceedings, consult International.

Unusual Surfaces: Prepare surfaces and apply recommended primers. Apply one or more coats of topcoat directly as specified. Consult the relevant primer data sheet for surface preparation and application information.

Riveting and lugging of appurtenances: Use coated or high pressure washer to wash down (200 psi 17 bar 3000 psi) the entire area, and remove any rivets that are at the surface of the existing apparatus.

Rivets, rivet ends and areas with the recommended anticorrosive primer and apply one coat of topcoat (with the exception of area specified for the primer coating See primer data sheet).

Apply the specified number of coats of this product.

Mixing: This material is a one component coating. Always mix thoroughly with a power agitator before application.

Application: Apply by airless spray only. Application by other methods, drop or dip, may require more than one coat and it is suggested for small areas only as an initial prior coating. Apply 6 lbs of (136 ml) coating (wet) which will yield 1.5 lb of (51.5 ml) dry film thickness. Consult the following equipment recommendations or utilize suitable method.

Equipment: Brush: Use the appropriate size brush to apply:
- Paint: Use all Purpose Roller Cover with 0.25" (6.5mm) pile smooth to medium. Prepaint roller cover is recommended. Apply prior to use.
- Airless Spray: High-tension 26:1 ratio pump, .250" (.65mm) tip with 30" (74cm) ID high pressure material hose, 80 psi (5.6 bar) fill.

Thickening: Do not exceed your vendor's recommend. Material is supplied at spray viscosity and normally does not need thickening. If necessary, thin up to a maximum of 10% (115ml) per gallon (3.78 L) with International TH-1250 Thinner.

WORK STEPS/PS & CLEAN UP: Clean all equipment immediately after use with TH-1250 Thinner. Some materials require flushing with water. It is good practice to periodically flush out spray equipment during the course of the normal day. Materials are not to be left open to prevent the entrance of dust such as can be removed with a disassembled, immersible, and agitated sprayer or other work sprayer.

Weather conditions:
- Water: In the event your film coating is performed on moist coasts, dry as per manufacturer's recommendations in accordance with instructions in AM370.5 "Safety in Painting and Coating".
- Safety: This product is not to be used without adequate ventilation in the nearest relevant Material Safety Data Sheets and Material Safety Data Sheets (MDES). Prior to use, obtain, review and comply with the Material Safety and Product Data Sheet for this product for details concerning both product and health and safety information. Read and follow all preassembly notes on the Material Safety and Product Data Sheet and this container. If you do not fully understand these warnings and instructions or if you cannot comply with them, do not use this product. Proper ventilation and pressure measurement must be provided during application and drying to keep paint vapor concentrations within safe limits and to ensure that fire, electrical, and safety measures are dependent on the applicable material used, and the ventilation. Use this information in a safe manner that is not harmful for the environment. Contact International Paint, LLC, 1-800-363-8618 for more information.
- Storage: Store in cool, dry conditions.
- Shipment: One year minimum from date of manufacture when maintained in protected storage at 40-100°F (4-40°C). Subject to certification thereafter.

Any representations and statements concerning the product on this label are to the best of International Paint's knowledge. Any statements are not to be construed as specifications or warranties of any product, product characteristics, or any particular purpose. Any warranty, in any form, contained in or made or any express or implied warranty is disclaimed. Any representation or guarantee is subject to written agreement or to the terms and conditions of sale. You should request a copy of this document and read it carefully.
