VC® OFFSHORE WITH TEFLOW®

DIRECTIONS FOR USE:
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL DESCRIPTION:
VC-OFFSHORE WITH TEFLOW® is an antifouling protective coating resistant to algae, barnacles and other marine fouling.
VC-OFFSHORE WITH TEFLOW® has been developed with increased antifouling performance for both fresh and salt water. VC-OFFSHORE WITH TEFLOW® combines superior antifouling performance with a supersmooth low friction surface for the performance conscious boater. The friction reducing property of VC-OFFSHORE WITH TEFLOW® is enhanced by its flurocarbon base (for which teflton is a well-known trademark). When polished, VC-OFFSHORE WITH TEFLOW® yields a very hard finish for maximum durability and reduced friction for increased performance.

SURFACE PREPARATION:
1. NEW OR UNPAINTED FIBERGLASS
Wash surface with INTERLUX® FIBERGLASS SOLVENT WASH 202 changing rags frequently to remove all mold release wax. Sand surface to a dull finish with 80 grit production paper. Wipe surface clean with INTERLUX® FIBERGLASS SOLVENT WASH 202 and apply the first coat of VC-OFFSHORE WITH TEFLOW®. Allow a minimum of 6 hours before second coat is applied.

2. PREVIOUSLY COATED VINYL SURFACE
VC-OFFSHORE WITH TEFLOW® may be applied over vinyl based antifouling provided the old surface is in good condition. Sand vinyl antifouling with 80 grit production paper. Wipe the surface with INTERLUX® SPECIAL THINNER 216 and apply first coat of VC-OFFSHORE WITH TEFLOW®. Allow minimum of 6 hours before second coat.

3. PREVIOUSLY COATED SURFACE
Remove all previous coats unless they are vinyl based as per above. Scraps and sand all coatings from surface. Clean surface with INTERLUX® FIBERGLASS SOLVENT WASH 202 and apply first coat of VC-OFFSHORE WITH TEFLOW®. Allow minimum of 6 hours before second coat.

4. NEW OR CLEANED WOOD
Sand with 80 grit production paper. Wipe surface clean with INTERLUX® SPECIAL THINNER 216. Apply first coat of VC-OFFSHORE WITH TEFLOW®. Thinned 1% with INTERLUX® VINY-LUX SOLVENT 355. Allow minimum 6 hours between coats.

Mix together two full unthinned coats of VC-OFFSHORE WITH TEFLOW®.

5. Steel, iron and lead must be primed to avoid contact with copper bottom paints. (Not for Aluminum). Grind or sand blast alloy to bright metal, clean thoroughly with INTERLUX® SPECIAL THINNER 216 and overcoat with one hour with the first coat of V125 VC-TAR. Apply 3-5 additional coats taking care to follow the label directions as to overcoating time. Apply VC-OFFSHORE WITH TEFLOW® within 12-36 hours of the last coat of V125 VC-TAR.

Mixing
Mix well, thin up to 10% with INTERLUX® VINY-LUX SOLVENT 355 for spraying. Thin only as required for brushing or rolling. Do not exceed 10% by volume (other than wood). Stir repeatedly.

Polishing
After the final coat of VC-OFFSHORE WITH TEFLOW® has dried, wet sand with 400 grit to remove any imperfections in the film. Polish with fine bronze wool to a super smooth finish.

CAUTION:
Do not use on aluminum boats, outdrives or parts without proper barrier coatings. This product cannot be applied over any previous antifouling paint unless it is vinyl based.

Application Information
Technical Facts: Based on air temperature of 70° Fahrenheit. Drying Time Between Coats: Min. = 10 hours Max. = None

Drying Time To Launch:

Coverage: 305 square feet per gallon

Thinner: INTERLUX® VINY-LUX SOLVENT 355.

Application Tools: Brush, roller, spray. (For best performance finish spray apply only).

Number of Coats: Two are recommended.
