READY-TO-USE PLACE PACS

PELLETS

FASTRAC®
PLACE PACS

**
Norway rats, Roof rats and House mice usually consume a lethal dose in a single night’s feeding, but it may take two or more days from the time of bait consumption for these rodents to die.

NET WT:
4 lbs (1.81 kg)
121 x 0.53 oz (15 g) Place Pacs

FOR INDOOR AND OUTDOOR USE
KILLS RATS, MICE, AND MEADOW VOLES*
KILLS ANTICOAGULANT RESISTANT NORWAY RATS, ROOF RATS AND HOUSE MICE

KEEP OUT OF REACH OF CHILDREN
CAUTION

See back panels for First Aid, additional Precautionary Statements, and Directions for Use.

ACTIVE INGREDIENT:
Bromethalin (CAS #63333-35-7): 0.01%

OTHER INGREDIENTS†: 99.99%

†Contains Denatonium Benzoate

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.

Caution: Keep out of reach of children.
First Aid

If Swallowed:
• Call a poison control center, doctor, or 1-877-958-2484 immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not give anything by mouth to an unconscious person.
• Do not induce vomiting unless told to do so by the poison control center or doctors.

If Inhaled:
• Take person to fresh air.
• If not breathing, give artificial respiration.
• Call a poison control center, doctor, or 1-877-958-2484 immediately for treatment advice.

If Skinned:
• Take off clothing immediately. Wash any exposed skin with soap and water. Call a poison control center, doctor, or 1-877-958-2484 immediately for treatment advice.

Treatment for Poisoning
If an animal eats this bait, call a veterinarian or 1-877-958-2484 at once.

Note to Physician or Veterinarian
Contains the nerve poison bromethalin. This product is not an anticoagulant type rodenticide. For humans or animals ingesting bait and/or showing poisoning signs (such as muscle tremors, loss of hind limb use, or seizures for animals), limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroids.

Precautionary Statements

Hazards to Humans and Domestic Animals

CAUTION: Harmful if swallowed. Keep away from children, domestic animals and pets.

All handlers (including applicators) must wear shoes plus socks, and waterproof gloves. Any person who

removes carcasses or unused bait following application of this product must wear waterproof gloves.

User Safety Requirements

Follow manufacturer’s instructions for cleaning/measuring PPE. If no such instructions for washable

seals exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE

immediately after handling this product. Wash the outside of gloves before removing them. As soon as

possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using

tobacco or using the toilet and change into clean clothing.

Environmental Hazards

This product is extremely toxic to mammals and birds. Dogs and other predatory and scavenging mammals

and/or birds might eat food upon animals that have eaten this bait. Do not apply directly to water, or to

areas where surface water is present or to intertidal areas below the mean high water mark. Runoff may

also be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when

disposing of equipment wash-water or rinsewater.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read this Label: Read this entire label and follow all use directions and use precautions. Use only for

the sites, pests, and application methods described on this label.

Important: Do not expose children, pets, or nontarget animals to rodenticides. To help prevent exposure:

1. Store unused product out of reach of children and pets.

2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in

   tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under
   six years of age, and must be used in a manner that prevents such children from reaching into bait
   compartments and obtaining bait. Food can be shaken from bait stations when they are lifted, units must be
   secured or otherwise immobilized. Stronger bait stations are needed in areas open to hoofed livestock,
   birds, bees or other potentially destructive animals, or in areas prone to vandalism.

3. Dispose of product container and unused, spilled or unclaimed bait as specified on this label.

Bait stations are mandatory for outdoor ground use. Tamper-resistant bait stations must be used whenever
children, pets, nontarget mammals or birds may have access to the bait placement location.

Use Restrictions: This product may only be used to control the following rodent pests in and around

Burrow baiting with FASTRAC® Place Pacs® is prohibited.

Do not place bait near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or milk handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait.

Do not sell this product in individual containers holding less than 4 pounds of bait.

Selection of Treatment Areas: Determine areas where rats, mice or meadow voles will most likely first consume the bait. Generally, these areas are along walls, by gravel openings, in corners and concealed places, between floors and walls, or in locations where signs of rodents have been seen. Protect bait from rain and snow. Remove as much alternative food as possible.

Application Directions:

The active ingredient in this product is different from anticoagulant rodenticides. Individual rats and mice typically feed less or cease feeding altogether after consuming a lethal dose.

Rats: Place 3 to 12 Place Pacs per placement. Space placements at intervals of 15- to 30-foot. Adjust the

amount of bait applied to the level of rodent feeding expected at each bait placement.

Mice and Meadow Voles: Place 1 Place Pac per bait placement. Space placements at intervals of 8-to-12

feet in isolated areas. Up to two Place Pacs may be used at points of extremely high mouse or meadow voles

activity.

Baiting Strategy:

Highest bait consumption is expected to occur on the first day or two after treatment begins. After several days,

all rodents should cease feeding except those continuing to eat bait. Where a continuous source of

infestation is present, establish permanent bait stations and replenish them as needed.

Warranty: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than as specifically described on the label. Buyer assumes all risk of use and/or handling of this material

when such use and/or handling is contrary to label instructions.

Warranties:

To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning

the use of this product other than as specifically described on the label. Buyer assumes all risk of use and/or

handling of this material when such use and/or handling is contrary to label instructions.
