BROX®-M Herbicide
FOR CONTROL OF CERTAIN BROADLEAF WEEDS IN
WHEAT, BARLEY, OATS & RYE, GRASSES GROWN FOR SOD, AND FLAX

ACTIVE INGREDIENTS:
2-ethylhexyl ester of 2-methyl-chlorophenoxyacetic acid* .................. 34.0% 
Oxonic acid ester of bromoxynil** .................................................. 31.7% 
Other Ingredients*** ................................................................. 34.3% 
TOTAL ......................................................................................... 100.0%

*Equivalent to 21.9% 2-methyl-chlorophenoxyacetic acid or not less than 2.6 pounds acid per gallon. 
**Sinosphere octaneate equivalent to 21.9% of bromoxynil or not less than 2.6 pounds of bromoxynil per gallon. 
***Contains petroleum distillates. 

EPA Reg. No. 42750-92 
EPA Est. No. 42750-MO-1

KEEP OUT OF REACH OF CHILDREN
WARNING/AVISO
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. 
(If you do not understand the label, find someone to explain it to you in detail.)

FOR CHEMICAL SPILL, LEAK, FIRE OR EXPOSURE, CALL CHEMTREC (800) 424-9300

MANUFACTURED BY:
ALBAUGH, INC. 
1525 NE 36th Street 
Ankeny, Iowa 50021

FIRST AID

IF SWALLOWED:
• Immediately call a poison control center or doctor immediately for treatment advice. 
• Do not give ANY liquid to the person. 
• Do not induce vomiting unless told to do so by a poison control center or doctor. 
• Do not give anything by mouth to an unconscious person.

IF IN EYES:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes. 
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
• Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING:
• Take off contaminated clothing. 
• Rinse skin immediately with plenty of water for 15-20 minutes. 
• Call a poison control center or doctor for treatment advice.

IF INHALED:
• Move person to fresh air. 
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. 
• Call a poison control center or doctor for treatment advice.

HOT LINE NUMBER

Refrigerate product in a cool, dry place. 

NOTE TO PHYSICIAN: Contains petroleum distillates, working may cause aspiration pneumonitis. 

See inside booklet for additional PRECAUTIONARY STATEMENTS and DIRECTIONS FOR USE.
### General Weed List

**Most Susceptible Broadleaf Weed Species**
- Black Nightshade (Solanum nigrum)
- English Nettle (Urtica dioica)
- Bittercress (Cardamine pajada)
- White Lettuce (Lactuca canadensis)
- Plantain (Plantago major)
- Rockcress (Arabis sp.
- Common Purslane (Portulaca oleracea)
- Veronica Persicaria (Pteris aquilina)
- Field bindweed (Convolvulus arvensis)

**Susceptible Broadleaf Weed Species**
- White Mustard (Sinapis alba)
- Mustard (Brassica juncea)
- Field mustard (Sinapis arvensis)
- Common purslane (Portulaca oleracea)
- Rockcress (Arabis sp.
- Creeping thistle (Cirsium arvense)
- Pigweed (Amaranthus sp.
- Garden purslane (Portulaca oleracea)

**Weed Suppression**

Canadian Thistle (Cirsium arvense)  
Bromegrass at 1-2 photosynthetic units provides about 75% of the growth. Rogenerg may occur. More application as it grows taller to the seed stage.

**INSTRUCTIONS AND PRECAUTIONS:** **WEAT, BARLEY, OATS AND RYE**

- Do not use this product within 25 days after application. Planting of a cereal crop is not recommended. 
- Do not use where crop Anna covers the weed, as crop control will occur. 
- Do not use on a field where weeds are known to be resistant to this product. 
- Do not use this product on crops that will not be harvested. 
- Do not use this product on crops that will be harvested within 21 days of application. 
- Do not use this product on crops that will be harvested within 21 days of application.

RESTRICTIONS AND PRECAUTIONS: Grasses grown for seed production

- Do not use in areas of high water stress or areas tend to become waterlogged.
- Do not apply BRADF- to grasses grown for seed production with broadcast or broadcast applications.
- Do not plant the cultivar within 30 days following BRADF- application.
- Do not apply more than 2.5 times the recommendation per year with a maximum interval of 30 days.
- Do not apply more than 1.5 lbs per acre per year.

FLAX (Linum usitatissimum only)

BROAD-M DIRECTIONS

</tr>
</tbody>
</table>

RESTRICTIONS AND PRECAUTIONS: Flax (Linum usitatissimum)

- Do not apply to areas of high temperatures, intensities, or high wind stress or areas tend to become waterlogged.
- Do not apply to flax cultivars within 30 days following BRADF- application.
- Do not apply more than 4 times the recommendation per year with a maximum interval of 30 days.
- Do not exceed 2.5 lbs per acre per year.

CHEMICAL PRECAUTIONS

- Application of more than 2-3 times of irrigation water is recommended for the proper function of the irrigation system.
- Do not apply water or irrigation water to the irrigation system until after the spray has been applied.
- Do not use irrigation water to the irrigation system until after the spray has been applied.
- Do not exceed the maximum recommended rate of 4 times the recommendation per year.
- Do not apply more than 2.5 times the recommendation per year with a maximum interval of 30 days.
- Do not exceed 2.5 lbs per acre per year.

SPRAY DRIFT MANAGEMENT

Always apply the product in the direction of the wind. To minimize drift, application should be made in the early morning or late afternoon. Application in the late morning or early afternoon is recommended.

AERIAL APPLICATION:

- Do not apply the product on areas where wind velocity is greater than 10 miles per hour.
- Do not apply the product on areas where wind velocity is greater than 15 miles per hour.

GROUND BOOM APPLICATION:

- Do not apply the product on areas where wind velocity is greater than 10 miles per hour.

INFORMATION ON DISPLAY SIZED:

The product is effective at reducing wind insecticidal activity by 60 to 90%. The best drift management strategy is to apply the highest effective rate that is compatible with the desired end-use. Application rates vary depending on the desired end-use, such as agricultural or urban environments. The adjusted rate is based on the desired end-use, such as agricultural or urban environments. The adjusted rate is based on the desired end-use, such as agricultural or urban environments. The adjusted rate is based on the desired end-use, such as agricultural or urban environments. The adjusted rate is based on the desired end-use, such as agricultural or urban environments.

PRESENTATION IDS:

- Do not apply the product on areas where wind velocity is greater than 10 miles per hour.
- Do not apply the product on areas where wind velocity is greater than 15 miles per hour.

BROADS:

- Do not apply the product on areas where wind velocity is greater than 10 miles per hour.
- Do not apply the product on areas where wind velocity is greater than 15 miles per hour.

SUGGESTIONS:

- Do not apply the product on areas where wind velocity is greater than 10 miles per hour.
- Do not apply the product on areas where wind velocity is greater than 15 miles per hour.
AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with the label and as directed by the Wisconsin Department of Agriculture, Trade and Consumer Protection, Division of Plant Industry, 1660 Jason Street, Madison, WI 53703. This product contains neonicotinoids, a material that is toxic to honeybees, bumblebees, and other beneficial insects and wildlife. Do not use or store near a food or water source, or where the treated area will be used for animal feed or water. Do not use or store near crops to be harvested or planted within 36 inches of the treated area. Do not contaminate water, food, or feed by storage or disposal. Wash hands before leaving treated area. Do not contaminate water, food, or feed by storage or disposal. Wash hands before leaving treated area.

MIXING, LOADING AND HANDLING INSTRUCTIONS

2.5 (2.5 lb/9.0 kg) or larger containers: This product is for use on corn crops only. Do not use on other crops, trees, shrubs, or lawns. Do not contaminate water, food or feed by storage or disposal. Avoid contact with eyes. Wash hands before leaving treated area. Do not contaminate water, food, or feed by storage or disposal. Wash hands before leaving treated area.

SPREADABLE LIQUID FERTILIZERS AND SPRAY ADDITIVES

2.5% (2.5 lb/9.0 kg) or larger containers: This product is for use on corn crops only. Do not use on other crops, trees, shrubs, or lawns. Do not contaminate water, food or feed by storage or disposal. Avoid contact with eyes. Wash hands before leaving treated area. Do not contaminate water, food, or feed by storage or disposal. Wash hands before leaving treated area.

GROUND APPLICATION

Sprinkle irrigation systems are equipped with a 3/8" (0.9 cm) or larger spray nozzle, a 1/2" (1.3 cm) or larger hose, and a solenoid valve. These systems are designed to apply water in a uniform pattern and at the desired rate. They are usually equipped with a timer that controls the flow of water and a water meter to measure the amount of water applied. The irrigation system is typically controlled by a computer or a microprocessor that receives input from sensors and adjusts the irrigation pattern accordingly. The irrigation system is typically controlled by a computer or a microprocessor that receives input from sensors and adjusts the irrigation pattern accordingly.

SPRINKLER IRRIGATION APPLICATION

The system is equipped with a computer or a microprocessor that receives input from sensors and adjusts the irrigation pattern accordingly. The irrigation system is typically controlled by a computer or a microprocessor that receives input from sensors and adjusts the irrigation pattern accordingly. The irrigation system is typically controlled by a computer or a microprocessor that receives input from sensors and adjusts the irrigation pattern accordingly.

Application Requirements for Applications through Automated Sprinkler Irrigation System

1. The system must have an automatic water source, a control valve, a water meter, a solenoid valve, and a sprinkler system. The system must have an automatic water source, a control valve, a water meter, a solenoid valve, and a sprinkler system. The system must have an automatic water source, a control valve, a water meter, a solenoid valve, and a sprinkler system. The system must have an automatic water source, a control valve, a water meter, a solenoid valve, and a sprinkler system.

2. The sprinkler irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The sprinkler irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The sprinkler irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The sprinkler irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source.

3. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source.

4. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source.

5. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source.

6. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source.

7. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source. The irrigation system must have a uniform pattern, a solenoid valve, a water meter, a control valve, and a water source.
WARRANTY LIMITATIONS AND DISCLAIMER

This product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the instructions and under normal conditions. This is the only warranty made on this product. To the extent consistent with applicable law, no other express or implied warranties of merchantability or fitness for a particular purpose is made outside of this label. Therefore, neither this warranty nor any other warranty of merchantability or fitness for a particular purpose extends to the use of this product contrary to label instructions (including conditions noted on the label, such as unfavorable temperatures, normal conditions such as excessive rainfall, drought, tornadoes, hurricanes, etc.) or under conditions not reasonably foreseeable to or beyond the control of the seller.

Losses or damages resulting from the use or handling of this product (including claims based on contract, negligence, strict liability, or other legal theory) will be at the buyer’s risk. The seller will not be liable for consequential or incidental damages or losses.

Limitations and Disclaimer cannot be varied by any written or verbal statements or agreements. Any employee or sales agent of the seller is not authorized to vary this Warranty Limitations and Disclaimer in any manner.
