USE ONLY ACcORDING TO LABEL INSTRUCTIONS.

Read "USE OF WARRANTY AND LIABILITY" before buying or using. If items are not satisfactory, return with receipt for replacement or refund.

This is an END-USE PRODUCT. MONSANTO DOES NOT INTEND AND HAS NOT REGISTERED IT FOR REFORMULATION. IT IS INTENDED THAT REPACKAGING SHOULD ONLY OCCUR IN ACCORDANCE WITH A MONSANTO REPACKAGING OR TOLL REPACKAGING AGREEMENT.

If you are using this product, you must consult the Atrazine Watershed Information Center (AWIC) to determine whether the use of this product complies with any state or local restrictions. For more information, visit www.atrazine-watershed.info. If any of these products or any other atrazine product is applied in an area where its use is prohibited in your watershed, you may return it to the product’s point of purchase or contact Monsanto Company for a return label. See section 1.5. Use Restrictions, and 5.2, This Optimized Treated Fertilizer, Containing Disodiumphosphate, for additional specific information.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in any manner inconsistent with the labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only properly trained handlers may be in the area during application. For any requirements specific to your State or Tribe, contact the agency responsible for pesticide registration.

IN ANY USE OF THIS PRODUCT IN A AREA WHERE USE IS PROHIBITED IT IS A VIOLATION OF FEDERAL LAW. Before using this product, you must consult the Atrazine Watershed Information Center (AWIC) to determine whether the use of this product complies with any state or local restrictions.

This product is identified as Degree Xtra herbicide, EPA Registration No. 524-511.

Personal Protective Equipment (PPE)

Some states require that chemical-resistant conditions exist before applying this product. It is recommended that you consult your local health department or state agricultural extension service to determine if the PPE conditions specified in the SDI are appropriate.

Engineering Controls:

When reduced PPE is worn because an enclosed cab is being used, water-tight, replaceable panel filters should be used, if available, after removing product to a waste disposal facility on pesticide disposal programs. Such programs are often run by state or local governments or by industry. All disposal must be in accordance with applicable Federal, state and local regulations and procedures. CONTAINER VENTILATING AND DISPOSAL: Please refer to supplemental labeling under "AGRICULTURAL USE REQUIREMENTS" for additional information concerning the standard.

Store pesticides away from food, pet food, feed, seed, fertilizers, and other chemicals. Keep container closed to prevent spills and contamination. It is a violation of Federal law to use this product in any manner inconsistent with its labeling. Use only according to label instructions.

For product information or assistance in using this product, please call: 1-800-332-3111 or 1-866-365-3014. If use of this product is prohibited in your watershed, you may return it to the product’s point of purchase or contact Monsanto Company for a return label. See section 1.5. Use Restrictions, and 5.2, This Optimized Treated Fertilizer, Containing Disodiumphosphate, for additional specific information.

This product is identified as Degree Xtra herbicide, EPA Registration No. 524-511.

RestrictED USE PESTICIDE

Due to ground and surface water concerns. For retail sale and use only by Certified Applicators, or persons under their direct supervision and only for those uses covered by the Certified Applicator’s certification.

Keep out of reach of children.

Pesticide use only in accordance with its labeling and with the Worker Protection Standards (WPS), 29 CFR Part 1910.147.

Storage and Disposal

Do not contaminate water, food, or feed by spills or by improper disposal of containers or excess pesticide. If a container is not needed for a second application, it must be securely closed and marked appropriately. Never reuse or refill a container for any purpose. It is a violation of Federal law to use this product in any manner inconsistent with its labeling.

Do not contaminate water, food or feed by spills or by improper disposal of containers or excess pesticide. If a container is not needed for a second application, it must be securely closed and marked appropriately. Never reuse or refill a container for any purpose. It is a violation of Federal law to use this product in any manner inconsistent with its labeling.

Two gallons per liter or 2.70 pounds per gallon of the active ingredient is contained in this product. This product is identified as Degree Xtra herbicide, EPA Registration No. 524-511.

Complete Directions for Use

FIRST AID

IF ON SKIN
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15 to 20 minutes.
• Call a poison control center or doctor for treatment advice.
• Sensitized persons should avoid further contact and reuse of contaminated clothing.
• Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
• You may also contact (314) 694-4000, collect day or night, for emergency medical treatment information.

IF IN EYES
• Do not rub eye.
• Hold eye open and wash slowly with cool tap water for 15 to 20 minutes. Seek medical attention immediately.

IF INhaled
• Inhalaional exposure is unlikely. If symptoms occur, seek medical attention immediately.

If Swallowed
• Do not induce vomiting.
• Drink plenty of cool water if you are conscious. Do not give anything by mouth to an unconscious person. Seek medical attention immediately.

EPA Reg. No. 524-511

Active Ingredients:
* Acetochlor, 2-chloro-N-ethoxymethyl-N-(2-ethyl-6-methylphenyl)acetamide............29.0%
** Atrazine, 2-chloro-4-(ethylamino)-6-(isopropylamino)-s-triazine and related triazines. .14.5%

Other Ingredients: ........................................................................................................56.5%
...................................................................................................................................100.0%

*Contains 324 grams per liter or 2.70 pounds per U.S. gallon of the active ingredient acetochlor.
**Contains 161 grams per liter or 1.34 pounds per U.S. gallon of the active ingredient atrazine and related triazines.

Protected by U.S. Patent Nos. 5,225,570 and 5,925,595. No license granted under any non-U.S. patent(s).

See inside for additional precautionary statements.

NOT FOR SALE, SALE INTO, DISTRIBUTION AND/OR USE IN NASSAU AND SUFFOLK COUNTIES OF NEW YORK STATE.
KEEP OUT OF REACH OF CHILDREN.

CAUTION!
Prolonged or repeated skin contact may cause allergic reactions in some individuals. Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling.

Degree Xtra® herbicide is an encapsulated herbicide for weed control in Field Corn, Production Sweet Corn, Silage Corn, Sweet Corn, Popcorn, grain Sorghum (milo), and Miscanthus or other non-food bioenergy crops.
This product must not be mixed or loaded within 50 feet of perennial or intermittent streams and rivers or within 200 feet of any well where the depth to ground water is 30 feet or less: sands with less than 3 percent organic matter; loamy sands with less than 1 percent organic matter. Do not apply this product within 50 feet of any well where the depth to ground water may result in ground water contamination. On the following soil types, do not apply this product:

- In sand with less than 3 percent organic matter, do not apply this product within 200 feet of any well where the depth to ground water is 30 feet or less.
- In loamy sand with less than 1 percent organic matter, do not apply this product within 200 feet of any well where the depth to ground water is 30 feet or less.

Use this product for weed control in corn and grain sorghum only. This product is recommended for control of yellow nutsedge and many annual grasses and broadleaf weeds. It may also be effective in reducing turf density and seed population of certain grasses.

Minimize drift by using sufficient spray volume to ensure adequate coverage of the plant canopy. Do not use nozzles that produce a fine droplet spray.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in any manner inconsistent with its labeling. Do not use this product in or on any food or animal feed.

Approval to use this product has been granted subject to the conditions specified in the application of use for which this product is intended. This product may not be used in a manner inconsistent with the conditions specified in the application of use for which this product is intended.

This product is a herbicide designed for use in corn and grain sorghum. It is labeled for weed control in corn and grain sorghum only. Use this product in corn and grain sorghum only. It is not labeled for use in any other crop.

17.1 Use Limitation and Liability

17.2 Personal Protective Equipment

The manufacturer of this product is not responsible for injury or damage caused by improper use of this product. This product shall not be used in a manner inconsistent with the conditions specified in the application of use for which this product is intended. This product may not be used in a manner inconsistent with the conditions specified in the application of use for which this product is intended.

This product is approved for use in corn and grain sorghum. It is labeled for weed control in corn and grain sorghum only. Use this product in corn and grain sorghum only. It is not labeled for use in any other crop.

Use this product for weed control in corn and grain sorghum only. Use this product in corn and grain sorghum only. It is not labeled for use in any other crop.

Agronomic Use Requirements

You must use this product in a manner consistent with the conditions specified in the application of use for which this product is intended. This product shall not be used in a manner inconsistent with the conditions specified in the application of use for which this product is intended. This product may not be used in a manner inconsistent with the conditions specified in the application of use for which this product is intended.

This product is approved for use in corn and grain sorghum. It is labeled for weed control in corn and grain sorghum only. Use this product in corn and grain sorghum only. It is not labeled for use in any other crop.

17.6 Labeling

This product is approved for use in corn and grain sorghum. It is labeled for weed control in corn and grain sorghum only. Use this product in corn and grain sorghum only. It is not labeled for use in any other crop.

Store pesticides away from food, pet food, feed, and animal contact. Avoid contact with animals. Prolonged or repeated skin contact may cause allergic reactions in some individuals. IF ON SKIN OR CLOTHING, remove clothing/PPE immediately if pesticide gets inside. Then wash using the toilet.

For Environmental Protection, call toll-free 1-800-332-3111 at any time of day or night in the United States or Canada or 1-888-SAFER-31 for assistance in handling or disposing of the pesticide.

To avoid wastes, use all material in this container. This product is a herbicide designed for use in corn and grain sorghum. It is labeled for weed control in corn and grain sorghum only. Use this product in corn and grain sorghum only. It is not labeled for use in any other crop.
3. Weed growth after application to fields containing these plants is controlled for up to 12 months when used as specified for the label according to the Proper Practice. Allowing the crop to mature in fall helps control annual weeds and reduces the weed seed population.

4. Avoid using this product on vegetable crops that are part of a rotation scheme to which Group 15 or Group 5 herbicides are applied. Avoid the use of this product in vegetable fields that are part of a rotation scheme to which Group 15 or Group 5 herbicides are applied.

5. Apply this product to the entire tile-outletted field under a no-till system. Do not cultivate prior to or after application to fields containing these plants. Do not cultivate prior to or after application to fields containing these plants. Do not cultivate prior to or after application to fields containing these plants.

6. Do not apply this product within 66 feet of standpipes in tile-outletted fields. Do not apply this product within 66 feet of standpipes in tile-outletted fields. Do not apply this product within 66 feet of standpipes in tile-outletted fields.

7. Soil Texture

Applications should avoid soil conditions that will assure that the crops are not stressed. The specific uses of this product and the other herbicides listed in this table are all made with this product and it is labeled as a tank mixture. The following conditions are generally not recommended:

• Waterlogged soils or heavy clay soils
• Soils that are too dry or too wet
• Soils that are too cool or too warm
• Soils that are too acidic or too basic

8. Crop Rotation

The following crops are not recommended for rotation with this product: alfalfa, clover, flax, hemp, hops, potatoes, sugar beets, tobacco, tomatoes, and watermelon. The following crops are not recommended for rotation with this product: alfalfa, clover, flax, hemp, hops, potatoes, sugar beets, tobacco, tomatoes, and watermelon. The following crops are not recommended for rotation with this product: alfalfa, clover, flax, hemp, hops, potatoes, sugar beets, tobacco, tomatoes, and watermelon.

9. Equipment Cleaning

Cleaning and repair of transfer systems and application equipment is a process that should not be done under adverse conditions. Equipment cleaning and repair of transfer systems and application equipment is a process that should not be done under adverse conditions. Equipment cleaning and repair of transfer systems and application equipment is a process that should not be done under adverse conditions.

10. Application Timing and Methods

The product and any labeled tank mixtures of this product may be applied in liquid fertilizer carriers or liquid herbicide carriers to control emerged weeds. The product and any labeled tank mixtures of this product may be applied in liquid fertilizer carriers or liquid herbicide carriers to control emerged weeds. The product and any labeled tank mixtures of this product may be applied in liquid fertilizer carriers or liquid herbicide carriers to control emerged weeds.

11. Cultivation Information

It is important to cultivate the field after applying this product to control weeds that may have emerged after application. Cultivation prior to or after application to fields containing these plants is not recommended. Cultivation prior to or after application to fields containing these plants is not recommended. Cultivation prior to or after application to fields containing these plants is not recommended.

12. Weed Control

The following weeds are controlled by this product when applied under proper conditions:

• Alopecurus myosuroides (Dutch chervil)
• Alopecurus myosuroides (Dutch chervil)
• Alopecurus myosuroides (Dutch chervil)

If you have questions about the use of this product, please contact your local Agricultural Extension Service or the appropriate state or federal regulatory agency. If you have questions about the use of this product, please contact your local Agricultural Extension Service or the appropriate state or federal regulatory agency. If you have questions about the use of this product, please contact your local Agricultural Extension Service or the appropriate state or federal regulatory agency.
**11.2 Annual Broadleaf Weeds Controlled**

- **Annual Grasses Controlled**
  - Wheat, volunteer
  - Rice, red
  - Panicum dichotomiflorum

- **Perennial Weeds**
  - Smartweed
  - Ragweed, common
  - Pusley, Florida
  - Pigweed; Carelessweed
  - Nightshade, black
  - Sida spinosa
  - Richardia scabra
  - Portulaca oleracea
  - Amaranthus spp.
  - Panicum halepense

**Application Rates**

**Typical Weed Control**

- Annual weeds under normal growing conditions. When using ammonium sulfate in water, mix together 2 pints of Princep in 5 to 10 gallons of water. Before using, make sure that the ammonium sulfate in water is a normal solution and is not a mixture. Add ammonium sulfate to the Roundup agricultural herbicide in a tank mixture at the rate of 0.25 to 1.25 pounds of ammonium sulfate per acre. For more consistent control of annual grasses and broadleaf weeds, use a contact herbicide in addition to the tank mixture.

**Lambsquarters**

- Kochia**
- Jimsonweed
- Henbit

**Using Higher Rate**

- Use the higher rate in the application rate range within each Application Rate System to provide improved control.

**Consequences**

- Refer to specific product labels for crop rotation restrictions per calendar year.

**Further Information**

- For more consistent control of woolly cupgrass rates for this product to provide improved control. For more consistent control (IN CORN ONLY) and/or atrazine may be added to the specified treatment to reduce competition from emerged annual weeds under adverse growing conditions. When using ammonium sulfate in water, mix together 2 pints of Princep in 5 to 10 gallons of water. Before using, make sure that the ammonium sulfate in water is a normal solution and is not a mixture. Add ammonium sulfate to the Roundup agricultural herbicide in a tank mixture at the rate of 0.25 to 1.25 pounds of ammonium sulfate per acre. For more consistent control of annual grasses and broadleaf weeds, use a contact herbicide in addition to the tank mixture.

**12.0 Corn Conservation or Minimum Tillage Systems**

**12.1 Roundup Agricultural Herbicides**

- Note: Each section of this label presents specific treatment rates for this product when tank-mixed with other products. Application rates, which are not complete with recommendations for the label, may result in undesirable results. For more consistent control of annual grasses and broadleaf weeds, use a contact herbicide in addition to the tank mixture.

- Application rate is in the control of the label. The herbicide is used as a contact herbicide or in a tank mixture with a Roundup agricultural herbicide to provide improved control.

- Note: Each section of this label presents specific treatment rates for this product when tank-mixed with other products. Application rates, which are not complete with recommendations for the label, may result in undesirable results. For more consistent control of annual grasses and broadleaf weeds, use a contact herbicide in addition to the tank mixture.
