**PRECAUTIONARY STATEMENTS**

**Hazard to Humans and Domestic Animals**

**RINSE,** Sanitizers used in automated systems may be used for general cleaning but may not be re-used.

**Sanitizing Porous Food Contact Equipment:**

Prepare a sanitizing solution by thoroughly mixing 2.5 oz of this product in 10 gallons of water. If no test kit is available, 100 ppm available chlorine must be tested and adjusted periodically to insure that the recommended level is maintained. Use a chlorine test kit to determine the exact amount of available chlorine in the solution. Adjust the amount of product in the solution as needed to maintain the desired level of available chlorine.

**IMMERSE OR FLOOD APPLICATIONS.** Prepare a disinfecting solution by thoroughly mixing 0.5 oz of this product in 10 gallons of water. Subsequent doses may be needed to maintain the level of disinfectant. Adjust the amount of product in the solution as needed to maintain the desired level of disinfectant.

**METHOD:**

Prepare a disinfecting solution by thoroughly mixing 0.5 oz of this product in 10 gallons of water. Subsequent doses may be needed to maintain the level of disinfectant. Adjust the amount of product in the solution as needed to maintain the desired level of disinfectant.

**Storage and Disposal:**

...
Liquid Chlorinated Sanitizer

Manufactured For:

Liquid Bactericide, Disinfectant, Sanitizer, Deodorizer

NOTE TO PHYSICIAN:

IF IN EYES: Rinse well with water. If irritation persists call a doctor.

IF INHALED: Remove to fresh air immediately. If notimpossible, get medical assistance immediately.

IF SWALLOWED: Rinse out mouth with water. Call a doctor immediately. Do not induce vomiting.

FIRST AID

AVAILABLE CHLORINE - 5.0%

OTHER INGREDIENTS:

Sodium Hypochlorite

This product is hazardous if abused. Avoid contact with skin and eyes. Avoid prolonged contact with clothing. May cause irritation to eyes, skin, and respiratory tract. Keep out of reach of children.

WARNING:

Harmful if swallowed. Caustic to skin, eyes, and mucous membranes. Causes severe chemical burns to the eyes, skin, and mucous membranes. Avoid contact with skin and eyes. Do not eat, drink, or smoke while handling. Use only with adequate ventilation and proper personal protective equipment.

DIRECTIONS FOR USE:

SANITIZATION OF NON-POROUS FOOD CONTACT SURFACES:

Apply a 600 ppm solution to all equipment surfaces for at least 2 minutes. Do not rinse equipment with water after treatment and do not soak equipment overnight.

FRUIT AND VEGETABLE WASHING – SINK: Apply a 25 ppm solution by spraying the product into the sink. Apply a 25 ppm solution to all equipment surfaces. Dilute 5 oz. of product for each 10 gallons of water. Prepare a 25 ppm solution of this product (5 oz. / 10 gallons) and apply this solution thoroughly to all surfaces. Rinse excess product from all surfaces. Do not reuse this solution for sanitizing eggs.

Dairy, Beverage, Meat, Poultry, Commissary and Food Processing Plants – SANITIZATION OF POROUS NON-FOOD CONTACT SURFACES:

Apply a 600 ppm solution to all equipment surfaces. Thoroughly clean all eggs. Dilute 5 oz. of product for each 10 gallons of water to provide approximately 600 ppm available chlorine. Thoroughly clean and sanitize all equipment surfaces with the 600 ppm solution. Maintain contact with the solution for at least 2 minutes. Do not rinse equipment with water after treatment and do not soak equipment overnight.

SANITATION OF NON-FOOD PRODUCTS FOR FOOD CONTACT SURFACES:

Dairy, Beverages, Meat, Poultry, Confectionery, and Food Processing Plants – IMMERSION OR FLOOD APPLICATIONS. Prepare a 200 ppm solution of this product (1 oz. / 20 gallons) and apply this solution thoroughly to all surfaces. Rinse excess product from all surfaces. Do not reuse this solution for sanitizing eggs.

ENVIRONMENTAL HAZARDS

Do not use on non-food contact areas. Do not use on any food that is to be consumed by humans or any pet after treatment. Use only with adequate ventilation and proper personal protective equipment. Wear appropriate eye protection and gloves when using this product.

NOTE: Read and keep carefully all instructions, including the specifications in this box. The job will not be sent to print until final decision is made. All information contained on the label and in this box are the responsibility of the final approver.
INDIVIDUAL WATER SYSTEMS: DRILLED & BORED WELLS: Run pump until water is as free from turbidity as possible. Pour a 100 ppm available chlorine sanitizing solution into the well made by thoroughly mixing 2.5 ounces of Divosan Hypochlorite into 10 gallons of water. Add 5 to 10 gallons of clean, chlorinated water to the well in order to force the sanitizer into the rock formation. Wash the exterior of pump cylinder with the sanitizer. Drop pipeline into well, start pump and pump water until strong odor of chlorine in water is noted. Stop pump and wait at least 24 hours. After 24 hours, flush well until all traces of chlorine have been removed from the water. Deep wells with high water levels may necessitate the use of special methods for introduction of the sanitizer into the well. Consult your local Health Department or further details.

DISINFECTION OF DRINKING WATER (PUBLIC SYSTEMS):
Prepare a stock disinfectant solution by mixing 1-1/4 oz. of product with 5 gallons water to obtain 100 ppm available chlorine. Meter the stock solutions with hypochlorinator until a free residual chlorine content of at least 0.2 ppm but no more than 0.6 ppm is obtained throughout the distribution system. Check water frequently with a Chlorine Test Kit. Bacteriological sampling must be conducted at a frequency no less than that prescribed by the National Primary Drinking Water Regulation. Contact your local Health Department for further details.

COMMERCIAL LAUNDRY SANITIZERS:
Wet fabrics or clothes should be spun dry prior to sanitization. Thoroughly mix 5 oz. of this product with 10 gallons of water to yield 200 ppm available chlorine. Promptly after mixing the sanitizer, add the solution into the prewash prior to washing fabrics/clothes in the regular wash cycle with a good detergent. Test the level of available chlorine if solution has been allowed to stand. Add more of the product if the available chlorine level has dropped below 200 ppm.

FARM PREMISES:
Remove all animals, poultry, and feed from premises, vehicles and enclosures. Remove all litter, and manure from floors, walls and surfaces of barns, pens, stalls, chutes and other facilities occupied or traversed by animals or poultry. Empty all troughs, racks and other feeding and watering appliances. Thoroughly clean all surfaces with soap or detergent and rinse with water. To disinfect, saturate all surfaces with a solution of at least 1000 ppm available chlorine for a period of 10 minutes. A 1000 ppm solution can be made by thoroughly mixing 25 oz of this product with 10 gallons of water. Immerse all halters, ropes and other types of equipment used in handling and restraining animals or poultry, as well as the cleaned forks, shovels and scrapers used for removing litter and manure. Ventilate buildings, cars, boats and other closed spaces. Do not house livestock or poultry or employ equipment until chlorine has dissipated. All treated feed racks, mangers, troughs, automatic feeders, fountains and waterers must be rinsed with potable water before use.

See container label for First Aid, Precautionary Statements and complete Directions for Use.
