RAZORROOTER® II

FOR USE TO CONTROL TREE ROOT INTRUSIONS IN SANITARY SEWERS, STORM DRAINS, AND OTHER DRAINAGE SYSTEMS

PRODUCT INFORMATION

RAZORROOTER® II is uniquely suited to sewer applications. RAZORROOTER® II is a soluble liquid designed to control tree roots in sewers, on contact. RAZORROOTER® II is a non-selective herbicide, which works on all varieties of tree roots and will not harm above-ground vegetation, when applied according to label instructions. RAZORROOTER® II is not volatile, and will not produce toxic gases.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not use in potable water systems. Do not use in soil, field or other areas of water contamination. Do not use in a sanitary landfill, or by incineration, or by other means of disposal other than RAZORROOTER® II will result in contamination and may not be completely removed by cleaning. Refilling with materials other than RAZORROOTER® II is not compatible with anoxic surfactants.

Fiber pipe size, sewer flow, lateral conditions, line construction, and sewer friction in selection of proper application technique.

MIXING INSTRUCTIONS

Before mixing, determine the scope of work, including pipe size and overall layout, business conditions and other factors that may affect the treatment. The treatment consists of binding diquat in the gut with suspensions of activated charcoal or bentonite for diquat analysis. To be effective, treatment for diquat poisoning must be performed IMMEDIATELY.

Before mixing, determine the scope of work, including pipe size and overall layout, business conditions and other factors that may affect the treatment. Using the charts below as guidance, determine the amount of solution required for the job.
