ACTIVE INGREDIENTS:
CUPRIC OXIDE
(N-CYCLOPROPYL-N-(1,1-DIMETHYLETHYL)-6-
(METHYLTHIO)-1,3,5-TRIAZINE-2,4-DIAMINE
INERT INGREDIENTS
COPPER AS METALLIC 3.03%
MICRON® EXTRA with Biolux®

PRODUCT DESCRIPTION: MICRON® EXTRA with Biolux® is a multi-season, Controlled Solubility Coatings system consisting of a two-pack system- a two-pack resin and a biocide called Biolux®. The cuprous oxide works fast against shell fouling, while the Biolux® biocide helps prevent algal and slime growth. MICRON® EXTRA with Biolux® is a unique, long-lasting, high-performance coating that is designed to provide superior protection against marine fouling organisms. The product is a two-pack system that is applied in one easy-to-use, conventional application method. It can be used on most hard, conventional surfaces as long as the old coating is tightly adhered, is in sound condition, and has been thoroughly cleaned with a biocide-free, high-pressure washer. MICRON® EXTRA with Biolux® should not be used on MICRON® 33, MICRON® 44, or gel-coated fiberglass. These old coatings should be removed.

DIRECTIONS FOR USE:

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- COMPLIANCE: MICRON® EXTRA with Biolux® can be applied over most hard, conventional surfaces as long as the old coating is tightly adhered, is in sound condition, and has been thoroughly cleaned with a biocide-free, high-pressure washer. MICRON® EXTRA with Biolux® should not be used on MICRON® 33, MICRON® 44, or gel-coated fiberglass. These old coatings should be removed.
- DRY TIME: Touch-Dry 2 hours
- THINNER: Not the only when necessary
- APPLICATION TEMPERATURE: 20°F (7°C) and above
- THEORETICAL COVERAGE: 440 gels/sq. ft.
- APPLICATION SYSTEMS: Snorkel or small boat. Apply at least 2 fluid coats (1 coat on bare wood). MICRON® EXTRA with Biolux® is applied by brush, roller, or spray. Do not apply thin coats. Keep in mind that too many coats of paint applied in one step will be difficult to remove. If a thicker application is required, apply a thinner application over the existing layers of paint to achieve the desired thickness. PREVIOUSLY PAINTED SURFACES - GOOD CONDITION: Remove all previous coatings with sandblasting or chemical strippers. PREVIOUSLY PAINTED SURFACES - POOR CONDITION: Completely remove all previous coatings with sandblasting or chemical strippers. BARE FIBERGLASS - SURFACE PREPARATION (POLYSTER OR VINYLITE): It is very important that bare fiberglass be prepared properly to prevent contamination of painted layers. Scrub the surface thoroughly with soap and water using a stiff-bristled brush. Wipe down with a clean cloth. MICRON® EXTRA with Biolux® is applied by brush, roller, or spray. Do not apply thin coats. Keep in mind that too many coats of paint applied in one step will be difficult to remove. If a thicker application is required, apply a thinner application over the existing layers of paint to achieve the desired thickness. PREVIOUSLY PAINTED SURFACES - GOOD CONDITION: Remove all previous coatings with sandblasting or chemical strippers. PREVIOUSLY PAINTED SURFACES - POOR CONDITION: Completely remove all previous coatings with sandblasting or chemical strippers. BARE FIBERGLASS - NO SAND SYSTEM: Clean the surface following the preparation procedure described above. Repair any surface imperfections with IMBAY® 328. Sand the repaired areas and wipe clean. Apply at least 2 coats of MICRON® EXTRA with Biolux® and let dry. BARE FIBERGLASS - SANDING SYSTEM: Clean the surface following the preparation procedure described above. Repair any surface imperfections with IMBAY® 328. Sand the repaired areas and wipe clean. Apply at least 2 coats of MICRON® EXTRA with Biolux® and let dry.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION:

- Harmful if absorbed through skin or inhaled. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants and hat. Avoid breathing spray mist. While spray painting, avoid smoking or handling hot surfaces. Wear a mask and a respirator. Impacted by the Mining Safety & Health Administration and the National Institute for Occupational Safety & Health. Wash thoroughly with soap and warm water after handling. Remove contaminated clothing and wash clothing before reuse. May pose an aspiration pneumonitis hazard.

FIRST AID:

IF INVALENTED:

- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water (1 to 2 ounces). Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

IF IN EYES:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

STORAGE & DISPOSAL:

- Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

PHYSICAL OR CHEMICAL HAZARD:

- Do not use or store near heat or open flame.

ENVIRONMENTAL HAZARD:

- This material is toxic to fish. Do not allow direct water by erosion equipment or dispersal of waste. Do not allow drift or deposition of waste water. Do not contaminate water, food, or feed by storage or disposal. Do not pour into waterways, surface, or ground waters. Open dumping is prohibited. If in eyes, wash eyes immediately with plenty of water for 15-20 minutes. If swallowed, do not induce vomiting unless told to do so by a doctor or other health professional. If inhaled, remove to fresh air. Call a poison control center or doctor for treatment advice.

MEDICAL ADVISORY:

- Contact your local poison control center or doctor for treatment advice.

KEEP OUT OF REACH OF CHILDREN.
