**QUATRICIDE® TB** is designed specifically as a general-use-toy cleaner and disinfectant for use in hospitals, office buildings, manufacturing facilities, veterinary clinics, pet shops, and animal shelters. It is formulated to be direct-to-surface application and is effective in the presence of organic soiled surfaces. It is formulated to disinfect hard, non-porous, inanimate environmental surfaces when allowed to remain wet for a 3-minute contact time on clean, hard, non-porous, painted and plastic surfaces, spot test on an inconspicuous area before use. A stain with the product remaining wet for 3 minutes may result in unsightly residue. **DISPOSAL OF INFECTIOUS MATERIALS:** If the product is being used to clean and disinfect items soiled with blood or body fluids, the product and the items soiled with blood or body fluids must be autoclaved and disposed of according to local regulations for infectious waste. **NOTE TO PHYSICIAN**- Probable mucosal damage may contraindicate the use of gastric lavage.
