SWIMMING POOL ALGAECIDE AND ALGAE PREVENTATIVE

Algi-Crush™ is a highly effective, patented, non-staining algaecide that kills and controls all types of algae in swimming pools. Algi-Crush is especially recommended for killing and controlling green, blue-green (frequently called black or spot algae) and mustard algae growths. This product is formulated for use in chlorine or bromine sanitized swimming pools of all surface and filter types. IMPORTANT NOTES: 1) Do not use in pools sanitized with biguanides or pools treated with hydrogen peroxide. 2) Prior to the initial application of this product, test pool water for the presence of metals. If metals are present, apply a metal stain preventative per label directions. 3) When using other products, always follow directions for those products. 4) In use dilution, this product is non-staining to pool surfaces and equipment.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

PRIOR TO APPLICATION: 1) Ensure all equipment is working properly. If necessary, clean the filter system. 2) Adjust pH between 7.2-7.6. 3) Establish and maintain proper chlorine or bromine levels. In chlorine-treated pools, add stabilizer to a minimum level of 30-40 ppm of cyanuric acid to reduce the degrading effects of sunlight on chlorine residual. 4) Vacuum leaves and any other foreign debris from pool. 5) Brush visible algae thoroughly from the pool's surface with a surface-compatible brush.

TO PREVENT ALGAE: 1) Initially apply fluid ounces of this product per 10,000 gallons of pool water with pump and filter operating. 2) Thereafter, for weekly application intervals, add 1.5 fluid ounces per 10,000 gallons of pool water. For two week application intervals, add 3 fluid ounces per 10,000 gallons of pool water every other week. Apply more often if pool volume is diluted by heavy rain, frequent backwashing or partial drain/refill. 3) Wait at least 15 minutes after application before entering pool.

TREATMENT OF VISIBLE ALGAE: 1) Add 1 lb of Sun-Burn Force per 10,000 gallons of pool water or 1 lb of Sun-Burn 35 per 6,000 gallons of pool water. Follow application directions on these products. 2) Allow to circulate for 4 hours. 3) With pump and filter operating, apply 16 fluid ounces of Algi-Crush per 10,000 gallons of pool water directly to the pool water in areas of heaviest algae growth. 4) Continuously circulate pool water for 24 hours. 5) The next day, thoroughly brush pool surfaces. 6) In cases of persistent algae, repeat brushing and application after 2-4 days. 7) The use of a filter aid will enhance filter efficiency and algae removal.

STORAGE AND DISPOSAL: keep this product in its original tightly closed container or in a cool, dry, well ventilated area. Do not contaminate food or feed or other chemicals. Avoid breathing vapors. Wear safety glasses or goggles. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

PHYSICAL OR CHEMICAL HAZARDS: Do not mix with other chemicals.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

NOTE: Buyer assumes all responsibility for safety and use in accordance with directions. Metals from source water, leaches or poorly sequestered algaecides have the potential to stain pool surfaces. Treat these problems with an appropriate metal stain preventative (chelating agent) before using this product.

IN CASE OF MEDICAL EMERGENCY, CALL 1-888-555-5555.

TREATMENT OF POISONING:

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING:

Take off contaminated clothing. Rinse skin immediately for treatment advice. Have person bathe in warm water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED:

Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth breathing, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

FIRST AID: IF IN EYES:

Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING:

Take off contaminated clothing. Rinse skin immediately for treatment advice. Have person bathe in warm water if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF INHALED:

Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth breathing, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF SWALLOWED:

Immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. If swallowed, wash out mouth, rinse mouth with water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth breathing, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF INHALED:

Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth breathing, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF SWALLOWED:

Immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth breathing, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF INHALED:

Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth breathing, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF SWALLOWED:

Immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. If swallowed, wash out mouth, rinse mouth with water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth breathing, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF INHALED:
